# The University

The University of Rhode Island is a medium-sized state university in the southern part of Rhode Island in the village of Kingston. In part because of its unique location near the ocean and six miles from Narragansett Bay, the University has developed strong marine programs and has been designated one of the national Sea Grant colleges. As a land-grant college since its founding in 1892, it emphasizes preparation for earning a living and for responsible citizenship, carries on research, and takes its expertise to the community in extension programs.

The University enrolls about 11,000 students on its Kingston campus and another 3,000 in credit courses throughout the state. About half of the 11,000 undergraduates are resident students; there are about 2,500 graduate students, and a full-time teaching faculty of about 750.

**The Campus.** The University has a spacious country campus 30 miles south of Providence in the northeastern metropolitan corridor between New York and Boston. The center of campus is a quadrangle of handsome old granite buildings surrounded by other newer academic buildings, student residence halls, and fraternity and sorority houses. On the plain below Kingston Hill are gymnasiums, athletic fields, tennis courts, a freshwater pond, and agricultural fields.

In addition to the Kingston campus, the University has three other campuses. The 165-acre Narragansett Bay Campus,

six miles to the east overlooking the west passage of the Narragansett Bay, is the site of the Graduate School of Oceanography. The College of Continuing Education has a building in downtown Providence. In the western section of the state, 20 miles from Kingston, is the W. Alton Jones Campus. Its 2,300 acres of woods, fields, streams, and ponds is the site of environmental education, research, and conference facilities.

**History.** The University had its beginning in the state agricultural school chartered in 1888. The Oliver Watson farm was purchased as a site for the school, and the old farmhouse, now restored, still stands on the campus. The school became the Rhode Island College of Agriculture and Mechanic Arts in 1892, and the first class of 17 members was graduated two years later.

The Morrill Act of 1862 provided for the sale of public lands, the income from which was to be used to create at least one college in each state with the principal purpose of teaching agriculture and mechanic arts. From this grant of land comes the name land-grant applied to the national system of state colleges and, in a later adaptation of the concept, federal funds given to colleges for marine research and extension are called sea grants.

In 1909 the name of the college was changed to Rhode Island State College, and the program of study was revised and expanded. In 1951 the college became the University of Rhode Island by

act of the General Assembly. The Board of Governors for Higher Education appointed by the governor became the governing body for the University in 1981. A historical outline may be found in the appendix.

## Programs of Study

**Undergraduate Study.** All programs aim at a balance of studies of the natural and social sciences, the humanities, and professional subjects. The courses and programs of study have been approved by national accrediting agencies and are accepted for credit by other approved institutions of higher education (see Programs and Requirements).

Undergraduate students may earn the following degrees:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Fine Arts
- Bachelor of Music
- Associate in Science in dental hygiene (two-year program)
- Bachelor of General Studies (College of Continuing Education only)

All freshmen who enter the University to earn a bachelor's degree are first enrolled in University College (see page 28). Undergraduates have a wide choice of programs from which to choose a major, and the advising program in University College provides help in making this decision and in choosing appropriate courses.

The programs listed on the previous page are presented in detail in chapters describing the individual colleges. Interdepartmental curriculums and areas of interest are detailed in the chapter on University Programs and Requirements.

**Graduate Study.** Study at the graduate level leads to the master's degree in over 60 areas of study and the degree of Doctor of Philosophy in 24. Students may earn the following degrees:

- Master of Arts
- Master of Science
- Master of Business Administration
- Master of Community Planning
- Master of Library and Information Studies
- Master of Marine Affairs
- Master of Music
- Master of Public Administration
- Doctor of Pharmacy
- Doctor of Philosophy

**Graduate School.** Students holding the baccalaureate degree from this University or from another having equivalent requirements may be admitted for graduate study, providing that their credentials meet the standards set by the Graduate School and by the department in which they wish to study, and that facilities for study are available in their field of interest. Among the standards required for admission are an undergraduate average approximating B or better and satisfactory scores on a nationally administered examination. Applicants with somewhat lower undergraduate averages but high examination scores may also be admitted in individual cases.

Within each college's chapter in this bulletin, the related graduate degrees are listed. A *Graduate Bulletin*, containing complete information on graduate study and application forms, is available from the Dean of the Graduate School, The University of Rhode Island, Kingston, RI 02881-0807. Further information may be requested from the chairperson of the appropriate department. Applications are returned to the Dean of the Graduate School.

Each applicant must submit (1) completed application forms in duplicate with a \$25 nonrefundable application fee (check or money order payable to the University of Rhode Island); (2) three letters of recommendation from individuals familiar with the applicant's work, preferably in the field for which he or she is applying; (3) two copies of an official transcript sent directly from each college

or university attended; and (4) scores from the Graduate Record Examination aptitude tests. See the *Graduate School Bulletin* for those programs which require the GRE advanced tests or which require a different national test.

Applicants from foreign countries must complete the Test of English as a Foreign Language (TOEFL) with minimum scores of 500 for science students and 550 for non-science students. All inquiries from international students concerning applications, fees, housing, etc., should be directed to the Office of International Student Affairs.

The usual deadlines for receipt of applications are April 15 for September and Summer Session admission, and November 15 for February admission. See the *Graduate School Bulletin* for those programs which have earlier application deadlines.

*The Graduate School of Library and Information Studies* on the main campus offers study leading to the Master of Library and Information Studies degree. Students in undergraduate and other graduate programs may, with the approval of their adviser, enroll in library courses that relate to their studies.

*The Graduate School of Oceanography* on the Narragansett Bay Campus, six miles from Kingston, offers study leading to the Master of Science and Doctor of Philosophy degrees in the areas of biological, chemical, geological, and physical oceanography. Interested undergraduates may take a 400-level general survey course qualifying for General Education credits as well as certain 500-level courses in the oceanography core curriculum. In addition, qualified undergraduates are eligible for a 400-level, semester-long, full-time program of laboratory and field research working with faculty of the Graduate School of Oceanography. Insofar as possible, the program is tailored to the interests of the student and can range from deep-sea geology to coastal zone planning.

The 165-acre Narragansett Bay Campus has about 4,000 feet of shorefront and docking facilities for its fleet of research vessels, the largest of which is a 177-foot ocean-going research ship, *Endeavor*.

More than 20 permanent buildings house offices, laboratories, and special scientific facilities on the Bay Campus. They include the Pell Marine Science Library, a 12,000-square-foot research aquarium, a towing test tank, and a unique facility which permits controlled

ecosystems experiments. The two-megawatt research reactor of the Rhode Island Nuclear Science Center is also located there.

## Academic Services

**The University Libraries.** The University's library collection of 823,452 bound volumes and 1,001,218 volume-equivalent microforms is housed in the University Library in Kingston, at the College of Continuing Education in Providence, and in the Claiborne Pell Marine Science Library on the Narragansett Bay Campus. The latter was designated the National Sea Grant Depository in 1971.

The University Library, which holds the bulk of the collection, has open stacks which provide direct access to books, periodicals, documents, maps, microforms, and audiovisual materials. The Special Collections Department collects and maintains rare books, manuscripts, the University archives, and a variety of special interest materials. Service hours at the other libraries vary, but the University Library provides full reference, bibliographic, and circulation services during most of the 90 hours a week it is open. Terminals linked to the Academic Computer Center are available in the Library during the hours both facilities are open.

**The Academic Computer Center.** The Academic Computer Center has an IBM 4381-3 mainframe computer, two Prime 9955 and one Prime 9755 super minicomputers. Over 350 interactive terminals may be attached simultaneously to these systems. Access to Academic Computer Center facilities as well as to remote independent computers is provided by a MICOM port selector. The mainframe uses IBM's OS/MVS operating system providing batch processing as well as full function time sharing through TSO. The minicomputers provide interactive research and instructional computing using the PRIMOS operating system. Both systems have a full complement of programming languages and packages. Interactive graphic facilities using Tektronix color graphics terminals are provided. Various types of hard copy and video display terminals for interactive use or remote job entry are located on the campus in most of the science and engineering departments as well as the College of Business Administration, the College of

Continuing Education, the College of Pharmacy, the University Library, and the Graduate School of Oceanography. Two computer classrooms, each with 20 terminals, are available. The Dennis Callaghan Microcomputer Laboratory in the College of Business Administration provides public-access microcomputer facilities.

The staff develops and maintains programming systems and application programs, conducts short courses and workshops, prepares user documentation, and provides consultation on the facilities and their use. They also provide assistance in the purchase, rental, maintenance, and installation of personal computers and telecommunications equipment.

## Research and Extension

Within the state system of higher education, the University has the major responsibility for graduate education which is interdependent with a strong program of research. There are active research programs in almost all departments of the University. Support comes from foundations, commercial firms, federal and state governments, and the University. Applications for research grants are signed by the University's Coordinator of Research who is the liaison officer for the president, the business manager, the academic deans, the Research Committee and the faculty in matters pertaining to general research policy.

In addition to research conducted in the various departments, the University has established a number of research and extension programs in specially defined areas; these are described in detail in the Appendix.

The University distributes the results of its research in publications available to the public. These include a series of marine bulletins, technical reports, and Cooperative Extension and Agricultural Experiment Station bulletins.

The University also publishes through the *University Press of New England*, of which it is a member. Manuscripts originating on the seven member campuses and elsewhere are published as determined by the director and the editorial board on which the University is represented.

## The University Community

In addition to the student body, the University community is made up of faculty, administration, staff, and alumni. *The Faculty Senate* represents the faculty and was authorized in 1960 by the general faculty to conduct the business assigned to the faculty by law or by the Board of Governors for Higher Education. *The Graduate Council* is the representative body for the graduate faculty and determines the academic policies for graduate study. The office of *University Ombud* investigates complaints from students, faculty, and administrative personnel that they have been unfairly dealt with in the normal channels of administrative process. The ombudsman is a tenured member of the faculty, elected by the general faculty, and is assisted by a student nominated by the Student Senate and appointed by the president.

*The Instructional Development Program* exists to help the faculty in its teaching responsibilities. Faculty who want to increase their teaching effectiveness by improving their skills or developing new ones may work individually with IDP staff and participate in various workshops, colloquiums, and seminars on teaching.

The voice of the alumni is heard through the *Alumni Association* which includes all those who have attended the University for two semesters or more and whose class has graduated. The organization, with about 59,300 members, promotes the interests of the University and maintains the ties of alumni with their alma mater through programs, services, and the publication of a bulletin. An annual fund drive provides scholarship and other University aid.

The University receives less than half of its support from the state. The balance comes from student fees and tuition, federal grants, and auxiliary enterprises and other miscellaneous sources. *The University of Rhode Island Foundation* encourages and administers gifts from private sources to build a substantial endowment for continuing support of the University. It is concerned with the support of University activities for which adequate provision is not ordinarily made by appropriations from public funds.

**Affirmative Action and Non-Discrimination.** The University of Rhode Island prohibits discrimination on the basis of race, sex, religion, age, color, creed, national origin, handicap, or sexual

orientation, and discrimination against disabled and Vietnam era veterans in the recruitment, admission, or treatment of students, the recruitment, hiring or treatment of faculty and staff, and the operation of its activities and programs. This is in compliance with state and federal laws, including Titles VI and VII of the Civil Rights Act of 1964 as amended, Title IX of the 1972 Education Amendments to the Higher Education Act, Executive Order 11246, as amended, Sections 503/504 of the Rehabilitation Act of 1973, and Section 402 of the Vietnam Era Readjustment Assistance Act of 1974.

Most buildings on campus are architecturally available to the handicapped (see map on page 194) and provision is made to insure that no student is prevented from pursuing a course of study because of restricted access to buildings.

Inquiries concerning compliance with antidiscrimination laws should be addressed to the Special Assistant to the President for Affirmative Action, President's Office, Administration Bldg., tel. 792-2442; or to the Director, Office for Civil Rights, Department of Education, Region I. Questions regarding provisions for the handicapped should be directed to Handicapped Services in the Office of Student Life, 332 Memorial Union, tel. 792-2101.

## Programs and Requirements

Consistent with its policy of allowing the greatest latitude possible in course selection, the University offers a wide choice to fill its general education requirements and encourages students to select free electives that cross departmental and college lines. This section deals with academic requirements, regulations, and opportunities that are University-wide rather than college-related.

The University attempts to provide the successful student with a range of knowledge and skills which can, with appropriate motivation and initiative, be used in a variety of ways after graduation. Study options vary from the traditional liberal education to programs which are heavily vocationally oriented. Successful completion of any course of study at the University, however, does not guarantee that the student will find either a specific kind or level of employment.

Students interested in the career opportunities related to particular programs of study are encouraged to consult University College advisers, the appropriate department chairperson, and/or the staff of the Office of Career Services. For students who are uncertain about their career choices, the Counseling Center offers help.

The University administration may alter, abridge, or eliminate courses and programs of study. While every effort is made to keep this catalog current, not all courses and programs of study listed may be available at the time of student's matriculation. Similarly, course and pro-

gram requirements may be changed from time to time. In all cases every effort will be made to accommodate individual students whose exceptional circumstances may make it difficult or impossible to meet the changed requirements. Changes in the academic calendar may also be made when deemed to be in the best interest of the institution.

**Accreditation.** The courses and programs of study offered by the University of Rhode Island have been approved by national accrediting agencies and are accepted for credit toward college degrees by other approved institutions of higher learning. The national accrediting agencies which have approved the quality of the course offerings of the University of Rhode Island include the American Association of Universities, the American Assembly of Collegiate Schools of Business, the American Chemical Society, the American Council on Pharmaceutical Education, the American Dental Association (Council on Dental Education), the American Psychological Association, the American Society of Journalism School Administrators, the American Speech-Language-Hearing Association, the Accreditation Board for Engineering and Technology, the National Association of Schools of Music, the National League for Nursing, the New England Association of Colleges and Secondary Schools, and the State University of New York.

The University is also an approved member institution of the American Association of University Women, the

Council of Graduate Schools in the United States, the North American Association of Summer Sessions, and the National University Extension Association.

### General Education Requirements

**These requirements apply to entering freshmen beginning in the fall of 1981, and transfer students who entered in the fall of 1981 with fewer than 16 transferrable credits. Students who entered prior to fall 1981 must follow the General Education requirements outlined in the Undergraduate Bulletin for 1980-81 or the year in which they matriculated at the University. Students returning after an absence of more than eight years must follow the current General Education requirements.**

The University of Rhode Island believes that all undergraduate students, regardless of their degree program, need experience in the study of fundamentals which builds upon the student's previous education and continues to be advanced through the undergraduate years and beyond. Thus, all bachelor's degree students follow the same University-wide General Education requirements.

General Education is that part of the undergraduate curriculum in which students explore a broad spectrum of intellectual subjects, approaches, and per-

spectives. The General Education component of the curriculum aims to help accomplish these three goals: (1) develop further the essential English communication abilities upon which advanced studies depend; (2) offer experience in five broad subject areas: fine arts and literature, letters, mathematics, natural sciences, and social sciences; and (3) expose the student to a foreign language or culture.

The General Education program is divided into the following components which correspond to these goals:

**English Communication.** 6 credits in English communication, at least 3 of which must be in a course designed specifically to improve written communication skills;

**Fine Arts and Literature.** 6 credits in courses related to historical and critical study of the arts and literature as well as creative activity;

**Foreign Language or Culture.** 6 credits or the equivalent in a foreign language or foreign culture;

**Letters.** 6 credits in courses which address fundamental questions about the human condition, human values, and ways of communicating these values;

**Mathematics.** 3 credits in a course specifically designed to provide training in college-level quantitative skills and their application;

**Natural Sciences.** 6 credits in courses in physical, chemical or biological sciences;

**Social Sciences.** 6 credits in courses related to the study of the individual (development and behavior) and society.

*Specific courses which may be used to meet these requirements are listed in the following groups:*

Honors students may receive General Education credit for honors sections of courses which have been approved for General Education credit.

Transfer students may receive General Education credit for courses taken at other institutions as long as such credits are in courses equivalent to courses given General Education credit at the University of Rhode Island.

**Students must meet the curricular requirements of the colleges in which they plan to earn their degrees. Some colleges require that students select specific courses from the above lists. Therefore, students must refer to the requirements specified for their programs (pages 29-78).**

In the Colleges of Arts and Sciences and Human Science and Services and for the Bachelor of General Studies, credits within a student's own major may not be counted towards General Education requirements in Fine Arts and Literature,

<sup>1</sup>Students who fulfill this requirement through an examination cannot earn course credit for graduation. Students who earn less than 6 credits in fulfilling the requirement should apply credits to the elective or major areas.

Letters, Natural Sciences or Social Sciences. In other colleges, credits within a student's professional college may not be counted towards any General Education requirements. However, courses which serve as prerequisites for a major may be used to fulfill the General Education requirement.

### Other Academic Requirements

Certain basic courses are required in many curriculums for transfer from University College into the degree-granting colleges at the junior-year level. These are listed in the individual colleges' curriculums.

The responsibility for meeting all course and credit requirements for the degree must rest with each individual student.

Students who desire to accelerate their programs and receive credit for courses taken at other institutions or during Summer Session or in the College of Continuing Education must have prior approval from their academic deans.

### Interdepartmental Study

Students are encouraged to develop interests across departmental lines. A number of such programs are available both as areas of interest or minors, and as degree programs. The interdepartmental minors are listed below; for interdepartmental majors in Comparative Literature Studies, Consumer Affairs, Human Science and Services, and Women's Studies refer to the index at the back of this catalog.

#### African and Afro-American Studies.

Students who declare African and Afro-American Studies as a minor are required to take two core courses: AAF 201 and 202 (6 credits). In addition, students select four electives (12 credits) from the following: AAF 250, 360, 390, 410, 474; APG 250, 313; ECN 404; ENG 247, 248, 360, 362, 363, 364, 474; HIS 150, 384, 388; PSC 408, 410; and SPE 333. Students who want to use other courses that have as their central focus some aspect of the black experience may do so with permission from the program director.

**Comparative Literature Studies.** Students who declare Comparative Literature Studies as a minor must earn 18 credits distributed as follows: 6 credits in

CLS at the 200 level or above; 12 credits from literature courses in Comparative Literature Studies, English, or Languages, of which 6 credits must be in one national literature either in the original language or in translation. Students majoring in English or Languages may not count courses in their major toward this minor. For a description of the degree program in Comparative Literature Studies see page 35.

**Consumer Affairs.** Students who declare a minor in consumer affairs are required to complete 18 credits in selected coursework. Suggested courses might include: CNS 220, 320, 350, 420, 422, and 457, as well as courses in political science, marketing, and business law. For a major in consumer affairs see page 65.

**Gerontology (The Study of Human Aging).** The Program in Gerontology is a University-wide program which promotes study, teaching, and research in aging throughout the University. It also maintains relationships with state and local agencies which serve the older population of Rhode Island. This affords opportunities for research, internships, and field experiences to students interested in the problems of aging.

The Adulthood and Aging option within the Bachelor of Science degree in Human Science and Services is limited to 15 students a year. There is also opportunity for students taking their major studies in a number of areas to do a less specialized study in aging by declaring a minor in gerontology. This must be done not later than the first semester of the senior year. It requires 18 or more credits in aging-related studies approved by the Program in Gerontology and the college in which the student is registered.

HCF 220 (Gerontology: Theory and Application) is required for either specialization. It also meets a social science requirement in General Education. Undergraduate gerontology courses include HCF 221, 420, 422, 431; CNS 342, DHY 462, FSN 307, RCR 416 and SOC 438. Also relevant are ZOO 242, HCF 380, 421, 450, NUR 346, and the University Year for Action.

It is important to take courses which fulfill degree requirements from the beginning. Students who wish to specialize in aging are advised to contact the Program in Gerontology early in their university studies.

**New England Studies.** Students who declare New England Studies as a minor must take either NES 200 or 300 and elect at least one course from each of the following four categories: (1) Cultural Patterns—PSC 221, APG 317; ENG 337, (2) Aesthetic Dimensions—ART 263, ENG 347; 340, (3) Historical Dimensions—HIS 335, 346, 362; (4) Physical Dimensions—BOT 323, 418; NRS 301, 302, GEL 101. Permission may be obtained from the Committee for New England Studies to use any rotating topics course, seminar, etc., whose focus is on some aspect of New England as a substitute for any of the above courses.

**Special Populations.** This interdepartmental minor provides students the opportunity to explore the theory and gain practical experience through working with people who have special needs. This includes people who are handicapped (physically, emotionally, mentally, or educationally) or are different (socio-economically, behaviorally, culturally) and as a result have special needs.

A minimum of 18 credits may be earned by taking the required courses (NUR 101, HCF 200 or PSY 232, PSY 442), a minimum of 3 credits in supervised field experience, and a minimum of 7 credits of selected electives.

Courses are chosen in consultation with an adviser from one of the participating departments: Education; Food Science and Technology; Human Development, Counseling and Family Studies; Nursing; Physical Education, Health and Recreation; Psychology; Sociology; Speech Communication; Textiles, Fashion Merchandising and Design; Theatre. The College of Human Science and Services administers the program and interested students should contact the program head, Jeannette E. Crooker, 130 Tootell Center.

**Textile Marketing.** This undergraduate interdepartmental curriculum may be pursued through the College of Human Science and Services (Department of Textiles, Fashion Merchandising and Design) or through the College of Business Administration (Department of Marketing). The programs are: Textile Marketing or Marketing-Textiles.

Textile marketing managers are responsible for planning and directing the flow of textile products from the manufacturer to the consumer. The major, which provides a strong background in both tex-

tiles and marketing, is designed to give students the opportunity to explore the areas of styling and design, manufacturing, market research, consumer behavior, advertising, promotion, fashion, and sales. The specific requirements of the curriculum may be found on pages 50 and 68.

**Urban Affairs.** The undergraduate program in Urban Affairs consists of five different interdepartmental degree curriculums: three in the College of Arts and Sciences and two in professional colleges. They aim to provide students with a general understanding of contemporary urban society and the opportunity to pursue specialized study of urban problems and prospects from the perspective of varied disciplines, whatever may be the students' interests and career objectives.

The five majors are: (1) Urban Social Processes, (2) Policy Formation, and (3) Spatial Development, in the College of Arts and Sciences; (4) Home Economics in the Urban Environment, in the College of Human Science and Services, and (5) Resource Development in the Urban Environment, in the College of Resource Development.

The curriculum in each major consists of common core courses and specialization courses. The common core (18 credits) is made up of the following requirements: URB 210 and URB 498 or 499 (6 cr.); three credits selected from CSC 201, EST 220, 408 or 409, PSY 300, SOC 301; and 9 credits selected from CPL 410, ECN 402, SOC 214, PSC 460, HIS 363. The specialization courses are detailed in the appropriate college section in this bulletin.

The Urban Affairs Program is coordinating its offerings with the Department of Social Sciences at the Community College of Rhode Island. Students at the junior college are encouraged to consult with their advisers if they wish to transfer to any one of the majors in the College of Arts and Sciences.

The Urban Affairs Program Coordinating Committee includes faculty members from departments throughout the University and supervises the operation of the program. With the endorsement of the faculty of the college concerned, the committee certifies completion of the major requirements for the appropriate undergraduate degree. A member of the committee serves as adviser for each of the five majors and provides interested students with information.

## Preprofessional Preparation

Competition for places in graduate professional schools is keen, and a superior academic record throughout college is necessary for admission to these schools. Since requirements for the professional schools vary in their "essential" and "recommended" subjects, the student should consult the catalog of the professional school and then plan his or her undergraduate program accordingly. Those seeking careers as social workers may enroll as majors in sociology, including in their curriculum the social welfare courses. A basic foundation for graduate study, whether directed toward college teaching or research careers, can be provided through any of the liberal arts or science majors. The bachelor of arts curriculum provides specific majors for those planning to become journalists or public school teachers.

