“scholarly collaboration network”
Francis Theodor Hane

Where can I get an epidemiological dataset for Alzheimer's disease patients?

I am developing a tool to predict the age of onset of Alzheimer's disease using Bayesian statistics to estimate genotype. I have come up with a proportional hazards model using simulated data based on existing literature. I am using covariates APOE4 status, sex, history of TBI, history of DM and education level.

Potentially I need two datasets. The first would be the APOE4 genotype for the subject and familial history le current age (or death) and age of onset for the subject, parents and grandparents.

The second dataset I would need is age of onset and genotype, sex, Hx of TBI, Hx of DM, and education level.

I would prefer an anonymous dataset(s). I would be happy to collaborate with someone on this project.

Proceedings of the Querying the Library: Digitization and its Impact Conference

Document Type
Conference Proceeding

Date of Original Version
10-2014

Abstract
Over the past year, the University of Rhode Island (URI) has taken some steps towards shifting the default to Open Access for both faculty scholarship and student work. First and foremost, in March 2013, the URI Faculty Senate passed a Harvard-style Open Access mandate. And in February 2013, the Library and the Graduate School began making electronic dissertations and theses openly available through URI’s institutional repository. In this presentation, we will define Open Access policies and discuss why they are important. We will give an overview of our experiences with Open Access advocacy, implementation of policies, and next steps.

Selected Works of Julia Lovett

Assistant Professor, Digital Initiatives Librarian

I am currently Digital Initiatives Librarian at the University of Rhode Island where I manage digital projects and scholarly communications initiatives, including the URI Open Access Policy. Prior to URI, I served as Special Projects Librarian at the University of Michigan, where I was a project manager for the Michigan Digitization Project and the HathiTrust Digital Library. I hold an MSI from the University of Michigan and a BA in English from Wellesley College.

DISTINGUISH YOURSELF IN THREE EASY STEPS

ORCID provides a persistent digital identifier that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized. Find out more.

1. REGISTER
Get your unique ORCID identifier Register now!
Registration takes 30 seconds.

2. ADD YOUR INFO
Enhance your ORCID record with your professional information and link to your other identifiers (such as Scopus or ResearcherID or LinkedIn).

3. USE YOUR ORCID ID
Include your ORCID identifier on your Webpage, when you submit publications, apply for grants, and in any research workflow to ensure you get credit for your work.

MEMBERS MAKE ORCID POSSIBLE!

ORCID is a non-profit organization supported by a global community of organizational members, including research organizations, publishers, funders, professional associations, and other stakeholders in the research ecosystem.

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the Web of Science and is ORCID compliant, allowing you to claim and showcase your publications from a single one account. Search the registry to find collaborators, review publication lists and explore how research is used around the world.
