**LIBRARY IMPACT STATEMENT
LIBRARIAN'S ASSESSMENT**

Course: EEC 3XX *The Economics of Climate Change*

Department, College: Environmental & Natural Resource Economics, College of the
Environment and Life Sciences

Faculty Member: Prof. Corey Lang

Date returned to Faculty: 15 February 2012

Librarian Completing Assessment: Prof. Andrée J. Rathemacher

The Library Questionnaire for Faculty for EEC 3XX *The Economics of Climate Change* states that, "The current resources that the library offers... are sufficient," and that course readings that are not freely available online will be posted in Sakai. The professor will consider scheduling an instruction session with a librarian if students need help finding sources for their group presentations and short writing assignments.

Based on this information, a review of the syllabus, and a telephone conversation with Professor Lang, I have concluded that the University Libraries can support the teaching of EEC 3XX *The Economics of Climate Change* with no additional resources. In my role as Subject Selector and liaison for the Department of Environmental and Natural Resource Economics, I support the addition of this course without reservation.

Andrée J. Rathemacher
Professor
Head of Acquisitions, University Libraries
Subject Selector for Environmental and Natural Resource Economics
