DATE: November 13, 1981

SUBJECT: NEH GRANTS TO STATE COUNCILS 1978-1981/82

Attached are three grants containing information on NEH grants to state humanities councils.

A. The first chart (A) contains NEH grants to state councils for FY 1978, FY 1979, and FY 1980. In FY 1978 a few more than half the state councils (those with an asterisk on the chart) received grants for periods exceeding 12 months; these have been pro-rated to a 12-month period.

B. The second chart (B) includes the FY 1980 and FY 1981/82 grant (the transition-year grant until all state councils come onto the same grant cycle). This chart is separated from the first because the formula used to calculate the grant is very different from that used in previous years.

As we understand it (we have had the unstinting help of Julie Van Camp and other members of the Division staff), the Division of State Program's plan is based on the following calculations. The goal is to keep the states slightly over 1980 funding levels with a combination of FY 1981 and FY 1982 money for the entire transition period to October 31, 1982. The FY 1981 money represents the regular 1981 grant cycle. The 1982 funds (which the DSP views as funding an extension of the FY 1981 grant) will be a base grant for each state to be expended during the extension to October 31, 1982. (E.G., a state whose 1981 grant ends on January 31, 1982 has a 9-month extension, while one whose 1981 grant ends June 31, 1982 has a 4-month extension.) These extensions of the FY 1982 grant will be awarded to all states in November 1981 or February 1982. The amount available for these FY 1982 grants depends on numerous unknown factors (which are still unknown at this time) such as the FY 1982 budget. However, in August 1981, the DSP staff based their FY 1982 funding estimates on what at the time looked like the "worst case," the 50% cut proposed by the Reagan budget. Since then, of course, the president has asked for an additional 12% cut from the budget. It must be emphasized that the amount of money available for grants in FY 1982 is, for many reasons, unknown at this time.

These two figures -- the FY 1981 grant and the FY 1982 extension -- are then added together. If the sum is less than the 1980 operating level for the entire transition period, then the state was awarded a supplement in August 1981. (This most often happened to large states and/or states with long extension periods.) If the sum is more than the 1980 operating level for

NEH Grants to State Councils
November 13, 1981
page two

the entire transition period, some money was subtracted from the state's total (usually from the G&M offer because such states can use their proportionally larger share of definite funds as matching).

Thus all states receiving favorable review can expect to receive funding from two sources -- FY 1981 grant money and FY 1982 extension funds -- and some from a third -- a supplement in August 1981.

C. The third chart (C) ranks the states in descending order from the largest population to the smallest according to the 1980 Census. Rankings for total NEH grant (authorized outright and G&M) are also included.

As you will notice from reviewing the grants to the states charts of previous years, this one contains somewhat less population data. We are still in search of the most useful format for presenting the grants and facilitating useful comparative analysis. We welcome your suggestions.

NOTES -- CHART A

- * FY 1978 was a transition year for state councils in which about half the states were on a one-year grant and the rest were on 18-month grants. Thus those states with 18-month grants have been pro-rated to reflect a 12-month figure so that they can be more easily compared to the rest of the figures on the chart. The figures which are pro-rated have an asterisk.

The 1979 and 1980 columns reflect NEH's fiscal year. Hence the 1979 column includes grants made in November 1978, February 1979, May 1979, and August 1979, and the 1980 column has grants from November 1979, February 1980, May 1980 and August 1980.

- a Georgia received a 15-month grant of \$488,325 outright and \$10,000 G&M. The figure on the chart is pro-rated for 12 months.
- b Illinois received a 14-month grant of \$1,055,000 in outright and \$650,000 in G&M. The figure on the chart is pro-rated for 12 months.
- c Iowa received a 10-month grant of \$323,000 outright and \$20,000 G&M. The figure on the chart is pro-rated for 12 months.
- d New Mexico received a 19-month grant of \$554,200 in outright and \$100,000 in G&M. The figure on the chart is pro-rated for 12 months.
- e New Mexico received an 11-month grant of \$271,333 in outright and \$10,000 in G&M. The figure on the chart is pro-rated for 12 months.
- f Puerto Rico received a 22-month grant of \$465,365 in outright and \$20,000 in G&M. The figure on the chart is pro-rated for 12 months.
- g Puerto Rico received an 8-month grant of \$242,000 in outright and \$20,000 in G&M. The figure on the chart is pro-rated for 12 months.

NOTES -- CHART B

Federal Fiscal Years 1981 and 1982 are transition years during which all states are being brought to a uniform funding cycle. All requests for FY 1983 funds will be considered at the August 1982 meeting of the National Council. To implement this change, grant periods are being shifted so that a 12-month funding award will begin for all states on November 1, 1982. About half the states will be submitting new proposals for consideration at the August 1982 National Council meeting; the others will be submitting interim progress reports.

All states will remain at slightly above their FY 1980 funding level in total dollars through October 31, 1982. Meaningful comparisons between the states are not possible unless the length of the extension period is also considered, as the extensions range from 0-11 months. States with long extension periods needed extra supplements (awarded in August 1981) to be able to continue at slightly above their FY 1980 funding level through 10/31/82. States with short extension periods did not need an extra supplement because they are using both FY 1981 and FY 1982 money for this shorter total transition period. Further, some states with short extension periods, because of the statutory funding formula, will have sufficient definite funds in excess of the FY 1980 level to continue their matching program at current levels by using definite funds as match; no G&M funds or reduced awards were given in those states.

(This note was provided by the Division of State Programs.)

- a Georgia received a 15-month grant of \$488,325 in outright and \$10,000 in G&M. The figure on the chart is pro-rated for 12 months.

C. STATE RANKING BY 1980 POPULATION AND GRANT SIZE

State	Rank by Total Out- right + G&M 1980 grant	1980 Population (in 1000s)	Percentage of total U.S. population
1. CA	(1)	23,669	10.4
2. NY	(2)	17,557	7.8
3. TX	(3)	14,228	6.3
4. PA	(7)	11,857	5.2
5. IL	(4)	11,418	5
6. OH	(5)	10,797	4.8
7. FL	(15)	9,740	4.3
8. MI	(11)	9,258	4