**Prelaw Studies.** For students who plan professional study of law, guidance and program advice are provided by departmental advisers assigned in University College and by major advisers within various departments and colleges.

Students interested in law school should consult the *Prelaw Handbook*, prepared by the Association of American Law Schools and the Law School Admissions Council. The association finds it inappropriate, given the wide range of a lawyer's tasks, to prescribe either a set of prerequisite courses for prelaw students or preferred major departments. Rather, it recommends that students choose their majors dependent upon their own individual intellectual interests and upon "the quality of undergraduate education" provided by various departments and colleges. "Shortly stated, what the law schools seek in their entering students is . . . accomplishment in understanding, the capacity to think for themselves, and the ability to express their thoughts with clarity and force." The association emphasizes that "the development of these fundamental capacities is not the monopoly of any one subject-matter area, department or division."

**Premedical Studies.** For students who plan professional study in medicine, guidance and program coordination is provided by the premedical adviser and the URI Premedical, Predental, Preveterinary Advisory Committee, known as The Premedical Advisory Committee (Rm. A123, Biological Sciences Bldg.).

The student should consult the prerequisites for professional schools to which he or she may expect to apply for admission. These are listed in *Medical School Admission Requirements*, published annually by the Association of American Medical Colleges. Copies of this reference and the requirements of certain medical schools are available in the Premedical Office, A123, Biological Sciences Bldg.

Medical schools generally require at least a 3.3 grade point average and high scores on the required Medical College Admission Test (MCAT), taken preferably in the spring semester of the third undergraduate year.

From an evaluation of the distribution of scores of the test, it is reasonable to assume that successful applicants to medical schools will rank in the intervals with a mean of 10 or above in the the 15-interval scoring system. Similar results are expected on the Dental and Veterinary Medical School Administration tests although their scoring systems differ.

All candidates must have personal interviews with the Premedical, Predental, Preveterinary Advisory Committee. Normally these interviews will take place during the spring semester of the third undergraduate year.

Since only about one third of each 100 applicants to medical schools are admitted, it is wise to plan for an alternative career.

**The University of Rhode Island-Brown University Early Identification Program for Rhode Island Residents.** This is a plan for the early identification and acceptance into the program in medicine at Brown University of highly motivated, exceptionally qualified and interested students at the University of Rhode Island and at Providence College. The plan offers virtual assurance of a position in Brown's program in medicine, so long as the student completes the required courses and maintains a good academic performance. The program is designed to encourage a few of the most highly motivated students, who are Rhode Island residents, to make an early commitment to the study of medicine at Brown by providing them with acceptance assurance similar to that afforded students entering Brown's optional medical education program directly from high school.

URI students with cumulative averages of 3.4 and above are interviewed and evaluated by the URI Premedical, Predental, Preveterinary Advisory Committee after the completion of their fresh-

man year. Certain of these students are then recommended to Brown by the URI Premedical Advisory Committee on the basis of an *excellent academic record, exceptional promise* as a premedical student, *apparent suitability* for the profession of medicine, *Rhode Island residency* and a desire to study medicine at Brown. During the sophomore year, the nominated students are interviewed and their applications are evaluated for admission to the program.

Upon acceptance, they have the same status as their Brown counterparts, while continuing their studies at the University of Rhode Island. Like the Brown students, they are free to major in the arts or humanities, if they wish, as long as they complete the required premedical courses. As undergraduates they are also invited to take one or two of their premedical courses on the Brown campus with their future classmates, and are invited to colloquiums and various social events sponsored by the Brown Medical Student Society.

After the students in the Early Identification Program have been graduated from URI, at the point of entering the first year of the program in medicine at Brown, they go through the same promotions process required of all medical education program students. Academic performance, interviews with members of the Admissions Committee, Medical College Admissions Test (MCAT) scores, and faculty recommendations are all reviewed. Upon promotion they become full-fledged first-year medical students at Brown University.

Rhode Island resident students interested in this program are urged to register with the secretary of the Premedical Advisory Committee during the spring semester of their freshman year or early during the fall semester of the second year at URI.

**Predental Studies.** The recommendations for premedical preparation also apply to predental students, who are counseled by the same advisory committee.

The student should consult the course requirements for each dental school to which he or she may expect to apply for admission. These are listed in *Admissions Requirements of American Dental Schools*, published annually by the American Association of Dental Schools.

The Dental Admissions Test (DAT) is required, and normally this test is taken in the spring of the third undergraduate year. Competition for admission into

dental school is as keen as that experienced by premedical students. Thus, an excellent academic record, along with a 5 or 6 in each section of the test, usually is required.

Each candidate must have personal interviews with the URI Premedical, Pre-dental, Preveterinary Advisory Committee. Normally these interviews will 431 and 432, each with the associated laboratory.

**Biology.** At least 11 credits, including *general animal biology*, embryology, physiology or anatomy, genetics: ZOO 111, 316, 321, or 345, BOT 352.

**Physics.** At least 8 credits including PHY 111, 112.

**Mathematics.** At least 6 to 9 credits, through calculus, MTH 141, 142.

**English and Communications.** At least 12 credits, including WRT 101, 201 and a year of literature.

**Modern Foreign Language or Greek or Latin.** Through the intermediate level.

**Social and Behavioral Studies.** At least 6 credits. Psychology: PSY 113. Sociology: SOC 100.

**Preveterinary Studies.** Students who are interested in preparing for a professional career in veterinary medicine are counseled by the URI Premedical, Pre-dental, Preveterinary Advisory Committee. Requirements for admission into the study of veterinary medicine vary and the catalogs of veterinary schools should be consulted for specific requirements early in a student's undergraduate years. Many schools require the Veterinary Aptitude Test (VAT) or the Graduate Record Exam (GRE). Ordinarily, either test should be taken in the spring semester of the third undergraduate year. Moreover, some experience in the animal sciences is expected by some veterinary medical schools.

A preveterinary student may choose to follow the Bachelor of Science curriculum in Animal Science (described elsewhere in this *Bulletin*), or he or she could be guided by the course of study recommended above for premedical and pre-dental students.

Each candidate must have personal interviews with the URI Premedical, Pre-dental, Preveterinary Advisory Committee. Normally these interviews will take place during the spring semester of the

third undergraduate year or fall semester of the senior year.

Competition for admission into schools of veterinary medicine is extraordinary. Therefore, evidence of high motivation and an outstanding academic record are essential.

## Special Academic Opportunities

**Honors Program.** The University Honors Program offers bright and motivated students opportunities to broaden their intellectual development and to strengthen their preparation in major fields of study. The program consists of courses in analytical thinking skills which prepare academically talented students to get the most from classes throughout their undergraduate years, a colloquium which brings distinguished authorities to campus from across the nation, special tutorials in major concentrations of study, and independent research projects under the guidance of a faculty sponsor. Honors courses on the 100 and 200 level treat general topics and usually count for General Education credit in particular divisions. Those on the 300 and 400 level are more specialized and often are used to fulfill the requirements of a major.

Eligibility standards are established yearly by the Honors Program and Visiting Scholars Committee. Students may take honors work if they meet the following standards: freshmen must have graduated in the upper 10 percent of their high school class or must submit a letter of recommendation from their high school principal or guidance counselor; sophomores, juniors, and seniors must have earned at least a 3.2 cumulative grade point average. (Under special circumstances, these eligibility requirements may be modified with the permission of the Honors Program director.)

Eligible students may participate in the Honors Program in one of two ways: they may take honors courses on an occasional basis, registering for any number or pattern of courses which interest them; or they may do honors work on a regular basis, meeting the specific requirements to receive the transcript notation, "Completed the University Honors Program." In the latter case, a student must begin honors work no later than the beginning of the junior year and must complete a minimum of 15 honors course credits which meet the following requirements: 1) 6 credits in 100- and 200-level

honors courses including at least three credits of the colloquium; 2) 9 credits in 300- and 400-level honors courses including three credits of a tutorial and six credits of the honors project or special seminar; and 3) a 3.2 grade average for honors courses and a 3.2 cumulative grade point average.

See page 109 for a list of honors courses.

**National Student Exchange Program.** The National Student Exchange Program offers University of Rhode Island students the opportunity to study at more than 75 participating state colleges and universities in 39 states at in-state rates or URI tuition while maintaining their status as URI students. NSE offers the opportunity to explore new geographical areas, experience academic diversity, and study under different educational and social circumstances in various parts of the United States. Financial aid is available to participants in this program. For further information, contact the National Student Exchange Coordinator, University College.

**New England Land-Grant Student Exchange Program.** Students with special academic interests may now take advantage of the talent and resources available at the state universities of the region without having to become a degree candidate at another institution. Under a cooperative agreement, URI students can study for one or two semesters at the other New England land-grant institutions if they wish to take a course, a sequence of courses, or part of a program which is not available at URI. Students participating in this program pay their normal URI tuition and fees and maintain their status as URI students. Advisers or members of the University College staff have more information about this program and its requirements.

**Ocean Studies.** Undergraduates are encouraged to explore opportunities on the Narragansett Bay Campus for active participation in the oceanographic sciences. Juniors and seniors may spend an entire semester at the Bay Campus pursuing their individual marine interests, for which they receive full academic credits. They work as part of a research team in the laboratory and in the field under the direct guidance of the Graduate School of Oceanography faculty.

**Study Abroad.** The Study Abroad Office, located in University College, maintains information about overseas study programs and helps students make arrangements for foreign study. The Office also assists in the evaluation of credits from study abroad. The University of Rhode Island sponsors exchange programs with universities in England, France, Germany, Italy, Spain, and Japan which make study abroad available to our students for little or no cost beyond the normal URI tuition and fees. The University also participates in the New England-Quebec exchange program enabling our students to study at any one of the ten English and French-speaking universities in Quebec on an exchange basis. Study abroad programs at the other New England land-grant universities and at institutions participating in the National Student Exchange Program may also be open to our students. The Study Abroad coordinator helps students who wish to participate in these or other approved academic programs to choose the appropriate programs and to handle the procedures for obtaining prior approval for courses to be taken abroad and for retaining matriculated status at the University of Rhode Island during their absence from campus.

**University Year for Action.** The UYA Internship Program, administered by the Office of Internships and Field Experiences, is an academic program that provides undergraduate students with opportunities for professional development and field study. It is especially designed for the motivated student who wishes to apply classroom learning to a field experience in a career-related setting. Students from any undergraduate curriculum may apply for up to 15 credits in free electives.

Students work full time (32 hours a week) under the supervision of qualified professionals in carefully selected settings. A weekly seminar brings interns together to discuss issues that emerge during the internship. The program offers students a choice of more than 280 placements that include the categories of law, counseling, advocacy, administration, public relations, communications, alternative education, health, nutrition, marketing, and art.

To apply, students must have a minimum QPA of 2.5 and junior or senior standing.

## Dean's List

Undergraduate students who have achieved certain levels of academic excellence in any semester are honored at the end of that semester by inclusion of their names on the Dean's List. The Registrar will publish lists of students who have attained the required quality point average.

A full-time student may qualify for the Dean's List if he or she has completed 12 or more credits for letter grades and achieved a 3.3 quality point average. A part-time student may qualify for the Dean's List if he or she has completed an accumulation of 12 or more credits for letter grades and achieved a 3.3 quality point average.

## Pass-Fail Grading Option

This plan encourages undergraduate matriculated students to increase their intellectual breadth and discover aptitudes in new areas of knowledge. A student above the freshman level who is not on probation may register under this plan for courses considered by the college in which he or she is enrolled as free, unattached electives. Courses that are stipulated in the student's curriculum as degree requirements, General Education requirements, and military science courses may not be included.

A student choosing to take a course under this plan must notify his or her adviser, academic dean and the Office of the Registrar in writing, prior to the end of the add period of each semester. The instructor is not informed.

Grades will be P (pass) or F (fail). The P grade is credited toward degree requirements, but not included in the quality point average. The F grade is calculated in the same manner as any other failure. If a student has selected the P/F option for a course, then decides not to use the P/F option, he or she may change by notifying the Registrar before the last date for dropping courses.

A student may elect not more than three P/F courses each semester and not more than two P/F courses during a summer.

## Army Reserve Officers Training Corps (ROTC)

Army Reserve Officer Training (ROTC) is offered by the University and is available to all male and female students. Physically qualified American citizens who complete the entire four-year program will be commissioned in the United States Army. Delayed entry on active service for the purpose of graduate school is available. Military science is designed to complement other instruction offered at the University. Emphasis throughout is on the development of individual leadership abilities and preparation of the student for future important leadership roles in the Army. Four variations of ROTC are available:

The four-year program, during which students participate in required military science courses and activities. Attendance at a six-week advanced training camp is required between the third and fourth year.

The two-year ROTC program, which begins with a six-week Camp Challenge summer training session (with pay). Upon successful completion of Camp Challenge, the student enters the third year of ROTC and will attend advanced camp during the next summer. As an alternative, an enlisted member of the Army National Guard or Army Reserve who has completed basic training can qualify for the two-year ROTC Simultaneous Membership Program.

The third variation consists of a three-year program for students who wish to enter the ROTC program during their sophomore year or who intend to complete their academic studies in three years. This program compresses the requirements for the basic course into one year.

All Basic Course (freshman and sophomore) military science courses are an excellent medium for personal enrichment. Significant scholarship opportunities are available.

## Grades and Points

Student grades are reported as A, A-, B+, B, B-, C+, C, C-, D+, D, and F. The unqualified letter grades represent the following standing: A, superior; B, good; C, fair; D, low grade, passing; F, failure; S, satisfactory; U, unsatisfactory.

Grades are given quality point values as follows: A, 4.0 points; A-, 3.7 points;

B+, 3.3 points; B, 3.0 points; B-, 2.7 points; C+, 2.3 points; C, 2.0 points; C-, 1.7 points; D, 1.0 points; F and U, 0 points. P and S are not calculated in the quality point average.

A grade may be reported as "incomplete" only when coursework has been passing but has not been completed due to illness or another reason which in the opinion of the instructor justifies the report of incomplete. Incomplete grades that are not removed from an undergraduate student's record by the following mid-semester will remain on the student's permanent record.

Making up failures in elective courses is not required, but making up failures in required courses is. The course should be repeated when next offered. No limit is placed on the number of times a course may be repeated, but the credit requirement for graduation is increased by the number of credits repeated.

Under specified conditions and with the approval of the academic dean, freshmen and transfer students in their first semester may repeat a course in which a grade of C- or lower was earned. The grade earned in the second attempt will be calculated in their quality point average. All grades earned for a given course will remain on the student's permanent academic record.

Certain courses do not lend themselves to precise grading and for these courses, only S (satisfactory) or U (unsatisfactory) shall be given to all students enrolled. S/U courses shall be labeled as such in the University catalogs and bulletins. S/U courses are not counted as courses taken under the Pass-Fail Option.

**Probation and Dismissal.** A student shall be placed on scholastic probation if the student's overall cumulative scholastic average falls below 2.0. For purposes of determining probation and dismissal of part-time students, scholastic standing committees shall consider an accumulation of 12 credits as the minimum standard for one semester's work.

A student shall be dismissed for scholastic reasons when he or she has a deficiency of eight or more quality points below a 2.0 average after being on probation the previous semester. A student on probation for the second successive semester who has a deficiency of eight or fewer quality points below a 2.0 average will continue on probation. Students who obtain less than a 1.0 average on their first semester shall be dismissed automatically.

A student subject to dismissal shall be so notified by the dean after which he or she shall have five days to file a written appeal with the dean.

Students are expected to be honest in all academic work. Instructors shall have the explicit duty to take action in known cases of cheating or plagiarism. For details consult the *University Manual*, sections 8.27.10-8.27.20.

### Leave of Absence

Sometimes students are forced to take a semester or two off by circumstances beyond their control. Others find they simply need a break from studying. For these students taking a leave of absence might be wise. Students who have an approved leave of absence for a semester or a year may pre-register for the semester in which they plan to return, and they do not have to apply for readmission. Undergraduate students may apply for a leave of absence through the Office of the Registrar.

### Withdrawal from College

A student who wishes to withdraw from college prior to the end of the semester or Summer Session term shall do so according to procedures outlined in the semester's *Schedule of Courses*. If the withdrawal process is completed satisfactorily and the student has cleared all financial obligations to the University, the date of withdrawal shall be noted on the student's permanent academic record. No grades for the current semester shall be recorded. Students who withdraw from the University after the last day of classes but before a semester ends, shall be graded in all courses for which they are officially registered. If a student withdraws from the University after mid-semester, grades shall be recorded for any course which has an officially specified completion date prior to the date of withdrawal.

A student who withdraws from the University after mid-semester and who seeks readmission for the next semester shall be readmitted only upon approval of the Scholastic Standing Committee for the college or school in which registration is desired.

## Undergraduate Graduation Requirements

To graduate, a student must have completed the work for, and must have achieved the minimum quality point average established by, the curriculum in which he or she is enrolled and must have earned at least a 2.0 quality point average.

The work of the senior year shall be taken at the University of Rhode Island. Exceptions must be approved by the faculty of the college in which the student is enrolled.

Any student who has met the requirements for a second bachelor's degree and has completed an additional 30 hours of credit beyond the minimum requirements for the initial degree may be granted two bachelor's degrees.

Any student who has met the requirements for two separate majors within any single bachelor's curriculum has earned a double major and may have both fields listed on his or her permanent record.

Students who complete at least 60 credits of their work at the University are eligible to graduate with distinction. Those who attain a cumulative quality point average at the time of graduation of at least 3.3 shall be recognized as graduating "with distinction." Those who achieve a quality point average of at least 3.5 shall graduate "with high distinction" and those who attain a quality point average of at least 3.7 "with highest distinction."

## University Manual

University regulations governing matters such as grading, probation and dismissal, academic integrity, withdrawal from college, and graduation requirements are fully explained in the *University Manual*. Copies of the *University Manual* are available for reference in the Library and in the deans' offices.

# Admission and Registration

## Admission to the University

Ideally, admission to the University is a process of mutual selection. It is hoped that those students who seek admission will also be the kind of students sought by the University: those who will benefit from the educational opportunities afforded by the University, those who will be stimulated and challenged by doing undergraduate work in an environment that includes scholarly research and graduate study; those who are committed to becoming contributing members of the University. Students are selected for enrollment primarily on the basis of their academic competence and without regard to age, race, religion, color, sex, creed, national origin, handicap, or sexual orientation.

The University has been authorized under federal law to enroll non-immigrant alien students.

All freshmen pursuing four- or five-year degree programs are admitted to University College, a college of advising and academic student services. Many students who are undecided about their choice of major use the year or two in which they remain in University College to explore their interests before declaring a major. Students who have identified their prospective majors are assigned faculty advisers in that area and follow their chosen course of study while in University College. The University evaluates applicants' credentials in terms of their stated prospective majors and the space available in professional programs with limited enrollments.

**Admission Requirements.** Admission to the University is competitive, and primary emphasis in the review process is placed on a student's high school record, the quality of courses taken, and grades earned. Performance on standardized tests (SAT or ACT), extracurricular activities, alumni tradition, and letters of recommendation are considered. Of the entering freshmen in the fall of 1986, two-thirds ranked in the top 40 percent of their high school class. The average SAT scores were Verbal 455 and Math 500, both well above the national average.

SAT or ACT tests are required for freshman candidates, but transfer students from another college are assessed mainly on their earlier college records. Each candidate is given individual consideration; however, a minimum of 18 units of college preparatory work are expected: 4 units in English, 3 in algebra and plane geometry, 2 in physical or natural science, 2 in history or social science, 2 in foreign language, and additional units that meet the requirements of the college in which the candidate expects to study for his or her major. All students are encouraged to select their additional units from the arts, humanities and foreign languages, mathematics, social sciences, or laboratory sciences. Candidates for the Colleges of Business Administration and Engineering, and majors in chemistry, computer science, and physics, must complete 4 units of mathematics (trigonometry). Candidates for the College of Engineering should select chemistry and physics. Applicants to the

Bachelor of Music degree program must audition and must contact the Department of Music for specific requirements.

**Application Procedures.** Students should discuss their plans for study at the University with their academic counselors as early as possible to establish realistic goals and program selections. Admissions counselors at the University will be glad to correspond with students on individual problems. Requests for application forms and information should be directed to the Office of Admissions, The University of Rhode Island, Kingston, RI 02881-0807.

Inquiries from international students concerning non-immigrant visas, housing, etc., should be sent to the Office of International Student Services, Lower College Road, The University of Rhode Island.

Students are enrolled at the beginning of the fall semester in September and at the beginning of the spring semester in January. High school seniors are urged to submit applications early in their final year of preparatory study as the University subscribes to a "rolling" admissions policy, reviewing folders as soon as one set of senior-year grades is available and complete credentials are submitted. Closing date for fall term applications is March 1, and most decisions are reported in February, March and April. Closing date for spring term application is December 1. For international students the closing date is November 1.

*Early decision* is made on the application of any freshman candidate who has

established a superior academic record, who has achieved above-average scores on the CEEB Scholastic Aptitude Test, and whose potential as a superior student is reflected in the secondary school endorsement. Applications which meet these qualifications and which are clearly labeled "Early Decision Candidate" are considered on a priority basis if filed prior to November 1.

**Entrance Tests.** All freshman candidates for admission are required to take the Scholastic Aptitude Test (ACT). Applicants who have been away from formal studies for at least three years should contact the Admissions Office concerning entrance requirements.

Applicants are encouraged to take the SAT as early as possible in their senior year; delay beyond January date materially reduces a candidate's prospects for a timely decision. Full information concerning this test may be obtained from local high schools or by writing to CEEB Headquarters at P.O. Box 592, Princeton, New Jersey 08540.

International students who are not immigrants must take an English proficiency test administered by the American Consulate or the Test of English as a Foreign Language (TOEFL) administered by the Educational Testing Service, Princeton, New Jersey 08540, U.S.A. Additionally, the Scholastic Aptitude Test is required as outlined above. English placement tests are required of all incoming undergraduate students.

**Interviews.** Personal interviews are not part of the normal admissions procedure. It would be impossible for the admissions staff to interview all candidates, and individual conferences are arranged only if a unique problem requires personal discussion.

*Group conferences* are scheduled several afternoons each week during the year. Students and their parents are invited to participate in these meetings to get acquainted with the University. Visitors are requested to phone ahead (401-792-2164) to be scheduled for these meetings.

**Campus Tours.** The University provides daily tours of the campus for visitors, Monday through Saturday, while classes are in session. The tours are conducted by students. Group tours for high schools and other organizations may also be arranged. For more information about this service, phone (401) 792-2164.

Tours of the Narragansett Bay Campus and the Graduate School of Oceanography may also be arranged. Phone (401) 792-6211 for details.

**Early Enrollment (Early Admission).** Students who have completed their junior year of high school with superior records are eligible for early admission. A part-time study program may be arranged for students who wish to begin college study in their senior year while continuing their high school work. A full-time program may be arranged for those recommended for college admission without completion of the standard preparatory program.

Early admission students would normally have completed: 3 years of English, 3 years of mathematics, 2 years of foreign language, 2-3 years of social studies or history. Students should be academically competitive within their high school class, have corresponding scores on the College Board PSAT, SAT or equivalent tests, and the endorsement of their school.

Interested persons should plan with their high school counselor early in their junior (11th) year and direct further inquiries to the University Admissions Office.

