Why’d we do that?
Everyone who is now sitting down could be a target for LGBT hate crimes. All the statements we have read off were actual items perpetrators used to target LGBT people. This exercise shows that hate crimes do not have rationales behind them. The reasons people have given to discriminate against the LGBT population are often very arbitrary.

For those of you still standing, we have only named a few things people have given to target the LGBT population. It is possible that you may be sitting down if we read additional statements. It is also possible that you have recognized these as reasons people target the LGBT population and have either intentionally or unintentionally avoided behaving according to these statements. This is just some food for thought for you to consider.
