EXECUTIVE SUMMARY

ACTION ITEM: Determination of Maximum Award for GOS in FY 1991

DISCUSSION POINTS:

Keeping the Maximum at \$75,000 - The 1991 appropriation for GOS is \$20,161,000 (pending final adjustments). We predict 1392 applications. Assuming a 4.3% increase in average awards to \$47,088, we will be able to make 428 grants, for a funding rate of 31%.

For comparative purposes, the table below provides the number of GOS applications, the percentage funded and the total dollar amount of awards between 1985 and 1991. With the increase for 1991, we predict a small reversal in the declining number and percentage of awards.

<u>Year</u>	<u># of Applications</u>	<u>% Funded</u>	<u>Total \$ Awards</u>
1985	1264	35.7	\$16,756,614
1986	1345	30.9	\$16,191,862
1987	1296	31.7	\$16,754,790
1988	1312	31.6	\$17,567,059
1989	1355	29.7	\$17,353,447
1990	1368	28.5	\$17,625,000
* 1991	1392	30.7	\$20,161,000

* projected [Increasing operating budgets among applicants has resulted in an increase in the average award. The average award has increased an average of 4.3% per year. In 1990 the average award was \$45,192 and is projected at \$47,088 for 1991.]

Raising the Maximum Award - The NMSB has kept the maximum GOS award at the \$75,000 level for fiscal years 1985-1990. Historically, the maximum amount has increased with increasing appropriations. The small increase in appropriations over the last few years has not kept pace with the increases in applications and size of the average award.

The average operating budget for the applicants to GOS in FY 1990 was \$1.6 million. It has been suggested that the GOS award should be raised to \$100,000 in order to keep pace with increasing budgets, however, appropriations adequate to reach such a target and still fund a reasonable percentage of applicants are not available for the 1991 cycle. Although increasing the maximum award is desirable for several reasons, it would not be justified within the current funding pattern.

Based on 1990 figures, of the 1368 applications submitted, only 329 awards would have been made if the maximum had been raised to \$100,000.

Lowering the Maximum Award -

The advantage of lowering the maximum award is that more museums would received GOS funds. The maximum amount of the award would have to be lowered considerably to have a significant impact on the number and percentage of awards made, as illustrated in Table A.* Yet, even by lowering the maximum award to the pre-1985 level of \$50,000, nearly 900 applicants would still be unfunded.

The additional awards at a lower maximum level would be made at the expense of larger museums that are already receiving a small percentage of their operating budget--in many cases a very small percentage. At the current \$75,000 level, about one-third of the museums receive the maximum award. Reducing the maximum would make the program less attractive to those museums.

RECOMMENDATION: The maximum award for GOS should remain at \$75,000 for the 1991 fiscal year. All efforts are underway to increase the appropriation for GOS so that up to 1200 museums will receive 10% of their operating budgets up to the \$75,000 maximum.

Each year since 1985, the NMSB has decided that the benefits of maintaining the maximum at \$75,000 outweigh the benefits of raising or lowering it. Lowering the maximum award would be a step backward for many grantees and would undermine the rationale for increased funding. Increasing the award is not justified given the current pressures on the program by increased applications and rising average budgets.

Changing the maximum award amount would be precedent setting and might have unintended consequences. We expect that the report from Reed Public Policy will provide additional guidance on this issue.

*Table A is taken from calculations using the 1368 FY 1990 applications and their rankings. They are meant as an example of the potential impact on funding percentages and numbers and not as a prediction of results of other competitions.

Award Amount = 10% of Operating Budget

Number of GOS Awards

At Different Award Levels

- 1) Based on FY 1990 statistics (1368 applicants; \$17,625,000)
- 2) Number of Awards 390 awards at \$75,000 maximum to 494 awards at \$50,000 maximum.
- 3) Percentage of Successful Applications 28.5% at \$75,000 maximum to 36.1% at \$50,000 maximum.
- 4) At current \$75,000 maximum, a third of grantees receive awards that amount to less than 10% of their annual budgets.