### Advanced Standing

*Advanced placement for freshmen* is granted to students who have completed college-level courses in a high school participating in the Advanced Placement Program and have passed with a grade of 3 or better the CEEB Advanced Placement Examination in the subject area for which advanced placement is sought. In addition, students also may take proficiency examinations administered by departments of the University to be granted advanced placement. Entrance with advanced standing can accelerate the completion of degree requirements, or it can enrich the undergraduate program with greater scope for elective or advanced courses.

*Transfer students* who have attended, or are attending another college or university, are required to have official transcripts sent directly from the institution, whether or not they expect or desire credit for such work; their high school record must also be submitted. Most successful applicants offer a cumulative grade point average above 2.4. Certain programs may require a higher grade point average or specific prerequisite courses. Candidates accepted with transfer credit are classified as freshmen, sophomores,

juniors, or seniors according to the number of credits accepted for transfer. The transfer of General Education credits is described on page 9.

**Proficiency Examinations.** Students who show evidence of advanced knowledge or who have taken "enriched" programs in high schools may be exempt from certain courses and requirements if they take departmental proficiency examinations. A student who successfully passes such an examination earns credits as well as exemption from the course.

Upperclassmen interested in taking these exams should contact their academic dean. New students may obtain further information during the orientation or from their assigned adviser in University College.

**College Level Examination Program.** *CLEP General Examinations.* Students who have not been pursuing formal studies for at least three years may take the CLEP General Examinations to demonstrate academically measurable learning acquired in non-traditional ways. URI students must secure prior approval from their academic dean to take the exams for credit. Transfer students may receive credit from CLEP General Examinations taken prior to enrollment at URI provided that their scores meet URI standards and provided that their academic dean judges that the CLEP credit does not duplicate other transfer credit.

CLEP General Examinations may be taken in the following areas (URI credits for these are shown in parentheses):

	<i>Minimum score</i>
English Composition (English composition elective 3 credits <sup>1</sup> )	450
Fine Arts (Fine Arts elective, 3 cr.)	46
Literature (Literature elective, 3 cr.)	45
Biological Sciences (Natural science elective, 3 cr.)	46
Physical Sciences (Physical science elective, 3 cr.)	44
Social Sciences (Social science elective, 3 cr.)	46
History (History elective, 3 cr.)	45
Mathematics (no credit)	

<sup>1</sup>Three additional credits may be earned by completing a writing sample test administered by the College Writing Program.

**CLEP Subject Examinations.** Academic departments may use CLEP Subject Examinations as proficiency exams to test students' mastery of the subjects taught by the department. A department which judges a CLEP Subject Examination to be a satisfactory proficiency exam decides what credit should be awarded within the department to students who pass the exam, establishes the minimum score for credit, decides whether students must answer the optional essay questions supplied by CLEP, and decides whether students must pass a supplementary department test, such as a lab exam. The following CLEP Subject Examinations are accepted by departments as proficiency examinations.

Subject (URI credit)	Minimum raw score	Minimum percentile
American Government (PSC 113)	47	38th
American History <sup>2</sup> (HIS 141, 142)	45	40th

Western Civilization II <sup>2</sup> (100-level HIS elective)	47	52nd

**Health Questionnaire.** Every newly entering student is provided a health questionnaire from University Health Services. It is expected that these questionnaires will be completed and returned

promptly. This questionnaire provides University Health Services with basic information prior to the student's arrival on campus. Questionnaires are distributed only after admission to the University and therefore play no part in the process of acceptance to the University.

In accordance with Section 16-38-2 of the General Laws of Rhode Island, the University must have a certificate signed by a licensed physician giving proof of protection against rubella (German measles) and rubeola (measles) for all incoming students.

**New England Regional Student Program.** Under the cooperative plan of the New England Board of Higher Education (NEBHE), students from other New England states are admitted to certain curriculums at the University of Rhode Island which are not offered in their own states. Certain programs at other New England state universities are open to Rhode Islanders on a reciprocal basis. Regional students at the University will be charged the in-state fee plus a surcharge of 25 percent. However, if the student transfers out of the program of study that qualifies under the New England Regional Student Program, out-of-state fees will apply. Details on the operation of this program are available on request from the New England Board of Higher Education, 45 Temple Place, Boston, MA 02111, or high school guidance offices. The Office of the Registrar provides information pertaining to this program for students who are already enrolled at the University.

Prospective students who wish to claim eligibility for this program must state so in the appropriate section on their application for admission. Continuing or returning students claim eligibility by contacting the Registrar's Office with a formal request prior to the end of the add period of the semester in which regional status is to be effective.

**Special Programs for Talent Development.** The University encourages the application of economically, socially, and culturally disadvantaged individuals from Rhode Island. To encourage and assist applicants whose educational background is below college preparatory level, the University has instituted recruiting and prematriculation programs. Financial aid is available for students accepted to Talent Development; need is determined by the filing of a Financial Aid Form.

Interested prospective students should apply to Special Programs for Talent Development during their senior year in high school. Those who have been out of high school for some time and those with an equivalency diploma are also encouraged to apply. Applications and all credentials should be sent to the Admissions Office, Green Hall, during the application period between October 1 and March 1.

**Readmission.** Students formerly enrolled at the University and seeking reentry, may obtain applications for readmission at the Office of the Registrar. Readmitted students must make a \$50 advance deposit. All applications for readmission must be submitted to the Office of the Registrar no later than August 15 for the fall semester, and December 31 for the spring semester.

## Registration

All students must register for courses through the Office of the Registrar in order to be properly enrolled.

**Preregistration.** The University preregisters matriculated (official degree-seeking) students who meet the eligibility requirements as defined in the *Schedule of Courses*. Preregistration generally occurs in March and October for the following semester. However, freshmen entering in the fall semester preregister at specified dates during the summer. Additional information is available from the Office of the Registrar.

**Registration Day.** This is held the day before classes begin for both the spring and fall semesters. All matriculated students who did not preregister (or who did not receive a final schedule) must register at Keaney Gymnasium on this day.

**Late Registration.** Generally, students are expected to either preregister for courses (if eligible) or to register on Registration Day. Those who are unable to do so may enroll as late registrants in the Office of the Registrar during the first two weeks of classes. A late registration fee shall be charged unless excused by the Registrar (see p. 21).

**Non-matriculating Students.** Such students must apply each semester to the Office of the Registrar for permission to enroll and for registration instructions.

<sup>2</sup>Optional essays required

Registration takes place during the first two weeks of classes.

**Payment of Fees.** Arrangements must be made with the Bursar for complete payment of tuition and/or fees. If, during the semester, it becomes apparent that a student has not met his or her financial responsibilities with the University, the registration for that semester is subject to immediate cancellation.

**Drop and Add.** Students are permitted to add courses during the first two weeks of classes only. Courses offered by the College of Continuing Education may be added, with approval of the instructor, prior to the third class meeting or by the prescribed University deadline, whichever is later.

A course may be dropped by official procedures determined by the Registrar before the end of the fifth week of the semester. Departments shall have the authority to designate selected courses as "early drop" courses which may be dropped up to two days before the end of the add period. Early drop courses will be designated in the *Schedule of Courses*. When such courses are offered by the College of Continuing Education they may be dropped at any time prior to the third class meeting or by the prescribed University deadline, whichever is later. Graduate students may drop courses at any time up to midsemester. If the student has not dropped a course by the end of the drop period the instructor must submit a grade. A student may drop a course after the end of the drop period only in exceptional circumstances and only with authorization of the dean of the college in which the student is enrolled.

**Auditing.** Auditors are persons who have permission to attend a course but are not taking the course for credit. Auditing is not permitted in non-credit courses. An auditor may be admitted to a class on a space-available basis with the consent of the instructor as indicated by the instructor's signature on an audit authorization form which must be filed in the Office of the Registrar before the end of the "add" period. The course instructor shall determine the extent to which an auditor may participate in class activities. An auditor's name shall not appear on official class rosters, and the course will not be noted on the grade report or on the permanent academic record.

**Flexible Scheduling.** Simultaneous enrollment in Kingston classes and College of Continuing Education classes may give scheduling flexibility to students with special time and location restrictions. Students should consult their academic adviser or college dean for further information.

**Off-Campus Study.** A full-time student who wishes to study at another college or university and use that coursework to satisfy graduation requirements at the University of Rhode Island may register for off-campus study with the Registrar to ensure that grades and credits will be accepted. The student must obtain signed approval for the off-campus courses from the dean of his or her college. Off-campus study includes summer sessions, one or two semesters at another American university, or study abroad. A student may not ordinarily study off campus during the senior year. Students who wish to maintain registered status and preregistration eligibility while studying off campus, must register for off-campus study for each semester of absence from The University of Rhode Island.

**Veterans' Educational Benefits.** Full information describing these benefits may be obtained from your base education officer or from the Veterans Administration Regional Office, 380 Westminster Mall, Providence, Rhode Island 02903. A toll-free number is available for inquiries by asking the long distance operator for Enterprise 5050.

Veterans who are eligible and who wish to receive VA educational benefits must notify the Office of the Registrar in person. In order to satisfy Veterans Administration regulations, all students who receive VA educational benefits must report all changes in academic status to the veterans' registration clerk in the Office of the Registrar.

Recipients of VA educational benefits are also governed by the same University policies as all other students and are, therefore, responsible for completing those procedures described in the *Schedule of Courses* for effecting changes of status (adding and dropping courses, changing address, withdrawing from the University, etc.).

*The University Manual* and the *Graduate Student Manual* further explain the University's policies and procedures concerning the following: 1) the grading system and standards of progress required of the student by the University and the condi-

tions for dismissal for unsatisfactory grades; the allowed probationary period, and the conditions of reentrance for academically dismissed students (see: *University Manual*, Chapter 8; *Graduate Student Manual*, Appendix A; *Students' Guide to URI*, Section 2). 2) the records of academic progress maintained by the University and furnished to the student (see: *University Manual*, Chapter 8; *Graduate Student Manual*, Appendix C). 3) the policies and regulations relating to student conduct and conditions for dismissal for unsatisfactory conduct (see: *University Manual*, Chapters 5 and 6; *Graduate Student Manual*, Appendix A).

**Change of Address.** It is the responsibility of the student to complete a change of address form in the Office of the Registrar whenever a change is made in his or her local, or home mailing address.

## Expenses and Student Aid

### Expenses

*Charges and fees set forth in this bulletin are subject to change without notice.*

In addition to the University fees outlined below, a student should expect to spend about \$500 per academic year for books and supplies, and allow for additional expenditures for travel and personal needs.

All charges are payable by the semester and are due and payable on receipt of the bill or by the due date indicated on the bill. Checks or money orders should be made payable to the University of Rhode Island.

Out-of-state students	228.00
Regional students <sup>1</sup>	87.00
Registration fee per semester	10.00
Memorial Union fee, 1-4 credits	11.25
5-11 credits	22.75
Student Activity tax	17.00

**Reassessment of Fees.** Students are allowed to drop and add credits during the first two weeks of each semester (add period). Fees are reassessed and adjusted according to the credit enrollment and/or student status resulting from drop/add transactions as processed by the Registrar during the add period. Subsequent to the add period, term bills are only reassessed for part-time students who add credits and full-time students adding credits beyond the credit overload limit. *Note: Dropping credits after the add period does not reduce term bills.*

**Credit Overload Fee.** A credit overload fee is charged to all students who register for more than 19 credits per semester. It is assessed according to residency and is charged per credit above the 19-credit

limit. Enrollment at the Kingston and Providence locations is combined when determining this fee. *Note: Dropping overload credits after the end of the add period does not reduce term bills.*

**Kingston and CCE Enrollment.** All undergraduate students who are full time because of combined enrollment at both the College of Continuing Education and the Kingston campus (12 credits and over) are assessed the following fees at the standard full-time rate when enrolled in at least 7 credits on the Kingston campus: Memorial Union fee, Student Activity tax, Accident and Sickness insurance, Student Health fee. Students whose enrollment at the Kingston campus is less than 7 credits are charged the fees at the part-time rate. *Note: Dropping credits after the end of the add period does not reduce term bills.*

**Resident Student Status.** A student who is a resident of the state of Rhode Island pays the in-state fee, but a student from another state or a foreign country who is in Rhode Island primarily for educational purposes, even though he or she remains in the state during vacation periods, is considered a non-resident and pays the out-of-state fee.

The parents or legal guardians of a minor student must have been residents of the state for one year immediately preceding the first class day of the first term of a student's registration for that student to claim resident student status.

<sup>1</sup>See page 18 for description of the NEBHE interstate program.

An "emancipated student" must establish the same bona fide residency for in-state tuition exemption. An emancipated student shall mean a student who has attained the age of 18 years, and whose parents have entirely surrendered the right to the care, custody, and earnings of the student and have not claimed the student as a dependent for tax purposes for two years. If any of these conditions is not met, he or she is presumed to be an unemancipated student. A non-resident student who reaches 18 years of age while a student does not by virtue of that fact alone become a resident student.

Dependents of members of the armed forces, as well as members of the armed forces stationed in the state on military orders, are entitled to classification as resident students.

The Dean of Admissions classifies each student admitted to the University as a resident or non-resident student on the basis of all relevant information available to him. A student may appeal the decision to the Board of Residence Review. The above information is merely a summary of the regulations governing student classifications for tuition purposes. The complete text of the regulations adopted by the Board of Governors for Higher Education may be obtained from the Office of Admissions.

#### **Tuition Waiver for Senior Citizens.**

Permanent residents of Rhode Island who are 60 years of age or older are entitled to take courses at the University without payment of tuition, although other fees and charges are still applicable. Admission to particular courses will be granted on a space-available basis. Eligible persons should contact the Office of the Registrar.

**New Student Fees.** A nonrefundable fee of \$25 must accompany each application for admission. See page 16 for application procedure.

An advance deposit of \$50 is required from every accepted student. The advance deposit, which is applied on the first term bill, will be forfeited if the applicant later withdraws his or her name.

Students returning after an absence of one or more semesters are subject to the same application fee and advance deposit as entering freshmen.

**Student Assessments.** Each student is assessed \$64 per year which is distributed by the Student Senate to support a wide variety of student programs and activities.

A Memorial Union fee of \$152.50 per year is also assessed.

**Late Fees and Special Fees.** A late registration fee is charged to students whose registration is not completed before the first day of classes. The fee is \$15 during the week in which Registration Day falls; \$50 thereafter.

Expenses for class trips in all courses and those incident to practice teaching in vocational education courses are charged to the students concerned.

**Applied Music Fees.** Students taking performance courses in music are charged an additional fee each semester of \$85 for MUS 050, and \$170 for MUS 231, 241, 242, 251, 261, 451, 461, 551, and 561 for private lessons associated with the course.

**Student Nurses' Fees.** Beginning in the sophomore year, student nurses must purchase authorized uniforms and nursing equipment. The approximate cost is \$175.

**Transcripts.** Each student who graduates from the University is entitled to one official transcript without charge. The fee for all other transcripts is \$2, except that the fee for multiple copies ordered at the same time is \$2 for the first copy and \$1 for each additional copy. Copies will be mailed in response to written requests only, which should be addressed to the Office of the Registrar.

Transcripts will not be issued to students who have any unpaid financial obligation to the University.

**Health Service Fees.** The health fee of \$179 is mandatory for all full-time undergraduates, all international students and spouses, and all full-time graduate students. All international students, spouses, and dependents must enroll in the Student Accident and Sickness Insurance Plan. All other students are required to enroll in this plan unless evidence of comparable coverage in another plan is provided and the student completes, signs, and returns a waiver to the Bursar's Office prior to the end of the add period (first two weeks of school). A waiver of insurance is found on the reverse side of the return copy of the term bill. Waiver forms may also be obtained directly from the Office of the Bursar. Part-time students and spouses of students are eligible to participate in the health and insurance plan on an optional basis.

The health fee covers all outpatient care at Health Services with the exception of laboratory and X-ray services. Students

must have insurance which covers these services.

**Refunds.** Refunds of payments made or credits against amounts due to the University shall be made to students who officially withdraw or take a leave of absence according to the following scale: during the first two weeks, 80 percent; during the third week, 60 percent; during the fourth week, 40 percent; during the fifth week, 20 percent; after five weeks, none.

The attendance period in which withdrawal or leave of absence occurs, begins on Registration Day and includes weekends and holidays.

Coverage under the University Sickness and Accident Insurance terminates upon withdrawal of the student for any reason other than graduation or incapacitating disability. Students whose coverage has terminated for reason of withdrawal may request a pro-rata refund of premium from the insurance company. (For further information, refer to the current Student Sickness and Accident Insurance brochure.)

**Housing Rates.** Following are the rates for University housing for the year 1987-88. For complete information write to the Director of Residential Life, Roger Williams Commons. All rates quoted are for double rooms. For single rooms, where and when available, \$100 per year is added to the double rate. Board is mandatory for students living in residence halls.

#### *Residence Halls*

\$1,934	Adams, Barlow, Bressler, Brown- ing, Butterfield, Hutchinson, Merrow, Peck, Tucker, Weldin
\$2,123	Aldrich, Burnside, Coddington, Dorr, Ellery, Fayerweather, Gorham, Heathman, Hopkins

The average projected room rate for fraternities and sororities for 1987-88 is \$1,640.

**Housing and Dining Contract.** University housing is contracted for the *entire academic year*. A deposit of \$100 is required at the time of filing application for a room in the residence hall. This deposit will be applied on the first semester bill. A cancellation of the housing application will result in a pro rata credit on the semester bill according to the following schedule: from date of deposit to June 15, \$100; from June 16 to the opening of the residence halls for the academic year, \$62; after that time, no refunds will be made.

All residence hall rates are quoted for the period specified in the contract. Payments are due in full by the published term bill due date each semester or upon receipt of bill from the Office of Residential Life. Checks and money orders are payable to the University of Rhode Island and should be remitted to the Office of the Bursar.

A student vacating his or her assigned quarters before the end of the period under contract will be held responsible for the total charges for the entire period. No refund will be given when a student moves from University quarters to a private home or decides to commute.

In accordance with existing contracts and University loan agreements, all students living in University residence halls are required to take their meals in the University dining halls. Students may choose from one of the following options at prescribed rates: any 10 meals Monday through Friday; any 15 meals Monday through Sunday; any 20 meals Monday through Sunday. Off-campus commuters and members of the campus community other than dorm residents may also choose to purchase any 5 meals Monday through Sunday. Dining contracts begin on Labor Day and expire after dinner on the last day of final examinations. Students wishing to change from their originally chosen meal plan to another may do so during the first week of classes. Meals are not served on Monday holidays, holiday periods, or during break periods when classes are not in session.

Resident students on all meal plans are provided with a limited number of guest tickets each semester. However, meals for guests or additional meals may be purchased on a cash basis at any dining hall.

The University is a non-sectarian institution, and resources are not available to construct special diet kitchens for religious, health, or personal reasons. Extreme medical problems are reviewed by a nutritionist. Some medical problems may be accommodated. Students requesting a medical variance from the meal plan must submit for approval a medical variance report from their physician to Dining Services prior to Registration Day. Application forms may be obtained by contacting the Dining Services central office at Lippitt Hall.

The University dining system operates on a computerized entry system utilizing the student I.D. card for access to meals. This card must be brought to all meals.

Only students officially withdrawing from the University will receive Dining Services refunds.

**Indebtedness to the University.** Failure to make full payment of all required fees or to resolve other debts to the University (for example, unreturned athletic equipment, overdue short-term or emergency loans, lost library books, debts to the Office of Residential Life for damages, obligations required by the University Judicial System) may result in the cancellation of preregistration for the following semester, denial of registration until the payment is made, and/or disenrollment. Appropriate University departments will provide the student with notice of the debt, reason for it, and a review, if requested. A student must fulfill all financial obligations to the University before receiving transcripts or a diploma.

## Student Financial Aid

Financial Aid is money made available from federal, state, local, or private sources which helps students attend the postsecondary institutions of their choice. At the University of Rhode Island, these varied sources are administered by the Student Financial Aid Office in Roosevelt Hall. The financial aid programs are designed to serve students from the widest possible range of society and all students are encouraged to apply.

In most cases, financial aid will be awarded in a "package" of grants (which do *not* have to be repaid), loans (which have to be repaid), and student employment opportunities (part-time jobs while attending school). The purpose is to assist the students in meeting the costs of attendance at the University. To continue receiving financial aid, it is necessary to reapply and demonstrate sufficient financial need each year as well as maintain satisfactory academic progress.

Financial aid to students is awarded without regard to race, sex, religion, age, color, creed, national origin, handicap, or sexual orientation, and discrimination against disabled and Vietnam era veterans.

**Financial Need.** A student does not have to be from a low-income family to qualify for financial aid, but does have to have "financial need." "Need" is the difference between what it costs to attend the University and what the student and

family can contribute from financial resources. Parents, insofar as they are able, are expected to bear primary responsibility for financing their son's or daughter's college education, and the student is also expected to earn a portion of the resources for college expenses, usually through summer employment.

**Eligibility.** Only citizens, nationals, or permanent residents of the United States are eligible to apply for financial aid. Foreign students desiring information about financial assistance should contact the Office of International Student Affairs at the University.

To be considered for financial aid, a person must have been accepted and enrolled as a matriculated student at the University. Enrolled students must be making satisfactory progress towards their degree according to the University's policy on satisfactory progress (see p. 23).

**Application Procedure.** Residents of Rhode Island, Massachusetts, Maine, or New Hampshire should complete a Financial Aid Form (FAF) specifically printed for their state. Residents of other states should complete the national Financial Aid Form and check with their state scholarship or grant authority to inquire if another form is needed to apply for state scholarship funds. Students should apply for a Pell Grant by checking the appropriate box on the FAF.

The awarding of financial aid for the current academic year may require validation and documentation of all information submitted to the Student Financial Aid Office. (Therefore students must provide signed copies of their own and their parents' last U.S. Income Tax Returns 1040/1040A/1040EZ.) When and if requested by the Financial Aid Office, all tax schedules must also be included.

**Application Priority Dates.** The FAF should be mailed to the College Scholarship Service in Princeton, New Jersey, after January 1, but prior to March 1. Applications completed on or before the above priority dates will receive first consideration for financial aid awards; however, we will continue to process applications as long as funds remain available.

### Federal Aid Available

**Pell Grants.** The Pell Grant is designed to form the foundation of all financial aid received. Each applicant is mailed a set of Student Aid Reports which must be forwarded to the Student Financial Aid Office. The amount of the Pell Grant is calculated according to the cost of attendance, the number of credits for which the student enrolls, and the Student Aid Index printed on the Student Aid Report.

**Supplemental Educational Opportunity Grant.** This program is intended to assist undergraduate students with financial need. These awards are available in amounts ranging from \$200 to \$4,000 per year.

**Carl Perkins Loan.** Eligibility is based on need. Undergraduates are limited to borrowing \$4,500 for the first two years of their program with a maximum of \$9,000 for four years. Graduate students may borrow up to \$18,000 including undergraduate loans. These loans have a simple interest rate of 5% annually. Interest does not accrue until nine months after graduation, termination of studies, or enrollment for less than half time. Minimum payments of \$30 per month are required, and the repayment period may extend up to ten years.

**Nursing Student Loan Program.** This program is available to students enrolled in the College of Nursing. The long-term, low-interest loans become due and payable nine months after graduation or termination of nursing studies. The loans are designed to assist financially needy students attain careers in nursing.

**Health Professions Student Loan Program.** This loan program is restricted to students in the College of Pharmacy. Loans are available to all such students with financial need.

**College Work-Study Program.** This federally supported program provides part-time employment during the school term and full-time employment during the vacation periods. The jobs may be either with University departments, or with off-campus, nonprofit, nonsectarian, non-political agencies. Other institutionally funded employment is also available. A list of these jobs is available in the Student Financial Aid Office.

