FIRE AND VEGETATIVE COMPOSITION AND HISTORY RESEARCH PROJECT.
Sol Y455-RFP5-340026, BDD 6 May 85. Research project
providing more explicit understanding of the relationships
between fire cycles, climatic sequences, and vegetational
profiles during the holocene. Access to and intimate
familiarity with past and ongoing research in this highly
specialized area will be required for successful completion of
the project within the available budget. A library of
Macrofossils from Southeast Oregon, a catalogue of relevant
plant pollen and a library of Neotoma Middens will be
required for successful completion of the project. Access to
an electron microprobe laboratory, radiocarbon laboratory and
a nuclear reactor will be needed in order to complete the
analysis. This is not a formal sol; however, concerns that
response should furnish detailed data concerning their
capabilities and may request to receive a copy of the sol when
it becomes available. This notice may represent the only
official notice of such a sol. (082)
