**LIBRARY IMPACT STATEMENT (New Course Proposal)**
**LIBRARIAN'S ASSESSMENT**

Course:  HIS 110: Ancient Greece

Department, College:  Department of History, College of Arts and Sciences

Faculty Member:  Dr. Bridget Buxton

Date returned to Faculty:  11/2/10

Librarian Completing Assessment:  Amanda Izenstark

**Assessment of:**
 **the suitability of existing resources;**
 **the new resources required to support the program;**
 **the information skills education required by the students; and**
 **the funds needed for library materials and services.**

**1. Summary of existing library holdings in relevant subject categories, including supporting collections from HELIN. Amount of money now allocated in the program area.**

$4,300 per year is allocated for History monographic purchases. Because of the historical focus of HIS 110, the topics covered by the course are well supported by materials at URI and in the HELIN consortium.

Although URI does not subscribe to a database specifically covering the time period in question, JSTOR, Project Muse, and our other full text databases provide useful full text on the subject

**2. Does URI have the essential journals as noted in the Faculty Questionnaire?**

This course does not include library research, so no journals are needed to support the course content beyond what the instructor will be providing via coursepaks, Reserves, and/or Sakai.

**3. What new resources are required to support the program (including media, computing, or other nonprint materials)?**

No new resources are required**.**

**4. What information mastery sessions will be required for the students?**

No instruction sessions are necessary for this course as the requirements do not include a research project.

**5. What is the approximate cost to acquire the materials necessary? Which of these will be continuing costs?**

No new materials will need to be acquired.