**Guaranteed Student Loan Program.** Students may apply for loans under the Guaranteed Student Loan Program through local lending institutions.

Interest on loans, until six months after graduation, withdrawal, or drop in enrollment status to less than half time, will be paid by the federal government. A simple interest rate of 8% annually is charged once the repayment period begins.

Eligible freshman or sophomore students may borrow up to \$2,625, eligible juniors and seniors may borrow up to \$4,000, and eligible graduate students may borrow up to \$7,500 per year. The maximum total Guaranteed Student Loan debt an undergraduate may have is \$17,250. The total for graduate or professional study is \$54,750, including any loans made at the undergraduate level.

**Plus Loans for Higher Education.** Independent undergraduates, graduate students, and parents of undergraduate dependent students may apply for loans with variable interest rate. Repayment must begin within 60 days after the loan is received. Additional information may be obtained from local lending institutions.

### University Aid Available

**University Grant.** The University provides grants to several hundred in-state students. To be awarded a University Grant, the student must have demonstrated financial need and a satisfactory academic record.

**Arthur L. Hardge Memorial Grant.** This grant is awarded to economically and socially disadvantaged residents of Rhode Island who participate in the Special Program for Talent Development.

**T.A. Suddard International Grant.** A limited number of partial tuition awards are made to international students, based on financial need. Recipients are awarded by the International Scholarship Committee.

**University Scholarships.** Scholarship awards require not only financial need, but evidence of high academic potential. Some scholarships have specific restrictions, such as place of residence, major, class year, etc. A list of available scholarships may be found in the Appendix on page 184.

**Athletic Grants.** These grants are made upon the recommendation of the Athletics Department to athletes who meet the established qualifications. These awards, rather than being based on need, are based upon athletic ability. Students interested in such assistance should contact the Department of Athletics.

**Regular Student Employment.** Positions funded by the University are available to more than 1,000 students. Jobs are listed in the Student Financial Aid Office.

**University Loans.** Emergency loans ranging from \$10 to \$100 are available to full-time students. These loans are short-term in nature (14-90 days), and can be made only when there is a means of repayment. Application forms are available in the Student Financial Aid Office.

### Other Sources of Aid

**Rhode Island State Scholarships and Grants.** Undergraduate residents of Rhode Island are encouraged to apply for Rhode Island State Scholarships or Grants. While both are based upon need, the scholarships also require a strong academic record in high school. The Rhode Island State Scholarship and Grant Program is administered by the Rhode Island Higher Education Assistance Authority, 560 Jefferson Blvd., Warwick, RI 02886. Other states offer similar programs; for more information, contact your state's scholarship agency.

There are many additional sources of financial aid available to students who qualify: scholarships from private organizations, clubs, labor unions, fraternities, sororities, and businesses. Students should apply directly to the source if they believe they qualify.

A list of the scholarships and loans may be found on page 184. For veterans' benefits see page 19.

### Policy on Satisfactory Academic Progress

The Education Amendments of 1980, P.L. 96-374, October 3, 1980, state that "a student is eligible to receive funds from federal student financial aid programs at an institution of higher education if the student is maintaining satisfactory progress in the course of study he or she is pursuing according to the standards and practices of that institution."

To maintain satisfactory progress at the University of Rhode Island for federal financial aid purposes, the student must be enrolled in a degree-granting program on at least a half-time basis (6 credits for undergraduates, 5 for graduates) for each semester that aid is received. Students enrolled full-time may receive aid for 10 semesters in completing what is normally a four-year program. Students completing what is normally a five-year program are permitted to receive aid for the equiva-

lent of 12 full-time semesters. Part-time students may receive equivalent aid, with an accumulation of 12 credits corresponding to a full-time semester. Two full-time (six credits) summer terms are considered the equivalent of one semester. The determination of a transfer student's eligibility includes the semesters of federal financial aid received prior to attendance at the University of Rhode Island.

Satisfactory progress standards will conform to the University's academic standards, as delineated in the *University Manual*. Students who are placed on academic probation will be notified of the possibility of their loss of federal financial aid eligibility. Students on academic probation for two consecutive semesters and students who are academically dismissed will be ineligible to receive federal financial aid. Criteria for probation and dismissal appear in the *University Manual*. A student who is declared ineligible to receive aid for not maintaining satisfactory academic progress may appeal the decision to the Satisfactory Progress Appeals Committee. Readmission to a program or removal from probation does not automatically constitute eligibility for federal financial aid.

Satisfactory progress will be monitored and measured according to the implementation procedures. Failure to maintain satisfactory progress for two consecutive semesters will result in the loss of federal financial aid eligibility until the student is determined by the Student Financial Aid Office to be once again making satisfactory academic progress.

If there are unusual circumstances which result in the student's inability to make satisfactory progress, the student should write a letter of appeal documenting the unusual circumstance(s) and submit the letter to the Satisfactory Progress Appeals Committee, c/o the Assistant Dean of Student Financial Aid.

## Student Life and Services

An enriching college life has a well-balanced mix of academic and extracurricular activities. The University offers a unique blend of student organizations and activities with emphasis on student-run services and businesses.

### New Student Orientation

Orientation programs which facilitate the students' entry into the campus community are administered by the Counseling Center. New students who participate are taxed a nominal amount to cover such expenses as room, meals and materials associated with their orientation program.

**Summer Orientation Workshops.** All students who are beginning University careers are encouraged to attend a two-day workshop to plan their academic programs, to register for fall classes, to learn what to expect of the University, and to begin to acquire the skills essential to successful transition from high school and home to the University community. These programs are planned to personalize the student's first experience with the University as each one participates, with a group of approximately 15 classmates, in workshop projects. Admitted students receive workshop registration materials in May.

Special programs are planned for parents of new students to coincide with some of the workshop dates. Programs are also provided for older or non-tradi-

tional students and other students with special needs.

**Transfer Orientation Programs.** Students transferring to the University from another institution are encouraged to attend workshops planned especially to acquaint them with some of the unique features and procedures of this University. These workshops differ substantially from beginning student programs. They deal with the issues and problems associated with transferring from another educational institution to the University of Rhode Island. Orientation information and reservation materials are mailed separately to students admitted with advanced standing.

**Initial Orientation for International Students.** Programs just prior to the formal beginning of the academic year assist the international student to function effectively, comfortably, and with reasonable initial success in the new environment. Because successful transition to American culture, values, and institutions as well as to American academic life is crucial, new international students are required to attend the program. Full information regarding arrival dates and orientation program costs are mailed to students in the spring. In planning educational budgets, international students should set aside \$75 to cover cost of room, meals and program expenses. This expense is in addition to University fees specified in this bulletin.

**Commuter Student Orientation.** A one-day program is held just prior to the start of the fall semester. This special commuter orientation is presented by the Office of Student Life and is designed to address the problems, needs and concerns of new commuter students. Commuter orientation complements the summer orientation workshops and explores commuter-related issues and concerns in more detail.

**Minority Student Orientation.** A special one-day supplemental program of information is held just prior to the start of the fall semester. Presented by Minority Student Services, minority student orientation complements the summer orientation workshops and explores minority-related issues and concerns in more detail.

## Lifestyles

**Residence Halls and Dining Centers.** Residence halls and boarding facilities are available to students during both the regular academic year and the summer sessions. There are 19 residence halls on campus offering a variety of living accommodations including coeducational housing. Priority consideration for residence hall assignments will be given to students who have applied for admission to the University by the March 1 deadline and submitted an enrollment and housing deposit on time (May 1). All transfer students will be assigned on a space-available basis. Assignments of incoming students are made in the order in which their deposits are received. Every effort is made to honor the roommate request. For rates and contracts, see page 21.

Applications for residence hall living should be made to the Director of Residential Life.

Three dining centers offering a wide variety of food items are operated by the University for the convenience of the students. The centers were constructed with private bond funds. In order to guarantee payment of these bonds, the University requires that all students living in residence halls purchase a 15-, 20-meal, or "any 10" contract described on page 22.

**Fraternities and Sororities.** There are approximately 1,700 fraternity and sorority members living in the 23 nationally-affiliated houses privately owned by alumni corporations. The staff of the Office of Student Life advises these groups. The Greek houses promote scholarship,

citizenship, and small-group living. Purchasing and business management for these houses is provided by a private corporation controlled by the fraternity and sorority members. The average room and board charge for fraternities and sororities is approximately \$400 less than for University residence halls and dining centers. Approximately 100 freshmen live in fraternities and sororities each year. Interested freshmen should contact the Office of Student Life.

**Commuting from Family Home.** Some students commute to the University from home. The advantages of home cooking, privacy, lower costs, and opportunity to keep high school friends are balanced against numerous challenges and opportunities: acquiring information about all aspects of the University, taking advantage of evening events on campus, coping with transportation problems, and budgeting one's time. Various services are coordinated by the Office of Student Life to meet commuter needs. Dining Services offers special meal plans for commuters; Health Services provides a satellite clinic of preventive services; the Commuter Information and Referral Center, staffed by peer advisers, is a clearinghouse of information providing quick and accurate answers to any questions about University life. A car pool matching service is available in the Memorial Union Commuter Lounge.

**Commuting from "Down-the-Line."** A number of students live in houses or apartments in the southern Rhode Island area known as "down-the-line." Juniors and seniors often choose to move off campus and live within a ten-mile radius of the campus where summer homes are rented to students for the school year. Typically, a student will pay \$100-125 a month, plus utilities, for each bedroom in a furnished house. The majority of winter residents in these down-the-line summer communities are students and they patronize nearby supermarkets, laundromats, restaurants, shopping centers and recreational facilities. Many commute by car pool or bus. The Office of Student Life administers an off-campus housing service along with the commuter services mentioned above. The University Dining Services offers partial meal plans to commuting students for any combination of meals. Most services are located in the Commuter Lounge in the Memorial Union.

**Older Students.** Approximately 800 students (10% of the undergraduate population) on the Kingston campus are over 25 years of age. There is a student organization called Older Student Association (OSA) for these men and women who chose not to, or were unable to, attend college right after high school. Some are married, with family responsibilities. Some also have jobs and are part-time students. Some older students are attending school with G.I. Bill benefits. Some have retired from a first career and want to prepare for a second. Older students are encouraged to seek advice from the Admissions Office staff. Programs and services for this group of students are coordinated by the Office of Student Life.

**Women Students.** Women students make up about half of the student population. A Women's Center, administered by the Office of Student Life, provides specific resources to help women grow to their full potential, and it coordinates lectures, programs, and activities of special interest to women.

**Minority Students.** Approximately 700 students use the variety of services for minority students. Black, native American, Asian, Hispanic, and other minority students have formed special interest groups to further meet their needs. A minority student center, the Uhuru SaSa House, serves as a gathering place for leisure, meetings, workshops, and various co-curricular activities. Counseling, programming, and other services are provided by the Director of Minority Student Services in concert with the Office of Student Life.

**International Students.** Approximately 700 international undergraduate students, graduate students, visiting scholars, and faculty, as well as their dependents, are advised and served by the Office of International Student Services, Office of Student Life. Assistance is provided in the social, financial, housing, and immigration areas. All communications from international faculty and scholars concerning non-immigrant visas are also handled by this office. The International Student Association and a number of national student organizations provide students with the opportunity to participate in cultural activities, and the University's International Student Center serves as a meeting place for study, social events, and other co-curricular activities.

**Handicapped Students.** Approximately 200 students have identified themselves as disabled. A full range of services is offered by the University and conducted by the Office of Student Life. Handicapped students are encouraged to notify the Coordinator of Handicapped Services for individualized services and accommodations.

## Student Government

The Student Senate is a legislative body which represents the students to the administration and faculty and supervises extracurricular activities. It also distributes the activities tax among the various student organizations through its tax committee. Individual residence halls form their own governments. The Interfraternity Council supervises fraternity affairs and the Panhellenic Association governs sorority life. The Commuter Association provides social and other assistance to commuter students.

## University Judicial System

Administered by the Office of Student Life, the University Judicial System is designed to promote student growth and to preserve the atmosphere of learning necessary to the well-being of all students. Community standards of behavior and University policies for students are published in the student handbook, *Rights and Responsibilities*. The Judicial System receives complaints or allegations from aggrieved parties, the available facts are gathered and evaluated, and the case may be referred for formal judicial action by one of the University judicial boards or by administrative action (if the student admits guilt and chooses administrative action). Sanctions range from "no further action" to suspension or dismissal from the University and may include conditions relating to the nature of the violation.

## Student Activities

More than 90 student organizations are advised by the Student Activities Office staff through consultation services, technical expertise and information. Thousands of students participate in the activities sponsored by these organizations.

**Lectures and Arts Programs.** Lectures and arts programs are presented throughout the year to enrich the more formal academic program of the University. Lectures of general and specialized interest are presented by visiting scholars. The URI Arts Council plans programs that include music and dance concerts, film programs, and theatre presentations. Student organizations sponsor a popular entertainment series and bring speakers of national or international prominence to campus. These are funded by student funds.

**Student-run Businesses.** The Student Senate business arm, called Kingston Student Services, controls and operates a variety of student-oriented businesses from a record and film shop in the Memorial Union and the campus youth hostel (primarily for commuters) to a used book exchange. Other student-controlled businesses include the fraternity and sorority cooperative buying service and the various residence hall cooperatives for purchase of food and sundry items. The Memorial Union offers a number of opportunities to run businesses under full-time supervision but with a large amount of independence. Such enterprises as the food service units, the candy and nut shop, the flower and gift shop, and the copy center all allow for management training and for excellent work experience.

**Athletics.** The University offers an extensive program of athletics, sufficiently varied to provide an opportunity for every student to participate. The Tootell Physical Education Center and the Keaney Gymnasium provide excellent facilities, including three pools, three gymnasiums, three weight training rooms, and a modern athletic training room. A multi-purpose indoor athletic complex is planned which will include facilities for track, tennis, gymnastics, weight training, and many other indoor activities. The outdoor facilities include the newly renovated Meade football stadium, 16 tennis courts, two softball diamonds, a baseball field, a lighted soccer field, an all-weather track, a varsity hockey field, and numerous practice fields for recreation and competitive activities.

Women's intercollegiate teams participate in Division I basketball, field hockey, gymnastics, soccer, softball, volleyball, cross country, indoor and outdoor track, swimming and diving, and tennis.

Men's intercollegiate teams participate in Division I-AA football, and in Division I baseball, basketball, golf, soccer, swimming, tennis, cross country, and indoor and outdoor track.

In addition to membership in the Atlantic Ten Conference, the University holds membership in the Yankee Conference (football), the National Collegiate Athletic Association, the Eastern College Athletic Conference, and the New England Intercollegiate Athletic Association.

Intramural programs and clubs for men and women combine the values of competitive athletics and informal sports, and are in operation all year.

**Honor Societies.** The University has chapters of a number of national honor societies, election to which is a recognition of accomplishment. The Society of the Sigma Xi is the scientific honor society, Phi Beta Kappa is a national liberal arts honor society, Phi Eta Sigma is a national honor society for freshmen, Phi Kappa Phi and the Golden Key are national honor societies for general scholarship, and Mortar Board recognizes scholarship and leadership. In more specialized areas are the following: Alpha Delta Sigma (advertising), Alpha Kappa Delta (sociology), Alpha Zeta (agriculture), Beta Alpha Psi (accounting), Beta Gamma Sigma (business), Kappa Delta Pi (education), Delta Pi Epsilon (business education), Eta Kappa Nu (electrical engineering), Lambda Kappa Sigma (women's pharmacy), Lambda Tau (medical technology), Omicron Delta Epsilon (economics), Omicron Nu (home economics), Phi Alpha Theta (history), Phi Sigma (biological science), Phi Sigma Iota (foreign languages, literature, and linguistics), Pi Delta Phi (French), Pi Mu Epsilon (mathematics), Pi Sigma Alpha (political science), Pi Tau Sigma (mechanical engineering), Psi Chi (psychology), Rho Chi (pharmacy), Sigma Delta Pi (Spanish), Sigma Pi Sigma (physics), Sigma Theta Tau (nursing), and Tau Beta Pi (engineering).

**Other Organizations.** In addition to intercollegiate athletic teams, a number of organizations represent the University in competition, exhibitions, and public performances. The University Band, Chorus, and Orchestra are under music department direction, and students may receive credit for participation in any one of these. The University Theatre, under theatre department direction, presents several plays each year. The URI Debate

Council is directed by members of the speech department and participates in intercollegiate debates. The Cheerleaders are active at varsity football and basketball games and rallies.

On campus there are about 30 professional organizations related to the academic areas and there are a number of groups serving social, recreational, cultural, religious, and political interests.

Students publish a newspaper four times a week, a bi-weekly gazette, a yearbook, and a literary publication. Radio station WRIU, with local reception AM, and FM that reaches all of Rhode Island and parts of Connecticut and Massachusetts, is student run and operates 365 days a year.

## Student Services

**Career Services.** The Office of Career Services helps students assess goals, develop skills, and implement career objectives. It is staffed by professional career counseling and planning specialists who provide individual counseling, non-credit workshops, career development courses, and campus interviews with a broad range of potential employers. The Career Services staff provides counseling on problems and concerns encountered during selection of college major, career search, and graduate school selection. Career Assistants, undergraduate students who serve as advisers, are available on a daily walk-in basis to help with career inquiries, resumes, job search strategies, and occupational information. Computer resources are available to aid students in self-assessment and career search.

The Career Resources Center maintains publications and information on specific careers, job openings, job search techniques, graduate programs, and employer literature. *Career Steps*, a series of publications prepared by the staff, covers selected topics and is available on request.

**Counseling Services.** The Counseling Center is staffed by professional counselors, psychologists, and a part-time psychiatrist. It offers short-term individual counseling and a variety of skill-building and support groups to help students cope successfully with life demands. The Counseling Center provides assistance to students in areas such as coping with stress, developing effective study habits, building satisfying relationships, adjusting to university life, and planning for graduate school or a career.

The Counseling Center sponsors: New Student Programs; The Learning Assistance Center; Perspectives, which processes student leaves of absence and counsels students who consider withdrawing from the University; and The Clearinghouse for Structured Groups, a national informational service for professional counselors. It also administers professional examinations such as the Miller Analogies Test, the Graduate Record Examinations, the Law School Admissions Test, and the Graduate Management Admission Test.

**University Chaplains.** The University chaplains are active in providing religious services, in counseling, advising campus groups, teaching, and programming. The chaplains are available to all students, staff, and faculty on a 24-hour basis. The six chaplains represent the Roman Catholic, Jewish, Episcopal, and Protestant communities; referrals are available to representatives of other faiths.

**Memorial Union.** A student board of directors working with the Director of the Memorial Union and Student Activities determines policy for the Union and plans a full program of social, cultural, intellectual and recreational activities. The Union building is a memorial to the men of the University who died in two world wars. It houses a wide variety of educational, social, cultural and recreational services and facilities. These include meeting and conference rooms, lounges, browsing room, study rooms, dark rooms, student video center, radio station, campus newspapers, games room, offices for student organizations, student technical services, flower and gift shop, candy and nut shop, cafeteria, snack bar, restaurant, private dining rooms, ballroom, and party room.

Among the services provided are a bank, travel agency, unisex hair salon, credit union, copy center, and a scheduling and information office.

**Health Services.** University health services are available to all students who have paid the health fee. These services include special clinics in gynecology, birth control, internal medicine, surgery, wart removal, allergy, nutrition, and mental health as well as generalist and nursing care, laboratory, X-ray, and pharmacy. Allergy injections are given, provided the vaccines are supplied.

Outpatient services during the academic year are available seven days a week, 24

hours a day. Physicians are available either for direct services or on call. Nurses are on duty at all times. Specialists are available only at specified times.

Hospital care is available in the local community. All medical expenses incurred outside the University's Health Services are the responsibility of the student. Therefore, you are encouraged to have adequate insurance coverage (see Health Services brochure, *To Your Health*). Students who choose their own private physician must assume responsibility for expenses incurred.

The Health Promotion Department of Health Services in Roosevelt Hall is concerned with teaching students to take care of themselves and to become informed consumers of health care services.

## Confidentiality of Student Records

Procedures for the release and disclosure of student records maintained by the University are in large measure governed by state and federal laws. Where the law is silent, the University is guided by the principle that the privacy of an individual is of great importance and that as much information in a student's file as possible should be disclosed to the student upon request. A current or former student has the right to inspect and review official records, files and data directly related to that student. This right does not extend to applicants, those denied admission to the University or those who were admitted but did not enroll. Some records are not available to students.

Third parties do not have access to personally identifiable records or information pertaining to a student without the written consent of the student who specifies that the records be released. Parents are considered third parties.

Detailed guidelines for the release and disclosure of information from the student records are available from the Office of Student Life. These guidelines comply with the legal requirements of the Family Educational Rights and Privacy Act of 1974.

## University College

Diane W. Strommer, *Dean*  
Everett T. Harris, *Assistant Dean*  
Sarah H. Rockett, *Academic Counselor*

University College offers incoming students a broad range of advising services and the opportunity to explore the variety of courses and programs available at the University before they commit themselves to a major in a degree-granting college. All entering students are enrolled in University College except registered nurses and students in special two-year programs. University College grants no degrees. Through its strong program of academic advising by faculty, its purpose is to assist new students in making a smooth transition to the University and to provide special assistance, programs, and events for freshmen and sophomores.

Advisers, who have regular office hours at the College in Roosevelt Hall, are faculty members who represent each of the majors in the degree-granting colleges. Each student is assigned an academic adviser who is a specialist in the area in which the student intends to major or who has a particular interest in working with students who are undecided about their choice of a major. Advisers help students to select and schedule the right courses, become familiar with University procedures and programs, and obtain whatever assistance may be needed.

If more students seek access to a program than can be accommodated due to limited facilities or faculty, those students who have shown the highest promise for academic success in the program will be admitted first. Where such limitations exist, the student must apply for acceptance in the program under conditions

established by the specific department or college. This applies specifically to programs which have been declared "over-subscribed" by the Vice President for Academic Affairs. Students who cannot be admitted to the program of their first

choice may request entry into another program for which they have satisfied entrance requirements, or spend one or two additional semesters in University College preparing to qualify for another program.

The College of Arts and Sciences has two main objectives: first, to enable all students to understand our intellectual heritage, the physical and biological world in which we live, and our social, economic, and political development; and second, to provide programs of professional education in selected fields as well as a strong foundation for graduate study.

The college has programs of study leading to the following degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, and Bachelor of Music. The Department of Dental Hygiene provides programs leading to both the Bachelor of Science and the Associate in Science degrees.

For information on premedical, pre-dental, prelaw, and preveterinary programs see pages 11-13.

## Curriculum Requirements

In order to earn a degree in the College of Arts and Sciences, the student must meet requirements in three main areas: 1) the major, 2) electives, 3) General Education. These areas are described below.

**1. The Major.** Every student is required to specialize in a particular area or discipline; this area of specialization is called the major. The requirements for each major vary from field to field, and are described on pages 31-45. Any student who has met the requirements for two separate majors within either the Bachelor

of Arts or the Bachelor of Science curriculum in the College of Arts and Sciences has earned a double major and may have both fields listed on the transcript.

A student must maintain a 2.0 quality point average (QPA) in his or her major to meet graduation requirements. One-half of the total number of credits needed in a given major must be earned at the University of Rhode Island.

**Curricular Modifications.** In consultation with the adviser, and with the approval of the department and dean, a student may be permitted to modify the normal requirements of the department in which the student is majoring. Students may modify any curricular requirement except course level, minimum grade point average, total credits, and the Basic Liberal Studies requirements. These may be modified only upon approval by the Scholastic Standing and Petitions Committee of the College. Petition forms are available in the Dean's Office.

