Mountains beyond Mountains: The Quest of Dr. Paul Farmer, A Man Who Would Cure the World [NOOK Book]

by Tracy Kidder

$11.99
BN.com price

Available on NOOK devices and apps

Overview

Tracy Kidder is a winner of the Pulitzer Prize and the author of the bestsellers The Soul of a New Machine, House, Among Schoolchildren, and Home Town. He has been described by the Baltimore Sun as the “master of the non-fiction narrative.” This powerful and inspiring new book shows how one person can make a difference, as Kidder tells the true story of a gifted man who is in love with the world and has set out to do all he can to cure it.

At the center of Mountains Beyond Mountains stands Paul Farmer. Doctor, Harvard professor, renowned infectious-disease specialist, anthropologist, the recipient of a MacArthur “genius” grant, world-class Robin Hood, ...

Description

Tracy Kidder is a winner of the Pulitzer Prize and the author of the bestsellers The Soul of a New Machine, House, Among Schoolchildren, and Home Town. He has been described by the Baltimore Sun as the “master of the non-fiction narrative.” This powerful and inspiring new book shows how one person can make a difference, as Kidder tells the true story of a gifted man who is in love with the world and has set out to do all he can to cure it.

At the center of Mountains Beyond Mountains stands Paul Farmer. Doctor, Harvard professor, renowned infectious-disease specialist, anthropologist, the recipient of a MacArthur “genius” grant, world-class Robin Hood, Farmer was brought up in a bus and on a boat, and in medical school found his life’s calling: to diagnose and cure infectious diseases and to bring the life-saving tools of modern medicine to those who need them most. This magnificent book shows how radical change can be fostered in situations that seem insurmountable, and it also shows how a meaningful life can be created, as Farmer—brilliant, charismatic, charming, both a leader in international health and a doctor who finds time to make house calls in Boston and the mountains of Haiti—blasts through convention to get results.

Mountains Beyond Mountains takes us from Harvard to Haiti, Peru, Cuba, and Russia as Farmer changes minds and practices through his dedication to the philosophy that “the only real nation is humanity” - a philosophy that is embodied in the small public charity he founded, Partners in Health. He enlists the help of the Gates Foundation, George Soros, the U.N.’s...

Surviving Sudden Environmental Change

Answers from Archaeology

Edited by Jago Cooper and Payson Sheets
Publication Year: 2012

Archaeologists have long encountered evidence of natural disasters through excavation and stratigraphy. In Surviving Sudden Environmental Change, case studies examine how eight different past human communities—ranging from Arctic to equatorial regions, from tropical rainforests to desert interiors, and from deep prehistory to living memory—faced, and coped with, such dangers. Many disasters originate from a force of nature, such as an earthquake, cyclone, tsunami, volcanic eruption, drought, or flood. But that is only half of the story; decisions of people and their particular cultural lifeways are the rest. Sociocultural factors . . . show more

It is a genuine pleasure to provide this foreword to what will certainly become a key volume for the integration of the long-term perspective (longue durée) with present and future efforts to cope with hazards to the environment and human welfare. As Payson Sheets and Jago Cooper emphasize in their introduction...

Books at JSTOR

Books at JSTOR is an initiative to publish scholarly books online as part of JSTOR, one of the most well known and widely used scholarly resources.

Working together with partner publishers, libraries, and scholars, we are developing a new online offering for current and backlist books that we hope will meet the needs of these groups better than anything available in our community today.

We will:

- Provide broad use and flexible purchase models for libraries;
- Deliver a unique and valuable research experience for users; and
- Enable sustainable models for publishers and their authors in the future.

Our driving focus is to deliver great content and experiences to researchers—an objective shared by publishers and libraries. Books will be cross-searchable with the millions of journal articles and primary sources on JSTOR, linked through our vast network of citations, contextualized by more than 1 million book reviews on the platform, and provide an online research experience marked by personalized, user-driven functionality.

Benefits for Libraries

- **Great content you can rely on.** We are committed to providing the highest quality books across the humanities, sciences, and social sciences.
- **Books where your users want them.** Books will be integrated into JSTOR, one of the most heavily used and valued...