**2. Electives.** Electives are courses not included in the General Education or major requirements which students may freely select in order to make up the total number of credits required for graduation. Many students use their elective credits to develop a minor field (see below).

**Minor.** Students may elect to declare a minor, which will be entered on their transcripts at graduation. Requirements for a minor may be satisfied by: 1) completion of 18 or more credits of an approved minor, or 2) completion of 18 or

more credits within a curriculum other than the student's major, or 3) completion of 18 or more credits of related courses offered by more than one department, with approval by a member of the faculty competent in the minor area of study.

At least 12 of the 18 credits must be at the 200-level or above. Elective courses and courses in General Education may be used for the minor. No course may be used to apply to both the major and minor fields of study. A minimum average of 2.0 must be earned in the courses in the minor. Courses in the minor may not be taken under the pass-fail grading option.

It is the responsibility of students to submit their minors to the dean for approval no later than the beginning of the second semester of their senior year.

**3. General Education/Basic Liberal Studies.** In the College of Arts and Sciences, General Education requirements are called Basic Liberal Studies, and are required of all students. This series of courses is intended to insure that students have educational experiences which will help them to become informed and responsible participants in society and contribute to the full development of their individual capabilities. The Basic Liberal Studies Program embodies the philosophy and fundamental knowledge which characterizes an arts and sciences education.

**Basic Liberal Studies Requirements.** Courses used to fulfill these requirements must be

selected from the list approved by the College of Arts and Sciences on this page. Students may use *only two courses per discipline* (as identified by course code) to fulfill requirements in Fine Arts and Literature, Letters, Social Sciences, and Natural Sciences.

Courses in a student's major may not be used to fulfill requirements in Fine Arts and Literature, Letters, Social Sciences, and Natural Sciences. However, if a student completes a double major, he or she may use courses from one major toward these requirements.

Courses used to fulfill Basic Liberal Studies requirements must be selected from the following list approved by the College of Arts and Sciences.

**Bachelor of Arts**

The Bachelor of Arts curriculums provide a general cultural background and an opportunity to major in any one of 31 fields of study.

**Curriculum Requirements.** Each candidate for a Bachelor of Arts degree must meet certain minimum curricular requirements in quantity and quality. These requirements include: at least 120 passed credits which include at least 42 credits in courses numbered 300 or above, and an overall quality point average of at least 2.0.

In addition to meeting the requirements of the Basic Liberal Studies Program, each candidate must complete a major and a number of elective courses. The major totals 27 to 30 credits.

**B.A. Major.** The major is the discipline or subject area in which the degree is granted. It may include not only required

courses within the major department but also courses in related subjects. The student should declare this major before the end of the fourth semester.

The major comprises no fewer than 27 nor more than 30 credits. These, however, are exclusive of any credits which are outside the major department but may be required by that department as prerequisites. Including such prerequisites, the major may not exceed 36 credits.

The student may earn up to 45 credits in coursework offered by the major department, counting as electives those credits earned in excess of the major requirements. Any credits in excess of 45 earned in the major department increase correspondingly the minimum number of credits required for graduation.

*Majors include:* anthropology, art (history and studio), biology, chemistry, classical studies, comparative literature studies, economics, English, French, geology, German, history, Italian, journalism, Latin American studies, linguistics, marine affairs, mathematics, music, philosophy, physics, political science, psychology, Russian, sociology, Spanish, speech, theatre, urban affairs (urban social processes, policy formation, and spatial development), and women's studies.

**Bachelor of Science**

The Bachelor of Science curriculums are professionally oriented and, in general, meet the accreditation standards of national professional associations.

**Curriculum Requirements.** All candidates for the Bachelor of Science degree must fulfill the requirements of the Basic Liberal Studies Program and complete a major of 30-45<sup>1</sup> credits within a department. In addition, a department may require for its major certain courses in other departments, with the stipulation that this will not preclude their application to the Basic Liberal Studies Program requirements. No more than 130 credits can be required in a program.

Each major within the B.S. curriculum has certain more specific requirements, as listed on the following pages.

*Majors include:* applied quantitative economics, applied sociology, botany, chemistry, chemistry and chemical oceanography, computer science, dental hygiene, geology, mathematics, medical

technology, microbiology, physics, physics and physical oceanography, zoology.

**Bachelor of Fine Arts**

The curriculums provide the opportunity to discover and develop creative capacities in the fine arts. The emphasis is on richness of program and quality of experience rather than the development of isolated skills. Applicants registering for work toward the Bachelor of Fine Arts degree must receive permission of their major department. Students majoring in theatre specializing in scene design must submit portfolios. Theatre students who wish to specialize in acting must arrange for an audition with the Department of Theatre. Others must arrange for an interview with a departmental representative. Further details and appointments may be obtained through the University Admissions Office.

**Curriculum Requirements.** All candidates for the Bachelor of Fine Arts degree are required to meet the requirements of the Basic Liberal Studies Program.

*Majors include:* art, theatre.

**Bachelor of Music**

The Bachelor of Music degree is designed to prepare qualified students for careers in the field of music. Students may select one of the eight majors dependent upon their aims and abilities.

**Curriculum Requirements.** All candidates for the Bachelor of Music degree are required to meet the requirements of the Basic Liberal Studies Program.

Students are encouraged to attend department-sponsored events each semester.

*Majors include:* classical guitar, voice, piano or organ, orchestral instrument, music history and literature, theory and composition, music education.

All areas provide for a good background in academic subjects and each curriculum contains basic courses for the development of sound musicianship. An audition conducted by members of the music department staff is required for permission to register for work toward the Bachelor of Music degree.

<sup>1</sup>The student majoring in chemistry, for ACS accreditation purposes, will be allowed 48 credits.

The music education curriculum includes courses in educational psychology, methods, and a teaching internship which leads to state certification for teachers.

The total number of credits for graduation is 125 (126 for music education majors).

## Associate in Science

The Department of Dental Hygiene offers a two-year program leading to the Associate in Science degree. Students in this curriculum are not required to meet the Basic Liberal Studies Program requirements but must complete 71 credit hours in a prescribed program outlined in the department offerings.

## Anthropology

The Department of Sociology and Anthropology offers the degree of Bachelor of Arts (B.A.) in anthropology.

*Faculty:* Professor Carroll, *chairperson*. Professors Loy, Poggie, Pollnac and Turnbaugh; Associate Professor Kelley; Assistant Professor Lynch.

Students desiring to major in anthropology must complete a total of 30 credits in that subject. This total must include at least one course (3 crs.) from each of the five sub-disciplines of anthropology as follows: *Cultural Anthropology* includes APG 203, 309, 321, 322, 323, 324, 326, 405, 407, and 413; *Culture Areas* includes APG 305, 311, 313, 315, 319, and 325; *Physical Anthropology* includes APG 201, 300, 301, 350, 390, 400, and 412; *Archaeology* includes APG 202, 303 and 317; *Anthropological Linguistics* includes APG 200 and 409.

In addition, each student majoring in anthropology must complete APG 401 and one of the following methodology courses: APG 300, 301, 302, 317 or 409. The remaining 9 credits may be selected from course offerings in anthropology.

It is recommended that the first course in each sub-discipline be at the 200 level. These 200-level courses are prerequisites for upper division courses in the sub-disciplines, although prerequisites may be waived by the instructor.

It is strongly recommended, but not required, that anthropology majors take at least one course in statistics.

A total of 120 credits is required for graduation. At least 42 of these must be in courses numbered 300 or above.

## Art

The Department of Art offers a Bachelor of Arts (B.A.) degree with a major in either art history or art studio, and a Bachelor of Fine Arts (B.F.A.) degree in studio.

Students selecting classical studies as a major complete a minimum of 30 credits; (a) 18 credits from either LAT 301, 302, 497, 498, or GRK 301, 302, 497, 498; (b) 6 credits from the other language at any level; (c) 6 additional credits from any courses offered by the Classics Section. Either LAT 101, 102 or GRK 101, 102 sequence may count toward the major; the other 100-level sequence, not counting toward the major, will serve as a prerequisite for advanced courses.

A total of 120 credits is required for graduation. At least 42 of these must be in courses numbered 300 or above.

**Comparative Literature Studies**

The Department of English and the Department of Languages offer jointly the Bachelor of Arts (B.A.) degree in comparative literature. The Master of Arts (M.A.) degree is described in the *Graduate School Bulletin*.

*Coordinator:* Associate Professor Dvorak (English)

The choice of courses in a student's major and in the area of special interest must have both sufficient range (genre, period, and at least two literatures) and a specific focus. It must be approved by an adviser and the Comparative Literature Advisory Committee consisting of members from the Departments of English and Languages.

Students in the Comparative Literature Studies fulfill the Fine Arts and Literature requirement by taking 6 credits in Fine Arts and 3 credits in Literature which are over and above their major requirement.

Students must complete a minimum of 30 credits in one of the three major options:

**English and one foreign literature in the original language.** 9 credits in English and/or American literature, 300 level or above; 9 credits in one foreign literature; 3 credits in literary theory or criticism (CLS 350). The remaining credits to be taken from the comparative literature core courses or the literature courses in the Departments of English or Languages.

**Two foreign literatures in the original language.** 9 credits in each of two foreign literatures; 3 credits in literary theory or criticism (CLS 350). The remaining courses to be taken from the comparative literature core courses or the literature courses in the Departments of English or Languages.

**World literature in English translation.** 3 credits in the nature of language from APG 200, 409; LIN 201, 202; or PHL 440; 3 credits in literary theory or criticism (CLS 350). The remaining credits to be taken from the comparative literature core courses and the literature courses in the Department of English, and the literature in English translation courses offered by the Departments of English and Languages. In addition, a student choosing this option must have proficiency in a foreign language through the intermediate level.

A total of 120 credits is required for graduation. At least 42 of these must be in courses numbered 300 or above.

**Computer Science and Experimental Statistics**

The Department of Computer Science and Experimental Statistics offers the Bachelor of Science (B.S.) degree in computer science. The Master of Science (M.S.) degree programs in computer science or statistics and the Doctor of Philosophy (Ph.D.) in applied mathematical sciences with specialization in computer science or statistics are described in the *Graduate School Bulletin*.

*Faculty:* Associate Professor Lamagna, *chairperson*. Professors Carney, and Heltshe; Associate Professors Carrano, Hanumara, Lawing, and Soh; Assistant Professor Peck; Emeriti Professors Hemmerle Merenda, and L.T. Smith.

The curriculum is designed to provide a broad introduction to computer science fundamentals. Emphasis is on computer software and applications. The required mathematics preparation provides a basis for advanced work. Students will be well prepared for graduate study in computer science or computer-related areas.

Demand for computer science has far exceeded the department's resources. Therefore, the number of students majoring in computer science enrolled in the College of Arts and Sciences will be limited to 35 per year. University College students and students in other curriculums will be considered for admission to the College of Arts and Sciences as computer science majors each January. Selection will be based primarily upon grade point average.

A registration priority is in effect for all computer science courses. Preference is given to computer science majors, followed by students whose curriculum requires computer science, followed by all others. Students who have preregistered for computer science courses will be given preference, within the above constraints, regardless of their curriculum. Therefore, preregistration is strongly recommended.

Students in this curriculum must complete a minimum of 39 credits in the major as follows:

CSC 201 (3), 202 (3), 340 (3), 301 (3), 311 (3), 431 (3); also 21 additional credits chosen from EST 409, ELE 405 and any CSC course at the 300 level or above (excluding special topics and directed study).

In addition, 12 credits of professional electives are required. The courses must be selected from a list which is available from the department.

Also required are MTH 141 (3), 142 (3), 215 (3), 243 (3); one SPE course (3) and one WRT course (3) or CMS 101 (6).

A total of 130 credits is required for graduation. A possible course of studies follows:

The B.A. curriculum provides more flexibility than the B.S. program in the choice of courses and offers the possibility of highly individualized programs in consultation with the faculty adviser. The B.A. curriculum can provide an appropriate background for geology-related fields dealing with natural resources, environmental studies, conservation, resource management, and others. Students intending to pursue graduate studies in the geosciences should consider the B.S. curriculum in geology or complement the B.A. program with a broad background in basic sciences. The federal government identifies GEL 320, 321, 370, 410, 440, 450, and supporting sciences as a minimum background for geologists.

#### BACHELOR OF SCIENCE

This curriculum is designed as a basic foundation for careers in the earth sciences. It offers preparation for further work in areas such as sedimentology, coastal geology, igneous and metamorphic petrology, geochemistry, structural geology, tectonics, geophysics, paleontology, paleoecology, geohydrology, remote sensing, mineral and energy resources, engineering geology, environmental geology, and oceanography.

An emphasis on marine geology is possible by taking, in addition to marine-oriented geology courses, approved geology-related courses offered by the Graduate School of Oceanography and the Department of Ocean Engineering as science electives. Information about this and other similar options can be obtained

from the chairperson of the department.

Students majoring in geology should note the requirement for field experience. An approved summer field camp for a minimum of 4 credits normally is undertaken following the junior year, and related costs are the responsibility of the student. Minimum background for field camp normally includes GEL 320, 321, 370 and 450. (Field camp is not required under the B.A. curriculum.)

A total of 126 credits is required for graduation. Following is the suggested sequence of courses for the first four semesters. Completion of these courses fulfills the Natural Sciences and Mathematics Division requirements and satisfies prerequisites for upper-division geology courses. Late concentrators, transfer students and others wishing to modify this schedule should consult their geology faculty adviser.

## BACHELOR OF SCIENCE

Students in this curriculum may elect either the general program or the applied mathematics option.

**General Program.** This program stresses basic theories and techniques, and includes an introduction to the principal areas of mathematics. It is recommended for students considering graduate study in mathematics.

Students in this program must complete MTH 141, 142, 215, and 243. These courses should normally be taken in the freshman and sophomore years. Students must complete an additional 27 credits in mathematics, including MTH 316, 425, 435, 436, and 462. MTH 107, 108, and 109 may not be included. **Applied Mathematics Option.** This program is intended for the student who anticipates a career as an applied mathematician or mathematical consultant with an organization such as an industrial or engineering firm, or a research laboratory. The student learns the mathematical ideas and techniques most often encountered in such work. Although a theoretical foundation is developed, the applications are emphasized.

The student must take MTH 141, 142, 215, and 243, preferably by the end of the sophomore year. In addition, the student must complete MTH 437-438, CSC 201-202, 9 credits selected from Group I (Mathematics), and 9 credits selected from Group II (Applications).

Both programs require 130 credits for graduation.

## Medical Technology

The medical technology curriculum is administered by the Microbiology Department. This curriculum, leading to the Bachelor of Science (B.S.) degree, prepares men and women for careers in hospitals or medical laboratories. During the first three years, the emphasis is on general education and basic courses in biology, chemistry, mathematics, and physics necessary as background in the applied sciences. The courses of the senior year are taught off campus by the staffs of affiliated hospital schools of medical technology. The senior year is a 12-month program of study and starts soon after the completion of the third year of the curriculum, in June or early July. It is taken at one of the following hospitals which are about 30 miles from the main campus of the University: Miriam Hospital, Rhode Island Hospital, St. Joseph Hospital, which are in Providence; the Memorial Hospital of Pawtucket; or the Rhode Island Medical Center in Cranston. The clinical program includes didactic and laboratory instruction in the various areas of medical technology and prepares the student for the national certification examinations.

Applicants to this curriculum should have completed 62-65 credits by June of the sophomore year and should have taken all courses listed below for the first two years. Students are selected by the University Committee on Medical Technology and by program officials of the hospital schools. Since the number of students admitted to this professional curriculum is limited, interested students should consult early in their college career with the director so that they will be familiar with the requirements and appli-

cation procedures. Flexibility in the curriculum permits the student who is not accepted to fulfill requirements for the Bachelor of Science degree in another concentration such as microbiology, zoology, or certain related health sciences.

## Physics and Physical Oceanography

The Department of Physics and the Graduate School of Oceanography offer a Bachelor of Science (B.S.) degree in physics and physical oceanography.

*Coordinator:* Professor S.S. Malik (Physics). The faculty consist of the members of the Department of Physics and the Graduate School of Oceanography.

This program includes a comprehensive background in physics and a solid introduction to physical oceanography. The curriculum includes a full set of physics and mathematics courses required for a B.S. in physics, with extra emphasis on classical physics, plus additional upper-division or graduate-level courses in fluid dynamics and physical oceanography.

The senior physics research project (PHY 483 and 484) will be undertaken in the Graduate School of Oceanography under the supervision of a GSO faculty member. In addition to this, students may find summer employment or participate in oceanographic research cruises after their junior year.

Students graduating in this course of study will be well prepared to pursue either conventional physics career options or careers in physical oceanography. For physical oceanographers at the B.S. level, technical positions in private or government oceanographic research laboratories are available. Students who continue on to graduate studies should expect to find high demand for physical oceanographers with advanced degrees. It is recommended that students planning to attend an oceanography graduate school take PHY 520 (Classical Dynamical Theory); students wishing to keep open the option of physics at the graduate level should take PHY 452 (Nuclear Physics). Students entering the URI Graduate School of Oceanography from this program will have a significant head start in comparison with those entering from most other undergraduate institutions.

## Urban Affairs

The Urban Affairs Program Coordinating Committee offers three majors in the College of Arts and Sciences for the Bachelor of Arts (B.A.) degree: Urban Social Processes in the Urban Environment, Policy Formation in the Urban Environment, and Spatial Development in the Urban Environment. The courses that comprise these majors are offered by colleges throughout the University.

The Urban Affairs Program is described on page 11.

Students who select one of these three majors must complete six courses in the common core and four courses chosen from the specialization courses. Each of the majors requires a minimum of 30 credits.

Students who wish to major in one of these should consult the appropriate member of the Urban Affairs Program Coordinating Committee for assistance in the formulation and approval of their majors.

**Urban Social Processes.** This major examines the functions of urban social systems, explores urban social issues which affect the lives of individuals in an urban environment, and investigates individual and systems-change strategies. Students gain an understanding of the systemic forces which act on individuals in urban societies to produce both positive and negative outcomes. Poverty and social class, the welfare system, race, crime, rapid environmental change, all generate social issues which take on particular significance in an urban setting and have a dramatic impact on the lives of urbanites. In addition to a thorough grounding in theory, students are directed toward research and intervention techniques which they may extend, with graduate training, into the social sciences, criminology, social work, community planning, and other urban-oriented fields. Students seeking jobs at the baccalaureate level

may work in social agencies (e.g., welfare, youth development, the criminal justice system), the governmental departments which sponsor and monitor these agencies or specialized educational facilities (e.g., halfway houses, pre-school enrichment programs, alternative high schools).

Students are expected to satisfy the common core requirements. In addition, they are also required to select 4 courses from the following: APG 319; ECN 401, 403; HCF 220, 434; HIS 339, 343; MGT 301; PSC 420, 483, 486; PSY 335; SOC 314, 316, 330, 336, 240, 320, 318, 438; SPE 315. Students are encouraged to arrange for an urban affairs internship.

**Policy Formation.** This major identifies the decision-making processes within the metropolis, examines the ways in which public policies are formulated and implemented, and considers ideas about the substance as well as the outcome of the policy-formation processes. An understanding of such decision-making processes requires knowledge of the political, administrative, managerial, planning, and economic aspects of urban life. Students completing the major should be prepared for entry-level administrative jobs in government agencies, business firms and community organizations, or for activist careers in politics. They might undertake graduate work in law, public administration, community planning, business, or related disciplines.

Students are expected to satisfy the common core requirements. They are also expected to select four courses from the following: ECN 342, 401, 402, 403, 464; HIS 323, 324, 339, 340, 341, 343, 363; PSC 460, 466, 483, 495, 498; CPL 410; FIN 331, 341; MGT 321, 422, 423; REN 310; SOC 336, 240, 242, 214; MAF 421, 432, 516. Practicum or internship experience is recommended in this major. It may be obtained through URB 397.

**Spatial Development.** This major gives the student an interdisciplinary viewpoint of the spatial structure and environmental character of the city. The curriculum is designed to focus special attention on the arrangement, allocation and interrelationships of human and physical resources. Man's relation to the urban ecosystem is examined in terms of the processes, patterns, networks and activities that produce the spatial and temporal organization of urban communities. Analytical and methodological skills may be acquired from courses in cartography, remote sensing, and statistics. The structure of the major should prepare the student to deal effectively with the increasing

problems of rapid urban growth and environmental deterioration.

Employment opportunities are available in such activities as urban systems analysis, economic impact studies, cartographic drafting and air photo analysis, industrial location and regional development, and urban environmental problems. Spatial development students should be prepared for work in organizations or agencies that handle questions such as equal allocation of resources, reduction of regional disparities in goods and services, and developing effective alternatives to problems in housing, poverty, pollution, and other human concerns. These organizations can be in either the private or the public sector.

Students are expected to satisfy the common core requirements. They are also required to select four courses from the following: HIS 399; CPL 410, 434, 520; ZOO 262; FIN 341; PSC 460, 466; SOC 214; ECN 402; MAF 421, 516; INS 313; BSL 333; CVE 315; EGR 204. Students are encouraged to acquire an internship experience.

## Women's Studies

This interdepartmental program in the College of Arts and Sciences leads to a Bachelor of Arts (B.A.) degree in Women's Studies. The aim of the program is to provide an option for students who are interested in the interdisciplinary study of the culture and experiences of women.

The Women's Studies program requires 30 credits for a major. Four required courses are: WMS 200; a statistics (e.g., EST 220, PSY 300) or methodology course (e.g., ENG 310, SOC 301, SPE 304) approved by the Advisory Committee; WMS 300; and WMS 400. Six courses to complete the concentration may be selected from the following: ART 285; ENG 260, 385; HCF 330, 420, 430, 432, 437, 505, 559; HIS 118, 145, 347; CNS 320, 401; MGT 401; NUR 150 or 260; FSN 308; PED 475; PHL 110; PSY 480; SOC 212, 242, 316, 413, 420, 430; SPE 310 (Topic: Rhetoric of the Women's Movement); SPE 420 (Topic: Rhetoric of Early Women Suffragists); WMS 350, 450. In addition to this list, there are special courses offered by various departments each year which may also be selected with prior approval by the Advisory Committee.

The Women's Studies Advisory Committee also strongly recommends that majors take an additional 18 credits in a specialized area as a minor.

A total of 120 credits is required for graduation. At least 42 of these must be in courses numbered 300 or above.

# College of Business Administration

Robert P. Clagett, *Dean*  
 Robert A. Comerford, *Associate Dean*  
 Jane M. Stich, *Assistant Dean*

The 11 majors in the College of Business Administration allow the student to develop competence in a special field of interest and prepare him or her to meet the changing complexities of life and leadership in the business community. Majors are offered in accounting with emphasis possible on governmental, private, and public accounting; finance; general business administration; insurance; management; management information systems; management science; marketing; marketing with a textiles option; personnel management; and production and operations management.

Basic courses required of all undergraduates at the University introduce the student to the humanities, social sciences, physical and biological sciences, letters, foreign language and culture, and the arts. The business curriculums develop the student's professional capabilities through a broad group of business courses with specialization in one area of study. Business programs provide a strong foundation in accounting, computer science, marketing, organizational management, personnel, industrial relations, production and operations management, and statistics. The college emphasizes the behavioral studies and computer technology to meet the needs of the business community and society as a whole. Emphasis is placed upon the total business environment as a part of the national and world economic structure. Theory, analysis, and decision-making are stressed in all areas of learning.

The College of Business Administration is a professional school and has divided its courses into lower and upper divisions. The lower division courses constitute those taught in the freshman and sophomore years; the upper division—those taught in the junior and senior years. Courses taken by transfer students at the lower division level may be applied to satisfying upper division requirements only after successful completion of a validating examination. All 500- and 600-level courses offered by departments in the College of Business Administration are open to matriculated graduate students only.

A student enrolled in this college must complete the curriculum in one of the majors and must obtain a cumulative quality point average of 2.0 or better for all required courses in the major. Students wishing permission to substitute required courses or waive other requirements may petition the college's Scholastic Standing Committee. Petition forms are available in the dean's office.

Due to limited staff and facilities, transfers from University College to the undergraduate degree programs in business administration must be limited to 340 a year. Although cumulative averages are not the sole criterion for admission, students with overall quality point averages of less than 2.2 are advised that there is little chance for admission to these programs. Students who have not satisfied entrance requirements may petition the Scholastic Standing Committee of the college for a waiver of those re-

quirements during their fourth or succeeding semesters. Students in the University College business programs who have not met entrance requirements to the college are permitted to enroll only in 100- and 200-level business courses and in non-business courses.

To ensure that students in business majors have access to required courses, upper level courses will be open only to juniors, seniors, and graduate students. A strict registration priority will be followed. Highest priority will be given to seniors in the College of Business Administration and in the major, followed by graduate students, juniors in the college and the major, seniors in the college but not in the major, juniors in the college but not in the major, seniors in other colleges, and juniors in other colleges. Students following an approved minor will be assigned as though they were in the college but not in the major.

## Curriculum Requirements

The following two years are common to all majors except marketing textiles and personnel management.

**The Freshman Year Program** is 15 credits in each semester. The sequence MGS 101-102 is begun in the first semester and finished in the second. A speech elective from Group C is taken in either of the two semesters with the balance of credits in general education.

Liberal electives are courses offered by departments outside the College of Business Administration.

Free electives may be either professional or liberal electives.

**Minor — Optional.** After choosing a major field, students may elect to declare a minor which will appear on their transcripts as a category separate from their major. Credit may be drawn from any combination of major, distribution, electives, and course-level categories. A minor may be defined as (1) the completion of 18 or more credits offered within a department and approved by the department chairperson or (2) the completion of 18 or more credits of related studies offered by more than one department and approved by a member of the University faculty, competent in the minor, and the Scholastic Standing Committee of the College of Business Administration. Students must declare their minor no later than the end of the add period of the semester they expect to graduate.

ment science is described in the *Graduate School Bulletin*.

*Faculty:* Professor Jarrett, *chairperson*. Professors Armstrong, Budnick, Kim, Koza, McLeavey, Mojena, Narasimhan, and Shen; Associate Professors Ageloff, Humphrey, and Mangiameli; Assistant Professors Chen, Ebrahimpour, and Westin.

Management science (MGS) is concerned with the development and application of quantitative techniques to the solution of problems faced by managers of public and private organizations. More specifically, theory and methodology (tools) in mathematics, probability, statistics, and computing are adapted and applied in the identification, formulation, solution, implementation, control, and evaluation of administrative or decision-making problems.

The MGS major relates to the interface between quantitative techniques and their application in the real world. Upon graduating, majors will be qualified for (1) staff positions responsible for implementing and communicating quantitative approaches to decision-making, (2) management trainee programs which lead to assignments in any of the functional areas of an organization, or (3) graduate study leading to a master's degree or a doctorate.

### Production and Operations Management

The Department of Management Science offers a curriculum in production and operations management leading to

the Bachelor of Science (B.S.) degree.

The Master of Business Administration (M.B.A.) degree with an opportunity for specialization in production and operations management is described in the *Graduate School Bulletin*.

Issues, concepts, and techniques encountered in efficiently managing the modern production function in industry and business are the main concerns of this curriculum. The modern production function is here defined in a wider sense, to include all kinds of operations which employ men and machines to produce visible goods as well as to render intangible services. A basic understanding of the management task of design and evaluation of the possible alternative operations and processes is emphasized. Practice and implications of computer-based systems and operations in management are also investigated.

The operations management major prepares students to become certified production and inventory controllers. Certification examinations are administered by the national Educational Testing Service (ETS) and prepared by practitioners in the American Production and Inventory Control Society. Coursework in the major goes well beyond that necessary for the examinations and should put the students at the forefront of the field.

Among the topics covered in the major are: forecasting, capacity planning, inventory planning, material requirements planning, and operations scheduling and control.

## College of Continuing Education

Walter A. Crocker, Jr., *Dean*  
Gerald R. DeShepper, *Associate Dean*

The College of Continuing Education offers courses and degree programs designed for adults whose family or work responsibilities have caused interruption in their formal post-high-school education. Academic programs lead to Bachelor of Science degrees in business administration; nutrition and dietetics; food science technology; home economics; human development and family studies; and textiles, fashion merchandising and design. Bachelor of Arts degrees may be obtained in economics, English, history, and psychology. The Bachelor of General Studies degree offers majors in business institutions and human studies. Graduate-level programs include Master of Business Administration (including an option for experienced executives), Master of Library and Information Studies, Master of Marine Affairs, Master of Public Administration, Master of Science in labor and industrial relations, and advanced and graduate-level courses in computer science, electrical engineering, and mechanical engineering and applied mechanics through special arrangement with several high-technology firms in the state. For curriculum requirements refer to the appropriate sections in this bulletin.

Certification programs for various professions as well as individual credit and non-credit (CEU)<sup>1</sup> courses are also offered. In addition, institutes and special courses are planned for business, industry, labor, government, and the professions.

Courses are offered on weekday mornings, afternoons, and evenings, and on

Saturdays in the fall, spring, and summer. Students enrolling in a degree program may attend at times most convenient for them. The college also operates community centers in Kingston and Middletown.

**Summer Session.** The College of Continuing Education has administrative responsibility for developing, scheduling and coordinating all summer offerings of the University of Rhode Island. Day and evening courses are offered in two five-week terms at Kingston and Providence. In addition, a number of special programs, including study abroad, are offered at varying dates in the alternate term. Students may attend either or both campuses and enroll in day or evening courses offered in any summer term. Students expecting to apply summer credit to an academic degree program are advised to obtain prior approval from their academic dean before registering. Maximum course load is 7 credits per summer term including simultaneous courses in the alternate term. Exceptions are allowed with permission of the student's academic dean.

### Bachelor of General Studies

The College of Continuing Education's own degree program, the Bachelor of General Studies (B.G.S.) is a special undergraduate program for adults who have had no formal schooling for at least five years. The B.G.S. program is useful both for students who have never been to college and for those who dropped out of

college at some point in the past. For the latter group, B.G.S. offers a creative approach to bringing forward previous educational experience and applying it adult degree program. Because the several ways to meet admission requirements for the program, the admission process begins with an interview with a B.G.S. adviser in the Academic Services Office of the College of Continuing Education.

The B.G.S. program consists of six required sections listed below.

**The Pro-Seminar.** (4 credits) This required reentry course (BGS 100) introduces adult students to the processes of academic thought and inquiry, builds confidence in their capacity to do college-level work, and helps them identify their scholastic strengths and interests. During the Pro-Seminar students are required to take the College Level Examinations Program (CLEP) General Examinations (for which there is a fee). CLEP credits may be applied toward the General Education requirements.

**General Education Requirements.** (39 credits) Students in the B.G.S. program must meet the University's General Education requirements as explained on page 8 of this bulletin. B.G.S. students may use BGS 390, 391, and 392 to fulfill General Education requirements or may take other approved General Education courses appropriate to their program.

<sup>1</sup>Continuing Education Unit.

Students should consult frequently with B.G.S. advisers.

**Majors.** (45 credits) B.G.S. students have a choice of two multi-disciplinary majors: business institutions and human studies. Each consists of 15 three-credit courses.

Both the human studies major and business institutions major allow students to take courses in several disciplines to meet their educational goals in a non-traditional way. Although the business institutions major is carefully prescribed, the student will note that the human studies program encourages the student to work creatively with an adviser to design an individualized major that meets both student needs and the general goals of the program.

#### *Business Institutions Major*

ACC 201	Elementary Accounting I
ACC 202	Elementary Accounting II
MGT 227	Business Communications
BSL 333	Law in a Business Environment
ECN 125	Economic Principles I
ECN 126	Economic Principles II
CSC 201	Introduction to Computing I
FIN 301	Financial Management
MGS 101	Introduction to Quantitative Analysis I or MTH 109 Algebra and Trigonometry
MGS 102	Introduction to Quantitative Analysis II or MTH 141 Introductory Calculus
MGS 201	Managerial Statistics or EST 220 Statistics in Modern Society
MGS 309	Production Management
MGT 301	Fundamentals of Management
MKT 301	Marketing Principles

In addition to the above required courses, students must elect one liberal elective course offered by a department outside their majors. Most courses that fulfill these major requirements are available in Providence in the evening. With careful planning, however, it is possible for students to complete approximately two-thirds of the program's requirements in evening courses at the Kingston campus.

#### *Human Studies Major*

This major requires a *social science core* of 24 credits selected from courses in economics, geography, history, political science, psychology, and sociology and anthropology (including social welfare), distributed among the disciplines as fol-

lows: four courses (12 credits) in one, two courses (6 credits) in a second, and two courses (6 credits) in a third. No more than two introductory level courses may be used, and of these only APG 203, ECN 125 or 126, GEG 101, PSC 113, PSY 113, SOC 100 or 102 are acceptable. Students must also take a *methodology course*, HSS 320 (3 credits) or, in some cases, with permission from the B.G.S. coordinator, this may be substituted with one of the following: APG 402, EST 220, HIS 395, GEG 421, PSY 300, or SOC 301. In addition to this course and the core courses, students must take a total of 15 credits in an *area of emphasis* appropriate to their degree goals. Participating departments and programs are listed below.

Psychology  
Political Science  
Sociology, Anthropology and Social Welfare  
Geography  
History  
Economics  
Speech  
Computer Science  
Journalism

Afro-American Studies  
Urban Affairs  
Human Science and Services  
Human Development, Counseling and Family Studies  
Health<sup>2</sup>  
Nursing<sup>2</sup>  
Food Science and Nutrition<sup>2</sup>  
Education<sup>2</sup>  
Consumer Studies<sup>2</sup>  
Management<sup>2</sup>  
Marketing<sup>2</sup>  
Business Law<sup>2</sup>  
Business Communications<sup>2</sup>

The fourth requirement of the major is the *major seminar*, BGS 397 (3 credits), to be taken near the end of the program.

**Electives.** (27 credits) The electives permit students to complete the B.G.S. degree in a number of creative ways, either through carefully designed work experience internships, or previous but relevant educational experience, or both. Up to 15 credits may be taken in the University Year for Action program, or students may choose to take courses to fulfill this requirement. BGS 390, 391, and 392 may be counted as electives if they are not used to fulfill General Education requirements.

**B.G.S. Senior Seminars.** Upon completion of at least 40 credits, a student may begin to take the sequence of three required 6-credit senior seminars (BGS 390, 391, 392). The senior seminars may be applied either to the General Education requirement or to the elective requirement of the B.G.S. program.

**Senior Project.** (3 credits) All B.G.S. students must complete the BGS 399 Senior Project or a departmental directed study. Students are required to meet with a B.G.S. adviser to plan a project proposal. This written proposal must meet with the approval of both an appropriate faculty adviser and the B.G.S. coordinator before the student can register for B.G.S. 399.

A total of 118 credits is required for the Bachelor of General Studies Degree.

## Fees and Finances

Charges and fees set forth in this listing are subject to change without notice. All charges are payable by the semester and are due at the time of registration. Checks or money orders should be made payable to the University of Rhode Island. For financial assistance, refer to "Financial Aid" in this section.

**Tuition and Fees.** The registration fee is \$10, payable once each semester. Rhode Island resident undergraduates pay \$70 per credit. Out-of-state undergraduates pay \$228 per credit. Rhode Island resident graduate students pay \$98 per credit. Out-of-state graduate students pay \$219 per credit.

**Refund Policy.** If a course is officially dropped before the first class meeting, a full refund of tuition will be authorized. After classes have begun, the following refund schedule applies:

<i>Fall/Spring Semester</i>	<i>Refund</i>
Before first class	100%
During first week	80%
During second week	60%

The registration fee is refundable only when a course is cancelled or closed by the University. There is no charge for adding a course to replace one dropped or cancelled.

**Financial Aid.** Only matriculated students enrolled on at least a half-time basis (6 credits) may be considered for an award. The Student Financial Aid Office determines eligibility for all grants, loans, and employment, which are awarded on an academic year basis. Financial aid will be awarded only after a student has applied for a Pell Grant and has submitted a Pell Student Eligibility Report to the Student Financial Aid Office. For more detailed information, contact a peer counselor.

## Services for Students

The College of Continuing Education provides a number of services for students in Providence and the community centers. Among these are free academic advising, peer counseling, health education, campus ministry and, at minimal cost, a testing service. Advisers are available to answer questions about registration, admissions, degree programs, and the College Level Examination Program. The peer counseling service provides students the opportunity to meet with other adult students who have been trained to help them with problem solving, including issues of minority groups and of the handicapped. In testing services, a staff of certified psychologists administers a number of psychological tests and evaluations to individuals and groups to help them make personal or career decisions.

The college also has at its Providence location a bookstore, library, nursery school, plus a comfortable student center where students and faculty can meet, talk, and relax.

## Registration and Admission

Enrollment in University courses offered by the College of Continuing Education is accomplished by completing a registration form prior to the beginning

of each semester. Being enrolled in a course is not the same as being admitted to the University. To apply for admission to an undergraduate degree program a student must follow the application procedure stated below. However, credits earned through successful completion of courses may eventually be applied toward a degree program upon a student's acceptance as a degree candidate.

Beginning Students who have been away from school for some time and have little or no coursework beyond high school are encouraged to register in one of the special entry courses. These are BGS 100, the Pro-Seminar, and WRT 123, College Writing for Returning Students.

Any adult may enroll as a non-matriculated student in the College of Continuing Education. All courses at the University are open to non-matriculated students; however, day courses at the Kingston campus are open only on a space available basis.

All information and forms necessary for registration are included in the semester course list printed two to three weeks before each term begins. The lists, containing up-to-date course offerings and fees, are available during the registration

periods, or they may be obtained through written or telephoned request.

**Application Procedures.** A student wishing to enroll in an undergraduate degree program in the College of Continuing Education does so through the Academic Services Office. An initial interview is recommended so that program options may be explored as well as the student's capabilities. A student then files an Application for an Undergraduate Degree and provides the Academic Services Office with official transcripts.

Students admitted to undergraduate degree programs should consult with the appropriate faculty coordinator concerning their major. A worksheet of courses is prepared and maintained as a checklist toward graduation requirements. It is the strict responsibility of the student to file an Intention to Graduate form with the Academic Programs Office three semesters in advance of the contemplated date.

## College of Engineering

Hermann Viets, *Dean*  
Robert H. Goff, *Associate Dean*

The College of Engineering offers undergraduate majors in chemical, chemical and ocean, civil, computer, electrical, industrial, and mechanical engineering. In addition, ocean options are available in civil and in mechanical engineering. Because the same fundamental concepts underlie all branches of engineering, the freshman year courses are quite similar for all curriculums, and the choice of a specific branch of engineering may be delayed until the beginning of either the second term, or the second year of study. Students electing one of the programs that include ocean engineering follow the curriculums for chemical, civil, or mechanical engineering for two or three years and enroll in many ocean engineering courses in the junior and senior year.

All of the engineering curriculums are based on an intense study of mathematics and the basic sciences, and of the engineering sciences common to all branches of the profession. On this base is built the in-depth study of the important principles and concepts of each separate discipline. These principles are applied to the understanding and solution of problems of current interest and importance in the field. Each curriculum is designed to provide the knowledge and ability necessary for practice as a professional engineer, or for successful graduate study, which may include law, business administration or medicine as well as the normal engineering and science disciplines.

The goal of the college is to stimulate the students to become creative, responsible engineers, aware of the social impli-

cations of their work, and flexible enough to adjust to the rapid changes taking place in all branches of engineering. Engineers from all fields are heavily involved in the solution of technological and socio-technological problems. The needs of industry are for balanced teams of both men and women from the different engineering areas.

Entering students who have chosen a specific major should follow the particular program listed below. Those who have decided to major in engineering, but have not selected a specific program, should select courses in general chemistry, General Education electives, MTH 141, 142; MCE 162 and/or PHY 213 and 285.

Students who are undecided about engineering, but who wish to keep it open as an option, should take note that MTH 141 and 142, MCE 162 and/or PHY 213 and 285, and a course in chemistry, are required for graduation from the College of Engineering, and are prerequisites for many engineering courses. They must be taken before transferring from University College to the College of Engineering.

To transfer from University College to the College of Engineering, students must not only have completed 24 credits with a grade point average of 2.0 or better, they must also have completed all of the required mathematics, science, and engineering courses of the freshman year with a grade point average of 2.0 or better.

To meet graduation requirements students enrolled in the College of Engineering must satisfactorily complete all

courses of the curriculum in which they are registered and must obtain a grade point average of 2.0 or better in all required science, mathematics, and engineering courses (including professional electives).

**General Education Requirements.** Engineering students, in common with all students in the University, must meet the University's General Education requirements listed on page 8 of this catalog. In these courses students are exposed to and challenged by concepts from the humanities and social sciences to insure that the social relevance of their engineering activities will never be forgotten. In selecting courses to satisfy these requirements, students should consult with their advisers to be certain that they have chosen courses which satisfy both the University requirements and the requirements of the Accreditation Board for Engineering and Technology. The requirements in mathematics and natural sciences are satisfied by required courses in the engineering curriculums. Three credits must be taken in the Foreign Language and Culture group, and six credits each in English Communications, Fine Arts and Literature, Social Sciences, and Letters. In two of the latter three groups, both courses must be taken in the same department. The second course may not be at the 100 level, unless it has the first course as a prerequisite or is an obvious continuation of the first.

**Freshman Year.** All engineering curriculums have similar programs during the freshman year. This provides some degree of flexibility to those students who are uncertain about their choice of curriculum. Except for the Chemical and the Chemical and Ocean Engineering majors, all engineering students take the following 16-credits in the first semester.<sup>1</sup>

- 3 CHM 101 Gen. Chemistry I
- 1 CHM 102 Lab. for CHM 101
- 3 MTH 141 Introd. to Calc. with Anal. Geometry
- 3 ECN 125 Economic Principles
- 3 CSC 201 Introd. to Computing
- 3 General education elective

Students who are still undecided about their choice of major after completing the first semester should review their choice of courses for the second semester with their adviser to be certain that they meet the prerequisites for the sophomore year.

**Accreditation.** The curriculums in chemical, civil, electrical, industrial and mechanical engineering are currently accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

## Biomedical Electronics Engineering

Because of severe staffing problems, the undergraduate program in biomedical electronics engineering is temporarily suspended, effective June 1984. No new students are being accepted into the program. When sufficient facilities and staff are available to meet student demands, the program will be recalled to active status.

The Bachelor of Science (B.S.) degree in biomedical electronics engineering is offered by the Department of Electrical Engineering. Specialization in biomedical engineering is also available within the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs in electrical engineering. See the *Graduate School Bulletin*.

Biomedical engineers design medical instruments such as electrocardiographs, electroencephalographs, blood analyzers and X-ray machines for diagnosis of disease, equipment such as radiotherapy machines, pacemakers and lasers for surgery, and develop artificial organs for prosthesis. They design computer systems

to help physicians monitor critically ill patients, to correlate a multitude of disease symptoms in order to diagnose a disease, and to determine the best course of treatment.

Biomedical engineers are employed in (1) the medical instrument industry, where they design, manufacture, sell and service medical equipment; (2) hospitals, which employ engineers in increasing numbers to select, evaluate and maintain complex medical equipment and to train the hospital staff in their use, and (3) medical and biological research centers, which use the specialized training of the biomedical engineer to apply engineering techniques in research projects.

The biomedical electronics engineering program combines study in the biological sciences with those areas of engineering which are particularly important for the application of modern technology to medicine. With a few minor elective changes the program also satisfies the entrance requirements of most medical schools, but students who plan to go on to medical school should consult the pre-medical adviser and the coordinator of the biomedical electronics engineering program.

For transfer from the University College to the College of Engineering in the Biomedical Electronics Engineering program students must have completed *all science, mathematics, and engineering courses required during the first two semesters* (see below) with grade point average of 2.0 or better.

The major requires 137 credits.

## Chemical Engineering

The Department of Chemical Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree in chemical engineering that is accredited by ABET<sup>3</sup>. A curriculum leading to the Bachelor of Science degree in chemical and ocean engineering (unaccredited) is offered in cooperation with the Department of Ocean Engineering (see page 62). The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees, also offered by the department, are described in the *Graduate School Bulletin*.

*Faculty:* Professor Rockett, *chairperson*. Professors Barnett, Estrin, Knickle, Rose, and Shilling; Associate Professors Bose, Brown, and Gray; Assistant Professor Gregory; Adjunct Associate Professor DiMeglio.

The chemical engineer is concerned with the application and control of processes leading to changes in composition. These may be chemical and physical processes, and *control* refers to achieving the desired goal at reasonable cost. The processes are most frequently associated with the production of useful products (chemicals, fuels, metals, foods, pharmaceuticals, paper, plastics, and the like), but also include such seemingly unrelated matters as removal of toxic components from the blood by an artificial kidney, and modeling the flow of exhaust gases from automobiles on the highway (turbulent diffusion and heat transfer coupled with chemical change). The chemical engineer's domain includes more efficient production and use of energy, processing of wastes, and protection of the environment.

Chemical engineers have a strong foundation in chemistry, physics, mathematics and basic engineering. Chemical engineering courses include the use of digital computers, thermodynamics, transport phenomena, mass transfer operations, metallurgy, materials engineering, process dynamics and control, kinetics, and plant design. The student has the opportunity to operate small-scale equipment to determine efficiencies and operating characteristics, and to visit chemical plants in the area. Intensive work in the solution of complex problems is given in which economics and optimization of

engineering design are emphasized.

A chemical engineer with a background in both chemistry and engineering can apply his knowledge of research and development, design, production, and manufacturing not only to the areas listed above, but to many others such as textiles, dyes, petroleum, ceramics, paint, and rubber, as well as to biomedical, biochemical, ocean, space, nuclear energy, and environmental problems and processes.

The senior year curriculum for students majoring in chemical and ocean engineering is listed under Ocean Engineering, page 62.

Programs can be designed for those interested in special areas such as material sciences, biochemical engineering, and pollution control, and in general chemical engineering. Programs for those interested in entering dental and medical schools, or schools of business administration, can also be constructed, sometimes requiring a few courses beyond the 131 regular credits.

The major requires 131 credits.

## Civil and Environmental Engineering

The Department of Civil and Environmental Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree in civil engineering and, in cooperation with the Department of Ocean Engineering, a curriculum leading to the Bachelor of Science (B.S.) degree in Civil Engineering with an ocean option. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees, also offered by the department, are described in the *Graduate School Bulletin*.

The Bachelor of Science program in Civil Engineering is accredited by the Accreditation Board for Engineering and Technology.

*Faculty:* Professor Kovacs, *chairperson*, Professors McEwen, Poon, and Silva; Associate Professor Marcus, Urish, and R. Wright; Assistant Professors Chang, Faruque, Karamanlidis, Lee, and Thiem; Emeritus Professor Nacci; Adjunct Professor T. Wright; Adjunct Associate Professors Huston and Shaw; Adjunct Assistant Professor Badorek.

Civil engineers are responsible for researching, developing, planning, designing, constructing, and managing many of the complex systems and facilities which are essential to our modern civilization. These include: water supply and pollution control systems; all types of transportation systems from pipelines to city streets; structural systems from residential buildings to city skyscrapers, power plants, and offshore platforms. Civil and environmental engineers play important roles in planning and administration with government agencies at all levels, especially those dealing with public works, transportation, environmental control, water supply, and energy.

The curriculum provides the students with sufficient background to pursue graduate study or to enter directly into professional practice in industry or government after graduation. The first two years are devoted largely to courses in mathematics, chemistry, physics, and engineering science which are common to all engineering curriculums. In their last two years students have a large degree of flexibility in developing their own programs to meet their own professional goals through the selection of professional electives in environmental engineering, soil mechanics and foundations, structural engineering, and transportation and construction.

No later than the first midsemester of the junior year each student is required to file a proposed plan of study which has been approved by the faculty adviser and the department. Professional electives and general education electives must be selected in consultation with the adviser to satisfy the Accreditation Board for Engineering and Technology accreditation requirements.

Total credits required: 136.

*Faculty:* Electrical Engineering faculty;  
*coordinators:* Professors Jackson and Tufts.

Due to limited facilities and staff, transfers from University College to the undergraduate programs in Computer Engineering and Electrical Engineering will be limited to a total of 90.

Applications for transfer to the College of Engineering will be considered in June for students who wish to be admitted for the following fall semester. Students must complete transfer applications in University College and submit them to the Associate Dean of Engineering by May 1. Admissions will be considered by the Associate Dean, in consultation with the Undergraduate Affairs Committee in Electrical Engineering. Admission decisions will be based on cumulative quality point averages in MTH 141, 142; PHY 213, 285; CHM 101, and CSC 201. Students with quality point averages of less than 2.5 in these courses are advised that there is little chance for admission to Electrical Engineering or Computer Engineering.

The Department of Electrical Engineering will no longer admit students into its sophomore courses who have not been formally admitted into Electrical Engineering or Computer Engineering.

Computers and computer-like devices have transformed society, particularly in the technologically advanced countries. Computers are usually associated with data processing and high technology control and signal processing functions such as numerical controlled machine tooling, computer-aided machine design, tomography and medical imaging, speech analysis and synthesis, and picture and data communication. Both mini- and microcomputers now play an important role in our everyday work and play environment. Word processing, paperless offices, and microprocessor-controlled games are prominent examples.

Computer engineering is concerned with the design and efficient use of large or small computers and the development of other machines and instruments which contain computers, or parts of computers, as essential building blocks, from the hand-held calculator to the large multi-terminal computer, and the programmable assembly machine. A programmable machine is one which will change its operation in response to a program or command.

Computer engineers may be employed in the design, service, operation, and sale of computer systems as well as the design, service and sale of complex machinery, instruments, and systems — such as an automated subway — which require computers as essential parts. The employers may be industrial organizations, transportation companies, federal laboratories, or local government.

The computer engineer must understand the fundamentals of computer logic and programming as well as the fundamentals of electronics and general engineering — mathematics, mechanics, electricity, magnetism, and heat transfer. Engineers use all of this knowledge to create new devices and systems which satisfy perceived human needs.

For transfer from the University College to the College of Engineering in the Computer Engineering program students must have completed *all science, mathematics, and engineering courses required during the first two semesters* (see below) with a grade average of C or better.

The major requires 130 credits.

## Electrical Engineering

The Department of Electrical Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees offered by the department are described in the *Graduate School Bulletin*.

*Faculty:* Professor Lindgren, *chairperson*. Due to limited facilities and staff, transfers from University College to the undergraduate programs in Computer Engineering and Electrical Engineering will be limited to a total of 90.

Applications for transfer to the College of Engineering will be considered in June for students who wish to be admitted for the following fall semester. Students must complete transfer applications in University College and submit them to the Associate Dean of Engineering by May 1. Admissions will be considered by the Associate Dean, in consultation with the Undergraduate Affairs Committee in Electrical Engineering. Students with quality point averages of less than 2.5 in these courses are advised that there is little chance for admission to Electrical Engineering or Computer Engineering.

The Department of Electrical Engineering will no longer admit students into its sophomore courses who have not been formally admitted into Electrical Engineering or Computer Engineering.

Electrical engineers work in all areas in which electrical phenomena are involved. These areas include communication systems, computers, control systems, quantum electronics, microelectronics, electro-optics, electro-acoustics, energy conversion, antennas and radio propagation, design of electronic devices, and bio-engineering.

Since electrical instrumentation is at the heart of modern science and technology, electrical engineers are not only employed in the computer, electronics,

communications, and power industries, but may also be found in such diverse enterprises as transportation, the chemical industry, large hospitals, medical schools, and government laboratories. By carefully selecting elective courses, the student should be able to enter any of these fields after graduation or be prepared for graduate study in engineering or physics.

The curriculum emphasizes the scientific basis of electrical engineering and the application of mathematical analysis to engineering problems. Work is required in network and systems theory, atomic physics and solid state, electromagnetic theory, and electronics. Creative use of scientific principles in problems of engineering design is stressed particularly in the senior year. Computer hardware and software development is a part of many electrical engineering courses.

Extensive laboratory work with electrical and optical devices serves to bridge the gap between mathematical analysis and the real world of "hardware." Separate undergraduate laboratories are available for electrical measurements, electronics, pulse and digital circuits, microprocessors, computer graphics, microwaves and quantum electronics, optics, materials, energy conversion, and systems. Selected students participate in advanced projects including microelectronics, investigation of optical properties of solids, optical and radio propagation, acoustics, computers, robotics, and biological instrumentation.

Electrical engineering students should note that the four-year electrical engineering curriculum allows for three credits of completely free electives which do not have to satisfy any of the General Education requirements. Although the natural science requirement will be satisfied automatically by courses specified in the electrical engineering curriculum, it is recommended that students take some additional courses in mathematics or physics for which prerequisites have been satisfied.

For transfer from the University College to the College of Engineering in the Electrical Engineering program, students must have completed *all science, mathematics, and engineering courses required during the first two semesters* (see below) with a grade average of C or better.

### Minimum Requirements

In two of the three specific groups — Fine Arts and Literature, Social Sciences, and Letters — both courses chosen must be in the same major and must be selected from a list provided by the Electrical Engineering Department. ECN 125 required in the freshman year may be included as one of the social sciences.

Cooperative work in industry carrying academic credit (ELE 495, 496) is available for a few particularly talented and motivated students who are willing to devote more than average effort to their studies and who are capable of much better than average performance.

The Department of Electrical Engineering offers a five-year B.S.-M.S. cooperative program. Academic coursework is

alternated between periods of engineering practice at companies or government laboratories selected by the department.

A total of 14 months of industrial experience is obtained in three segments: (1) 3 months, summer between sophomore and junior year; (2) 3 months, summer between junior and senior year; (3) 8 months, second semester of senior year plus the following summer: ELE 496 (6 credits).

The three assignments are usually, but not necessarily, taken at the same company. The industrial experience grows in technical complexity as the student progresses through the program, with the first industrial experience having a small technical content and the eight-month period at the end of the senior year being a junior engineering position. The student earns credit toward his or her degree for the work done and experience gained during the second and third assignments.

Students interested in this program should contact Dr. J.C. Daly, the department's cooperative work coordinator.

Students who are not in the cooperative B.S.-M.S. program may offer no more than three credits of ELE 495 toward their B.S. degree requirements. It will be credited as a professional elective or as a free elective.

## Industrial and Manufacturing Engineering

The Department of Industrial and Manufacturing Engineering offers an ABET-accredited curriculum leading to the Bachelor of Science (B.S.) degree in industrial engineering. The Master of Science (M.S.) degree, also offered by the department, is described in the *Graduate School Bulletin*.

*Faculty:* Professor Boothroyd, *chairperson*. Professors Dewhurst, Knight, and Nichols; Associate Professors Lawing and Shao; Adjunct Professors Olson, Sylvia, and Reynolds.

The industrial and manufacturing engineering curriculum is designed to provide significant strength in mathematics, basic science, and engineering science, together with a carefully coordinated set of courses of particular importance to the professional industrial or manufacturing engineer. Mathematical modeling of production systems and fundamental treatments of important manufacturing processes and assembly are included. Robotics, com-

puter-aided manufacturing, product design for manufacturability and assembly, are areas that receive considerable attention.

Students are amply prepared to pursue careers in industrial or manufacturing engineering—areas which are becoming increasingly important in efforts to improve industrial productivity in the USA.

The curriculum also provides an excellent background for further formal study at an advanced level.

The major requires 137 credits.

## Mechanical Engineering and Applied Mechanics

The Department of Mechanical Engineering and Applied Mechanics offers a curriculum leading to the Bachelor of Science (B.S.) degree in mechanical engineering, which is accredited by the Accreditation Board for Engineering and Technology (ABET) and, in cooperation with the Department of Ocean Engineering, offers a curriculum leading to the Bachelor of Science (B.S.) degree in mechanical engineering with ocean engineering option, which is also accredited by ABET. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Bulletin*.

*Faculty:* Professor Kim, *chairperson*. Professors G. Brown, DeLuise, Dowdell, Ferrante, Ghonem, Goff, Hagist, Lessmann, Nash, Palm, Sadd, Test, Viets, M. Wilson, and F. White; Associate Professors Datseris, Faghri, Henderson, and Shukla; Assistant Professor Reuber; Adjunct Professors Dunlap, McEligot, and Schenck; Adjunct Associate Professors Messier and Patton.

This curriculum provides a thorough and well-rounded foundation in basic science, mathematics, engineering science, and general education to prepare the graduate to enter a professional engineering career. The curriculum is also excellent preparation for graduate school. Mechanical engineers are employed in large numbers in every industry where they frequently assume positions of leadership. The program at the University of Rhode Island is unusually strong in providing a background in systems engineering, design, fluids, and the thermal sciences including energy and energy transfer. Computer applications are stressed throughout the curriculum. All undergraduates are invited to join the Student Section of the American Society of Mechanical Engineers which sponsors industrial plant visits, special lectures, and other activities.

The work in the first two years consists of basic courses in science (mathematics, physics, chemistry), applied science (mechanics, electricity and magnetism, computer science, theory of mechanisms), and general education (humanities, social sciences, communication).

The junior year concentrates on fundamental courses in mechanical engineering (thermodynamics, fluid mechanics, systems engineering, engineering analysis), materials science, and electronic devices. Further general education studies are also covered.

The senior year in mechanical engineering includes machine design, heat transfer, manufacturing processes, computer-aided design, and a wide variety of professional electives such as mechanical control systems, advanced fluid mechanics, advanced mechanics of materials, microprocessor applications, internal combustion engines, alternate energy systems including solar and wind energy, power plants, lubrication and bearings, thermal environmental engineering, vibrations, finite element method, and experimental stress analysis.

Throughout the program the student takes an integrated series of laboratory

courses which introduce laboratory techniques and provide practical experience with the physical and engineering phenomena being covered in concurrent courses. Digital computer techniques are included. The Academic Computer Center's IBM 4381-3 mainframe and two Prime 9955 are used. Students also use the College of Engineering's VAX-11/780 and the department's VAX-11/750 computer graphics facilities and microcomputers.

To receive the Bachelor of Science degree in mechanical engineering, the student must satisfactorily complete all the courses in the following curriculum. The curriculum shown below is for the class of 1991 and subsequent classes. Students in the classes of 1988-90 should obtain a check sheet from their advisers.

The major for the classes of 1991 and subsequent classes requires 133 credits.

Students desiring an undergraduate specialization in ocean engineering may choose the program in mechanical engineering with ocean engineering option. Students enrolled in this option must follow the program of study of mechanical engineering during the freshman and sophomore years. The junior and senior years' curriculum for this major is listed under Ocean Engineering. All students enrolled in the Mechanical Engineering curriculum must have credit for CSC 201, or the equivalent, before taking 200 or higher level MCE courses.

This curriculum totals 133 credits.

Barbara Brittingham, *Dean*  
M. Thelma Kenyon, *Assistant Dean for Administration*

The College of Human Science and Services is a people-oriented college designed to focus on the human and non-human resources needed to help individuals and groups solve human problems encountered in contemporary society. Programs in the college provide training for professionals to assess human problems and to develop the helping skills necessary for the effective delivery of human services to individuals and groups in need. These programs include both formal and informal experiences with people in a wide variety of public service settings and enable students to develop the competencies needed in the emerging field of human services.

The degrees offered by the college include: (1) a Bachelor of Science degree with majors in communicative disorders, consumer affairs, elementary and secondary education, human development and family studies, human science and services, physical education, textiles, fashion merchandising and design, and textile marketing; (2) a Bachelor of Science degree in Home Economics with a major in home economics.

The college is composed of five departments and a Division of Interdisciplinary Studies.

The Institute of Human Science and Services, the research and service branch of the college, promotes these activities in human service areas across all departments of the college. The institute conducts research in education and educational testing, lifelong learning, human transition, child development, communicative disorders, special populations,

### Division of Interdisciplinary Studies.

This division provides an environment in which faculty and students may bring together interdisciplinary programs and courses of study in human science and services. The division functions to promote and encourage the creation, implementation, and evaluation of interdisciplinary courses and programs of study taught by faculty from two or more departments within the University. In addition, the division assumes responsibility for the development, review, and implementation of programs of study which draw significantly on two or more human science and services departments. The division maintains administrative responsibility for the following programs: Home Economics (see page 66); Human Science and Services (see page 66); Consumer Affairs (see page 65); Gerontology (see page 10); and Special Populations (see page 10).

**Minors: Interdisciplinary Non-Degree Programs.** Students may declare a minor which will appear on their transcripts as a category separate from their major. Credits may be drawn from any cohesive combination of courses. Minor may be

defined as (1) the completion of 18 or more credits in any of the minors that have been proposed by one or more departments and approved by the Curriculum Affairs Committee, Faculty Senate, and President, (2) the completion of 18 or more credits within a curriculum other than the student's major, or (3) the completion of 18 or more credits of related studies offered by more than one department and approved by a member of the faculty competent in the area and the dean of the college. It is the responsibility of the student to declare and obtain approval for a minor no later than the end of the add period at the start of the senior year.

## Communicative Disorders

This curriculum leads to a Bachelor of Science (B.S.) degree in communicative disorders. In addition to General Education requirements and appropriate free electives, a major of 30 semester hours in communicative disorders includes 21 semester hours of required courses and 9 semester hours of professional electives.

The required courses are CMD 260, 261, 372, 373, 374, 375, and 376. The remaining 9 credit hours (three courses) must be selected from the four areas listed below with a limit of one course in a given area:

*Area A (0-3 credits).* Normal Human Development and Adjustment: HCF 200, 201, 450; PSY 232, 235.

*Area B (0-3 credits).* Special Populations: CMD 475; HCF 220; PSY 254, 442.

*Area C (0-3 credits).* Supportive Disciplines: EST 220; EDC 312, 424; HSS 320; LIN 201; PSY 300, 386; SPE 220.

*Area D (0-3 credits).* Honors Work, Individual Research or Special Problems within the Department: CMD 391, 392, 491, 492.

With careful early planning, majors may use free electives to achieve a double major or to explore special interest areas in depth. Students anticipating graduate study in speech-language pathology or audiology are encouraged to discuss admissions requirements and programs of study with this goal in mind. The curriculum is personalized for each student and closely supervised by the student's adviser.

A total of 120 credits is required for graduation.

## Consumer Affairs

This curriculum leads to the Bachelor of Science (B.S.) degree in consumer affairs. This interdisciplinary program within the Division of Interdisciplinary Studies provides a general background for students who wish to develop effective strategies for dealing with complex social and economic systems relating to consumer concerns. Coursework in consumer affairs is combined with selected courses in business, economics, political science and related areas. Field experience and internships are an integral part of the program.

Graduates with this degree may choose careers in consumer affairs in business, social service agencies, local or state government consumer protection agencies, Cooperative Extension Service, and consumer education.

Students who wish to be accepted into the degree program in consumer affairs, must have completed and earned at least a combined 2.0 quality point average in the following courses: MTH 109, ECN 125, 126, and CNS 220.

The following courses are required of all students; some may be used to help fulfill the General Education requirements: SPE 101, or 215; ECN 125, 126; PSC 113, 221; MTH 109, EST 408; CSC 201, MGS 207, or EST 412; PSY 113; SOC 100 or 102; SOC 204 or PSY 435; and, PHL 117, MKT 321, or MGT 380.

In addition, 30 credits of consumer affairs courses must be taken, of which the following are required: CNS 220, 320, 420; MKT 311; BSL 333; and a field ex-

perience (minimum of 3 credits of CNS 470 or MKT 491, 492). The other 12 credits must be selected from consumer-related courses selected in consultation with an adviser.

Students are also required to take 15 credits for professional electives. Selection should be made in consultation with a faculty member of the Consumer Affairs Advisory Committee.

A total of 128 credits is required for graduation.

## Education

The curriculums in elementary and secondary teacher education lead to the Bachelor of Science (B.S.) degree. The Master of Arts (M.A.) degree programs in education are described in the *Graduate School Bulletin*.

The curriculums offer a balanced program of academic preparation and professional training. The required professional courses contribute directly to understanding the teachers' role in society and to the development of teaching skills.

The following courses are required in the professional sequence for elementary education: EDC 102, 312, 371, 424, 427 and 428 are taken prior to student teaching. EDC 484 and 485 comprise the student teaching semester; EDC (MUS) 329 is also strongly advised.

The following courses are required in the professional sequence for secondary education: EDC 102, 312, 371, 430, and 448 are taken prior to student teaching.

EDC 484 and 485 comprise the student teaching semester.

The following non-education courses are required of all students and may, where appropriate, be taken to partially fulfill the General Education requirements: elementary education - PSY 113, and PSY 232 or HCF 200; secondary education - PSY 113.

All students in the department will plan, in cooperation with an adviser, a second major of 27-30 credits. Depending upon the major chosen, this may or may not be declared a "double major." The second major of secondary education students must be in the area for which a teaching certificate is sought.

Students apply to the department from University College, and should consult with a University College education adviser as early as possible since openings in the program are limited. Below are the policies and procedures for acceptance into the program.

Students may apply for admission to the program in the second semester of their sophomore year and will be accepted on a space-available basis. Applicants are reviewed by a departmental screening committee and must satisfy the following minimum requirements: 1) cumulative QPA of 2.25, 2) grades in academic major or specialization averaging 2.50, and 3) grades of C or better in each of the required communications skills courses. An interview is also required. A student denied admission to the program may petition the department for a review of the decision and the screening committee shall meet to consider the appeal.

Students must maintain the minimum grade averages specified above and attain a grade of at least C in EDC 430 and 448; EDC 424, 427, and 428 to be eligible for student teaching. Failure to maintain these averages will result in "program probation," a one-semester period during which students have the opportunity to earn acceptable grades but may not student-teach. Failure to return grade averages to acceptable standing after one semester leads to the dismissal from the program.

A total of 120 credits is required for graduation.

## Home Economics

There are three programs in home economics: general home economics, home economics education, and home economics in the urban environment. Each of the three leads to the Bachelor of Science (B.S.) degree in home economics. Interdisciplinary in nature, all three provide for academic work in all areas of home economics as well as in other disciplines. Students are prepared for a broad range of careers in business, journalism, community agencies, housing authorities, consumer protection agencies, and schools.

Students are required to take 40 to 41 credits of home economics core courses including: HCF 200, 330; CNS 220, 340; FSN 150, 207; TMD 103, 216; HSS 320; and HEC 400. Three additional credits must be chosen from specified lists in each of the areas of consumer studies, human development, food science and nutrition, and textiles.

The program in *general home economics* requires 18 credits of professional electives; these should be chosen with the adviser's approval.

Students selecting the program in *home economics education* are required to take EDC 102, 312, 371, 448, 484, 485, and HED 337.

To be eligible for student teaching, a student is required to maintain a 2.5 quality point average in home economics courses and attain at least a C grade in HED 337 Teaching Effectiveness. Failure to meet these two conditions will lead to automatic dismissal from the certification option in the Home Economics Education Teacher Program.

Students choosing *home economics in the urban environment* must select URB 210 and URB 498 or 499, three credits of quantitative methods chosen from a specified list, nine additional credits in urban affairs, plus three additional courses to be chosen with the assistance of an adviser.

Students wishing to major in home economics are strongly encouraged to meet early and often with an adviser to plan their courses of study.

## Human Development and Family Studies

The curriculum in human development and family studies leads to a Bachelor of Science (B.S.) degree. The Master of Science (M.S.) degree also offered by the department is described in the *Graduate School Bulletin*. The undergraduate curriculum provides a general background for work with children, families, and adults. Most such professions require academic work beyond the bachelor's degree for continuing professional work and advancement. Individuals with a baccalaureate degree are employed as professionals, however, in nursery schools, day-care centers, institutions and hospitals, recreational, child guidance, case work, and other community agencies. Some of the courses in this curriculum, plus certain others in education, meet the requirements for the Provisional Early Childhood Certificate in Rhode Island. The Professional Certificate requires successful teaching experience for five years and additional academic work.

Students are required to select and pass HCF 150, 200, 201, 203, or 221, 357, 330, 400 or 420, 430, 310 or 220 or 406, and 450 plus one elective from consumer studies and one from food science and nutrition. In addition, 18 credits of professional electives must be chosen with the help of an adviser; field work does not meet this requirement.

Students who wish to meet the requirement for the Provisional Early Childhood Certificate in Rhode Island should contact the Department of Education.

A total of 128 credits is required for graduation.

## Human Science and Services

This curriculum leads to the Bachelor of Science (B.S.) degree in human science and services. The program is interdisciplinary and allows students to build academic programs consistent with their personal and career goals.

The program is designed primarily for students who are interested in the broad field of human science and services along with a combination of supporting or applied areas. Career opportunities are varied and include entry-level positions in fields such as health, recreation, instruction and training, family services, and consumer services. Many professional

areas in human services require graduate study for significant career advancement; this program is also designed to serve as preparation for a variety of graduate programs. Close contact with an academic adviser is strongly recommended for students in this program.

Required coursework includes PHL 117<sup>1</sup>, SOC 102<sup>2</sup>, PSY 113<sup>3</sup>, ECN 125<sup>2</sup>, and PSC 113<sup>2</sup>. A course in ethics is strongly recommended. In addition, students complete a core in human science and services: HCF 200, 201; HSS 222, 320, 350, and a seminar. Each student in the program must also complete two option areas of approximately 18 credits each. Choices of the primary option area include: Adulthood and Aging, Child and Youth Studies, Community Health, Consumer Studies, Early Childhood Education, Educational Studies and Policy, Family Resource Management, Family Studies, Home Economics, Home Economics Education, Housing, Human Development, Instructional Communication, Recreational Program Services, and Textiles and Clothing. A wide range of choices is available for the section option area, many of which allow the student to study allied fields in other colleges at the University. Each option area has specific course requirements (some of which include natural science courses which may be taken as part of General Education); students should check with their academic adviser for a detailed description of the requirements and options.

The program requirements also include a field experience (of at least 6 academic credits), professional electives (12 credits), and free electives (13 credits).

A total of 130 credits is required for graduation.

## Physical Education, Health and Recreation

This curriculum leads to a Bachelor of Science (B.S.) degree with a major in physical education. The Master of Science (M.S.) program in physical education is described in the *Graduate School Bulletin*.

The major, which has two options, is designed for students who plan to pursue a career within the broad field of health, physical education, recreation, and dance.

<sup>1</sup>May be taken as part of General Education (Letters).

<sup>2</sup>Two of these courses may be taken as part of General Education (Social Science).

Students may prepare for certification as public school teachers (Health and Physical Education K-12) with additional study opportunities in elementary and secondary physical education, athletic coaching, athletic training, corrective and adapted physical education, and health education. For those who may be interested in other than school careers, the curriculum offers a non-teaching option with specializations in dance, physical fitness, corrective and adapted physical education, as well as in a variety of individual interdisciplinary areas.

Regardless of which of the two major program options the student is pursuing, the following courses are required of all majors: PED 217, 270, 369, 370, physical activity majors practicum (8 credits), HLT 272, BIO 101, 102, chemistry or physics (3 credits), ZOO 121, 242, 343, PSY 113, 232, and EDC 312.

All students are also required to complete a minimum of eight practicum credits. All students must take one credit

from PED 130, 230, 330, 340, 346, 347, or 430; one credit from PED 131, 133, 140, 153, 160, 233, 234, 235, 242, 251, 253, or 260; and one credit from PED 120. Students enrolled in the teacher certification option must complete five additional credits taken from the following: one credit from PED 321; one credit from PED 222 or 223; one and one-half credits from PED 115 A-H; and one and one-half credits from PED 215 A-G. Students enrolled in the non-teacher certification option must complete five additional credits taken from any major practicum or basic instruction activity course in consultation with, and approval of, their adviser.

In addition to the credit requirements in PED 115 and 215, all students enrolled in the teacher certification option must demonstrate proficiency in a minimum of four activities in each of the two courses. Proficiency may be demonstrated by (1) the successful completion of an additional major practicum course; or (2) passing a

proficiency examination administered and verified by a designated examiner; or (3) participation as a member in a varsity or club sport at the University. Participation must be verified in writing by the head coach.

Additionally, all majors pursuing the B.S. degree in physical education must complete a three-day camping experience at the W. Alton Jones Campus. All incoming freshmen should check with their University College adviser for further details. The current fee is \$50 per student, and includes all meals, instruction, and overnight lodging for two nights.

**Teacher Certification Option.** This option is designed for students seeking teacher certification in health and physical education at the elementary and secondary school level. The curriculum allows a broad exploration of subject area, but is flexible enough to provide additional areas of study in teaching, coaching, athletic training, corrective and adapted physical education, and health. Completion of the NASDTEC-approved certification program fulfills the requirement for teacher certification in the state of Rhode Island and 39 additional states.

Within the teacher certification option, the following courses are required in addition to those required of all majors: PED 295, 314, 315, 324, 380, 410; HLT 367, 377; 12 credits from EDC 486, 487, 488, 489; EDC 485, 8 credits of professional electives, and 11 credits of free electives.

All students must maintain a grade point average of 2.70 in all physical education, health, and recreation coursework prior to the student teaching semester.

**Non-Teacher Certification Option.** This option is designed for students seeking preparation for careers in community and agency settings. The option provides additional opportunity for specializations in (1) dance, (2) physical fitness, (3) corrective and adaptive physical education, and (4) interdisciplinary areas of interest.

In addition to the requirements listed above for all physical education majors, students in the non-teacher option are required to take: RCR 280, HLT 123, three credits of seminar, 12 credits of supervised field work (PED, RCR, or HLT 486), 18-24 credits of specialized work, and 16 credits of free electives.

Students selecting dance as a specialization must take PED 131, 140, 160, 242, 260, 324, 466; two credits from PED 133, 153, 233, 234, 235, 251, 253; and six

credits from PHL 355, PED 391, oral interpretation speech, theatre, art, or music course. Courses applied to this option must be in addition to the courses applied toward the major practicum requirement in dance.

Students selecting the physical fitness specialization must take FSN 207, PED 243, 275, 391, and six credits from ACC 201, 202, BED 227, HCF 150, 220, 450, MGS 207, MGT 301, MKT 301, PED 410, or PSY 103.

Students selecting specialization in corrective and adapted physical education must take PED 410, 430, one course from EDC 402, PED 275, RCR 416, one course from NUR 101, PED 391, PSY 442, and six or seven additional credits of appropriate electives, in consultation with their academic adviser.

Students who do not specialize in any of the above areas may complete a minimum of 18 credits in an individual, college, or University minor. See page 29 for a complete definition of a minor.

A total of 130 credits is required for graduation.

## Textiles, Fashion Merchandising and Design

This curriculum leads to a Bachelor of Science (B.S.) degree. The Master of Science (M.S.) program is described in the *Graduate School Bulletin*.

The major is open to both men and women with ability and professional interest in the artistic and technical aspects of the subject.

Programs of study can be arranged to prepare students for positions in merchandising of apparel and interior furnishings, the home sewing industry, museum work, consumer services, and manufacturing. Qualified students can prepare for graduate studies.

The following courses are required: TMD 103, 224, 216 or 327, 303<sup>3</sup>, 240 or 340, or 440, 433<sup>4</sup>, and CNS 220, ECN 126, 12 credits of TMD electives (6 credits must be upper-level courses); in addition, 18 credits with at least 9 credits in any one area must be selected in relation to specified professional options listed below. Students must have completed CHM 103, 105, 124, and 126 before admission into the degree-granting college.

**Fashion Merchandising.** Students choosing this area of emphasis should select 12 credits of TMD electives from TMD 222, 232, 332, 422, 432, and an additional 18 credits of professional electives<sup>5</sup> from marketing, accounting, business law, management science, management, and/or art.

**General TCRA Program.** Students selecting this area of emphasis should plan according to their professional goals such as consumer education, gerontology, family studies, journalism, or art. Eighteen credits of professional electives are required and should be chosen to strengthen professional goals of students.

**Textile Science.** Students may select a concentrated science program at the University of Rhode Island or plan to spend two semesters in off-campus study to fulfill the specialized requirements in textile dyeing, finishing, and manufacturing. By the end of the sophomore year, the student and adviser should have a program of study approved by the department. Off-campus study is currently available at the Philadelphia College of Textiles and Science (P.C.T.S.).

Students interested in this area of emphasis should select 18 credits of professional electives from 3-9 credits in MTH 111, 141, 142; 3-6 credits in PHY 111 and 112 or 213 and 214; 3-6 credits in EST 408 or 412 or CSC 201 or 202; CHM 112 or 114 or 227 or 228 or 226 or 212 or from the courses offered by P.C.T.S.

A total of 128 credits is required for graduation.

## Textile Marketing

This interdepartmental curriculum leads to a Bachelor of Science (B.S.) degree with a major in textile marketing. It combines the professional requirements of a major in textiles with the accreditation requirements of the College of Business Administration and is designed to prepare students for wholesale and retail marketing positions in the textile industry. Before admission into the degree-granting colleges, students must complete CHM 103, 105, 124, 126, MTH 111, 141, EST 408, 412, and CSC 201.

Due to limited staff and facilities, transfers from University College to the undergraduate degree program in textile marketing must be limited to only a few

more than 10 a year. Those admitted stand in the highest 10 when cumulative quality point averages are computed at the end of the third semester. Although cumulative averages are not the sole criterion for admission, students with overall quality point averages of less than 2.4 are advised that there is little chance for admission to this program. Students will be eligible for admission into the textile, merchandising and design program.

Students selecting this curriculum must take the following courses: TMD 103, 224, 303, 240, or 340 or 440, 403, 433, and three credits of TMD elective; CHM 105, 126; MTH 141; EST 408, 412; CSC 201; ACC 201 and 202; MGT 300 or 301; BSL 333; MKT 301, 415, 409, and nine credits of MKT electives.

Students must also take the following courses to complete the general education requirements: MTH 111, CHM 103, 124, and ECN 125, 126.

A total of 120 credits is required for graduation.

<sup>3</sup>Organic chemistry is a prerequisite for TMD 303.

<sup>4</sup>Economics prerequisite for CNS 220 and TMD 433.

<sup>5</sup>Professional electives are courses related to student's career goals and subject to adviser's approval.

## College of Nursing

Hesook S. Kim, *Dean*  
Dayle H. Joseph, *Assistant Dean*

The College of Nursing offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.) degrees are offered by the college and are described in the *Graduate School Bulletin*.

*Faculty:* Professors Hardy, Hirsch, and Kim; Associate Professors Castro, Feather, Fortin, Garey, McElravy, and Schwartz-Barcott; Assistant Professors Abbate, Anderson, Barden, Barnett, Burbank, Evans, Fimbel-Coppa, Haggerty, Hall, Hames, Hogan, Martins, McGrath, Mitchell, Murdock, Padula, Palm, Pickett, Rozendal, Waldman, and Yeaw; Instructors Burchard, Escher-Davis, Mattea, and Wilson.

The baccalaureate program is designed to prepare men and women with academic and personal potential to become professional nurses. It aims to develop mature, well-informed graduates who will take their places as responsible members of society in meeting the challenges of health care delivery and of continued learning.

The curriculum is based on the belief that nursing is a creative activity which provides human services for the promotion of health, prevention of illness, and care for the ill. It is interdependent with all other disciplines concerned with health. Nursing knowledge is viewed as a unique synthesis drawn from the humanities, and the natural, biomedical, and social sciences. Students use a systems perspective as a conceptual base to nursing. This conceptual approach to

nursing incorporates the whole person and his or her environment, adaptation-level theory, and nursing process. Nursing courses include observation and clinical practice in numerous hospitals, community agencies, schools, nursing homes, and physicians' offices throughout the state of Rhode Island.

There are three routes to admission to the College of Nursing baccalaureate program.

1) *Students with no previous college of nursing study* begin their preparation in University College with dual enrollment in the College of Nursing. After completion of 37-50 credits (which must include required foundation courses) with a minimum 2.2 quality point average, they may apply for confirmed admission to the College of Nursing. Priority is given to students with strong academic records and positive recommendations from faculty in introductory nursing courses.

2) *Students with college study in another major or some nursing study in another baccalaureate program* and a minimum of 45 completed credits, if accepted by the University, may be admitted directly.

3) *Registered nurse students* who have completed diploma or associate degree programs are not required to submit scholastic aptitude scores when seeking admission. As adult students who have developed competence in basic subject areas, they may demonstrate their mastery by completing the College Level Examinations sponsored by the College Entrance Examination Board. Advanced credit allowances are based upon a review of the

candidate's test scores and preparatory experience. Following direct admission to the college, students have the option of seeking credit by proficiency examination in subjects previously studied. They are required to enroll in some upper division nursing courses and to meet the remaining program specifications.

The usual time for completion of all requirements for students with no previous college or nursing study is eight semesters and one summer session. All students in the College of Nursing meet all of the General Education requirements of the University as listed on page 8. A minimal grade of C must be achieved in all required nursing courses. The faculty reserves the right to require withdrawal from the college of a student who gives evidence academically and/or personally of inability to carry out professional responsibility in nursing. The student is limited to 18 credits per semester except by permission of the dean for special program adjustments or for participation in the Honors Program.

General expenses for students in the College of Nursing are approximately the same as for all other University students. Special items include uniforms, nursing equipment, transportation, and one summer session. The use of an automobile or funds to meet public transportation costs is required during the semester of community health nursing experience, and can offer broader opportunities for experience in all courses.

The program is approved by the National League for Nursing and the Rhode

Island Board of Nurse Registration and Nursing Education. The graduate is eligible for examination for professional licensure.

# College of Pharmacy

Louis A. Luzzi, *Dean*  
Leonard R. Worthen, *Associate Dean*  
Lois Vars, *Assistant Dean*

The College of Pharmacy offers a five-year curriculum leading to the Bachelor of Science (B.S.) degree in pharmacy and a special curriculum leading to the Bachelor of Science (B.S.) degree in respiratory (ventilation) therapy. The Master of Science (M.S.) degree, offered by all departments; the Doctor of Pharmacy (Pharm. D.) degree; the Doctor of Philosophy (Ph.D.) degree in pharmaceutical sciences offered by all departments except pharmacy administration, and the Master of Science (M.S.) degree in environmental health science are described in the *Graduate School Bulletin*.

## Pharmacy

This five-year curriculum is patterned on presently accepted programs of study recommended by the American Association of Colleges of Pharmacy, the American Council on Pharmaceutical Education, and other interested organizations. It is accredited by the American Council on Pharmaceutical Education and by the University of the State of New York, Division of Professional Education.

It provides preparation for community and institutional pharmacy practice. In addition, students have opportunities through the selection of professional electives to commence a specialization in one of several areas of pharmacy, including hospital, clinical, manufacturing, medical supply servicing, drug analysis, administration, and research.

The satisfactory completion of the degree in pharmacy is one of the prerequisites for a license to practice pharmacy. Licensure is obtained after graduation by successfully completing the examination given by the Rhode Island State Board of Pharmacy or those of other states. In preparation for this, students are encouraged to participate in externship or internship programs.

Students begin their preparation in University College with a dual enrollment in the College of Pharmacy. All students requesting transfer from University College to the College of Pharmacy must have at least a 2.0 overall quality point average in those basic science courses required for transfer; viz., at the end of three semesters CHM 101, 102, 112, 114, and 227; MIC 201; MTH 141; PHY 109, 110; ZOO 111 and 121; at the end of four semesters the foregoing courses plus CHM 226 and 228; ZOO 242 and 244 (or equivalent courses, where permitted).

A student will not be allowed to proceed into PHP 485 or PHC 490 without at least a 1.90 quality point average in required professional pharmacy courses. A student with a QPA of 1.90 to 2.0 may proceed into PHC 485 and PHC 490 and other fifth-year courses on college probation. A student with less than a 1.90 QPA in professional courses at the end of the fourth year will not be allowed to take any professional courses not previously taken, but will be allowed to repeat up to 10 credits of pharmacy courses in which he or she received a C or less.

A quality point average of 2.0 in all required professional courses given by the College of Pharmacy is required for graduation with a B.S. degree in pharmacy. This is in addition to University grade requirements.

Students in certain other New England states may enroll in pharmacy under the New England Regional Student Program. See page 18.

# College of Resource Development

Gerald A. Donovan, *Dean*  
Ida D. Dunbar, *Assistant Dean*

The College of Resource Development offers undergraduate programs leading to the Bachelor of Science (B.S.) degree in animal science and technology, aquaculture and fishery technology, food science and nutrition, natural resources, plant science and technology, and urban affairs. A number of *options* have been developed within most programs to permit students to prepare for specific graduate study, further professional training or for specialized careers at the B.S. level. Entering freshmen and transfer students with fewer than 24 credits should matriculate in one of these programs as well as in University College. Students may select one of the options at the time of transfer from University College or later, with approval dependent upon favorable review by the program faculty. All undergraduate programs are administered by the Associate Dean for Programs together with the academic advisers and the program faculties.

The Resource Development faculty differs from those in the other colleges in that most hold joint appointments with the Rhode Island Agricultural Experiment Station and/or the Rhode Island Cooperative Extension Service. These units represent the formal research and public service functions of the college and are funded with federal and state monies. In addition, some faculty members have formal commitments to the International Center for Marine Resource Development and the Sea Grant program.

Graduate programs leading to the Master of Science (M.S.) degree are offered in

most departments. Several programs lead to the Doctor of Philosophy (Ph.D.) degree. ## Bachelor of Science Curriculum Requirements

All B.S. programs offered in the college require a minimum of 130 credits in three categories: general education (36 credits), free electives (12 credits), and program (82 credits).

The *General Education* requirements provide exposure to English communications, mathematics, natural sciences, social sciences, letters, fine arts/literature, and foreign language/culture as directed by the University faculty, and must be selected from the approved lists of courses for the several categories.

A block of *free elective* courses is available in each program to give students the opportunity to explore areas of knowledge that may be unrelated to their principal program.

The *program* requirements include introductory professional courses, basic sciences, concentration courses, and supporting electives. Advisory materials for each program include a list of these courses. These are available upon request from the Office of Student Affairs. Students, working closely with their faculty advisers, may shape their programs to accommodate general or specific needs and interests not represented by one of the options.

Students pursuing an *option* will encounter much more structure, particularly in the basic sciences and in the concentration requirements. The structure reflects specific admission requirements to graduate or professional programs on the one hand, and the professional requirements of an accrediting agency on the other. The additional requirements for the options are also available on request from the Office of Student Affairs.

### Animal Science and Technology

This program is for students interested in applied animal science careers. Options are available to students interested in veterinary medicine, animal sciences, and in various phases of the equine or laboratory animal industries. Those students who intend to use their study in animal science as credentials for secondary school teaching should also enroll in this program.

The program requires a minimum of 7 credits in introductory animal science and genetics; 8 credits in zoology and

botany; 8 credits in inorganic chemistry; and 3 credits in algebra/trigonometry. In addition, 9-12 credits shall be selected in basic science, 24 credits of concentration courses, and 26-29 credits of supporting electives approved for the program.

**Animal Management Option.** This option provides a broad basis in animal science. A variety of scientific disciplines, together with their practical application to animal management is available. Students usually seek employment in animal agriculture or agri-industry related positions.

In addition to the requirements of the program, option students include 6 credits of animal management in the concentration. The remaining credit requirements in the basic sciences, concentration, and supporting electives must be selected from courses approved for this option.

**Animal Science Option.** This option includes animal nutrition, physiology, genetics, and diseases. Students will normally emphasize one or more of these areas. A strong preparatory background in the basic sciences is needed. Students in this option seek employment in technical areas and/or continue their studies in specialized graduate programs.

In addition to the requirements of the program, option students must complete the following basic science requirements: organic chemistry (4 or 8), introductory calculus (3), microbiology (4). A course in animal anatomy and physiology is required in the concentration. The remaining credit requirements shall be selected from the concentration courses and supporting electives approved for this option.

**Laboratory Animal Option.** Research techniques and procedures for animal care are emphasized along with a strong background in the sciences. Students with this training and animal experience would be employed in research and teaching facilities as animal technicians, animal technologists, supervisors of animal attendants, and assistant research project leaders.

In addition to the requirements of the program, option students must complete the following basic science requirements: organic chemistry (4 or 8), introductory calculus (3), microbiology (4), and statistical methods (3). Six credits in animal management and three in animal anatomy and physiology are required in the concentration, and three credits of general

nutrition in the introductory college courses. The remaining credit requirements shall be selected from the concentration courses and supporting electives approved for this option.

**Preveterinary Option.** This option prepares students for admission to veterinary schools offering the D.V.M. degree and requires a demonstrated capability in the basic science. Because admission requirements among schools are not totally uniform and are subject to change, students should determine specific requirements of the schools in which they are interested. Those who are not accepted for veterinary training will be well prepared to pursue graduate programs in animal physiology and health.

In addition to the requirements of the program, option students must complete the following basic science requirements: two-semester sequence in organic chemistry (8), biochemistry (3), microbiology (4), general physics (8), introductory calculus (3), and intermediate calculus or statistical methods in research (3). Three credits in animal anatomy and physiology are required in the concentration. The remaining credits shall be selected from the concentration courses and supporting electives approved for this option.

### Aquaculture and Fishery Technology

This program prepares students for professional or technical careers in aquaculture or fisheries-oriented occupations. This program is sufficiently broad to allow for specialization in either fisheries or aquaculture science and technology. Students who demonstrate superior ability in the basic sciences and wish to continue their professional training can select a course curriculum that will both prepare them for graduate school and provide a broad overview in fisheries and aquaculture science and technology.

The program requires a minimum of 9 credits of introductory professional courses including natural resource conservation, fisheries or aquaculture, and resource economics; 6-8 credits of animal and plant biology; 4 credits of general chemistry; 4 additional credits of general or organic chemistry; and 9-12 additional credits of basic science from the approved course list in the Departments of Botany, Chemistry, Computer Science, Statistics, Mathematics, Physics, and Zoology. ## Natural Resources

This program gives students solid academic training in all the major areas of natural resources science and management. It is designed for those students who have a strong interest in the natural world and who are committed to the maintenance of environmental quality and the wise use of our natural resources. Options in Forest Science, Wildlife Biology and Management, Soil Science, Water Resources, and Resource Economics provide in-depth training in specific, career-related disciplines. Students who wish to obtain a broader background enroll in the Natural Resources Studies Option.

All six options require coursework in basic sciences and professional courses. The requirements vary between options, but usually include natural resource conservation, resource economics, biological, physical, and chemical sciences, as well as mathematics and computer science.

**Forest Science.** This option introduces students to the field of forestry and prepares them for further study at accredited forestry schools and at the graduate level. While this is not designed to prepare students for professional work in forestry immediately after graduation, a limited number of such opportunities do exist.

As part of their basic science requirements, students in this option must complete 3 credits of coursework in introductory calculus, an additional 3 credits in mathematics or computer science, 3 credits in introductory ecology, and 3–4

credits in basic geology. The second semester of chemistry must be organic. Courses required for concentration and supporting elective credit include: forestry (6), wildlife management (3), field botany (3), soil genesis and classification (4), statistics (3), surveying (3), and plant diseases or entomology (6). Additional courses are selected in consultation with a faculty adviser.

**Natural Resources Studies.** This option was designed for those students who wish to obtain a broader background than is possible in any of the specialized options listed above. Flexible curriculum requirements allow these students to develop individual areas of concentration, and to maximize the variety of natural resources positions for which they might be qualified upon graduation. This option is the best choice for students who plan to become certified as teachers of natural resources at the secondary level. It also provides a solid foundation for graduate study in several natural resources disciplines.

As part of their basic science requirements, Natural Resources Studies students must complete one course in introductory ecology (3) and one in basic geology (3). For the concentration area, 15 credits must be selected from upper-level offerings in the Department of Natural Resources Science. Additional concentration courses and supporting electives are chosen in consultation with a faculty adviser.

**Resource Economics.** This option offers an analysis of contemporary problems and issues facing food and natural resource industries, policymakers, and consumers. It provides students with a background in applied economics of food and natural resource industries, environmental management, and food and natural resource policy. Students receive solid preparation for professional and graduate programs in law, agricultural and resource economics, regional planning, and business administration. The program also prepares students to pursue careers in the domestic and international food supply and marketing industries, the banking industry, commercial fisheries management, and in federal, state, and local government agencies concerned with regulating fisheries, marine and water pollution, food industries, land use, and offshore oil.

All permanent undergraduate courses offered at the University of Rhode Island are listed on the following pages by subject in alphabetical order. If any subject cannot be located readily, refer to the index. Courses numbered 001 to 099 are pre-freshman and special undergraduate courses and do not carry bachelor's degree credit. Those numbered 100 to 299 are lower division undergraduate courses and those numbered 300 to 399 are upper division undergraduate courses. The 400-level courses are generally limited to juniors and seniors majoring in a field, but open to other advanced undergraduates and to graduate students with permission.

The 500-level courses, listed in this bulletin by title line only, are graduate courses with a bachelor's degree usually prerequisite, but qualified seniors and honors students are admitted with permission. For a full description of these and courses at the 600- and 900-levels, see the *Graduate School Bulletin*.

Courses with two numbers, e.g. ACC 201, 202, indicate a year's sequence and the first course is either a prerequisite for the second or at least the two cannot be taken in reverse order without special permission. If a course is also offered by another department, this information appears following the course number. The roman numeral indicates the semester the course will be offered, SS means the course is offered during the Summer Session, the arabic numeral indicates the credit hours. Distribution of class hours each week is in parentheses. S/U credit signifies a course in which only satisfactory or unsatisfactory grades are given. The instructor's name follows the course description. Courses which meet the General Education requirements are designated with a letter in parentheses, indicating the appropriate group, as follows:

- (A) - Fine Arts and Literature
- (F) - Foreign Language and Culture
- (L) - Letters
- (C) - English Communication (General)
- (Cw) - English Communication (Written)
- (M) - Mathematics
- (N) - Natural Sciences
- (S) - Social Sciences

The schedule of courses is issued by the Registrar immediately before the preregistration period for each semester and again just before registration day. The schedule of courses lists the specific courses to be offered that semester with

the time of meeting, location, and instructor assigned for the section.
