PHI KAPPA PHI HAS INITIATION

Virginia Colling's Petition Presented; Sorority Ruling Changed

On April 1, Phi Kappa Phi held one of the busiest meetings of the year, being concerned primarily with the initiation of new members, the consideration of a new chapter at William and Mary College, and the revision of the sorority membership rule.

The society's recent elections added from the faculty, Professors Marshal H. Tyler and Helen E. Peck, who were accepted on their graduate work done at Brown University and their sincere service rendered continually at Rhode Island State College. Selected from the student body were William F. Lucker, '25, Stella Cohen, '25, Milton H. Bidwell, '25, each of whom had an average above 87 for three years, and William J. Snow, '25, who had an average of 86.6 on a three and a half-year basis. These scholars were given their initiation thus becoming full-fledged members.

A petition from William and Mary College of Williamsburg, Va., for a

"SKUNK CABBAGE" ON PROGRAM

Biological Society Meeting Brings Tidings of Spring

A biological meeting was called to order by the president of the society, Willis Snow, and the business of the evening was then taken up and disposed of. The minutes of the last meeting was read by the secretary, George Young, and approved. Then the speaker of the evening, Dr. Brown, was introduced and the meeting turned over to him.

"Harbingers of Spring," was the topic of his talk. He had collected numerous specimens of plants from the neighborhood with which to illustrate his lecture. He was very entertaining with witty remarks upon the effect of spring on the students, especially the co-eds. He spoke of the many ways in which different people claimed that spring was at hand, telling of the ground-hog, the birds, the cats, the trees and the plants. On these last forms, he deliberated, showing the growing buds, the opening leaves, the new shoots and all the other ways in which nature proclaims that spring is here.

The large number of sprays which he had collected helped greatly to show, and to make more interesting, the things he spoke of. The last plant that was shown and passed around was a "skunk cabbage," which broke up the meeting both literally and actually.

The society tended him a rising vote of thanks for his interesting talk and then adjourned.

VARSITY BUSILY PREPARING FOR BASEBALL OPENER WITH SUB BASE

Fine Points of the National Game Stressed by Athletic Mentor; Varsity Squad to Be Cut; First String Men to Stay Over During Easter Recess

Varsity baseball has shown considerable increase in form during the warm days of the past week. Coach Keaney is working the boys to get them in their best condition, for the baseball season will prove to be a strenuous one and is to open with New London Sub Base, April 14, at New London.

The practice during the past week consisted of ball-pen pitching by the Varsity twirlers, with the Freshmen mound artists taking a workout once in a while, and hit-and-run playing on the offensive, with both Varsity and "Frosh" hitting the ball. It seems that the "Frosh" and B-Varsity men are trying to register a great number of safeties and are losing some of the characteristic pre-season swing-and-miss game.

The athletic mentor stressed the defensive points of the game, having the catchers nipping would-be base stealers at the coveted sacks. However, some of the boys are too wary and take to pilfering like the proverbial duck to water. Hence, another base-stealing team is predicted.

The outfielders are gradually bringing their arms into shape and the few men who score from third on an outfield put-out had better watch out, for many will be caught at the plate with coming warmer weather.

The twirlers who are showing real ability on the mound are Lamont, Grigo, Turner, Harrington and White. "Bozo" Lamont has had previous varsity experience, while Grigo starred on last year's freshman team. Turner, Harrington and White are developing in fine shape and should give some real opposition to the other two mainstays.

For backstop, old reliable McKenzie is making a no-opposition fight.

"Mac" is speedier than ever and aims to get his name in the base stealing column this year. Lamb, Manser, McLean and Levinson are battling for B-Varsity honors, and with a little more development should prove to be valuable men.

At first "Att" Wright, last year's heavy slugging premier sacker, is rapidly rounding into form and great things are expected of the local lad.

Al Makin, at second, played a little less tenaciously during the past few days. We hope Al picks up a little more speed. His playing was effective but lacked a little of the old ginger he displayed the week before.

Shortstop and third are at present an unknown quantity. Asher is making a good bid for the short field, but loses the confidence of the athletic mentor and his fellow players by his spontaneous bursts into what the coach terms "unnecessary movements." For the sake of R. I. "Firpo" is going to work hard to down the desire to have some private enjoyment and will make bids for first string honors.

Some of the other fellows on the B-Varsity infield are Hickey, Mycock, Oatley, Sandberg, Ferguson and Laycock.

The outfield is well taken care of by Pinto, last year's star centerfielder, in left, Nye in center and Patterson in right. The other candidates are Smith, Erickson, Siuta and Beauregard.

The coach is expecting to make a cut in the squad and thus make it easier to handle. He expects to cut the team down to eighteen men. He intends to have these men stay at college during the Easter vacation and work them to form for the Sub Base game to be played on the first afternoon after the seasonal holidays.

CHI OMEGA WINS CO-ED B. B. MATCH

Chi O. Defeats Sigma Kappa in Inter-Sorority Basketball; Hard Played Games

Two of the most interesting Co-ed basketball games of the season were played Monday and Tuesday of last week between Sigma Kappa and Chi Omega. The players on both teams were of equal ability and each put forth her pramont efforts for the cardinal of Chi Omega and the lavender of Sigma Kappa.

The first game on Monday was an even match. "Evey" Burdick kept the points adding up for Sigma Kappa, yet in the last few minutes of the game Duggie, playing opposite her

"FROSH" BASEBALL GOING STRONG

Squad to Be Cut This Week; Much Spirit Displayed by Freshmen; Season to Open Soon

The Freshman baseball squad is rapidly rounding into condition under the auspices of Coach Frank Keaney. The squad, composed of about 30 hard-working and spirited Freshmen, has been reporting daily to the athletic field for batting, fielding, base-running, and sliding practice with the varsity.

Although the Freshman squad lacks he finesse of regular first year players, the men are all eager to learn, and, as the coach has been devoting special time to them, it is expected that they

R. W. JENNINGS, STATE TREAS. SPEAKS THIS WEEK

Prof. Barlow Presides; Proposed Athletic Field Is Given Students' Support

Prof. Barlow presided over the assembly exercises of April first, in the absence of Prexy.

The principal speaker was Hon. Richard W. Jennings, state treasurer of Rhode Island. He talked upon the State College as an investment in citizenship, saying, "The state maintains this college and gives you this education as an investment, and expects a return in citizenship, in better manhood and womanhood. You become walking advertisements of this college in all you do, and you are cheating the state which has invested in you if you do not do the very best of which you are capable."

Mr. Jennings spoke briefly of the
(Continued on page 3)

"THANK YOU, DOCTOR" DRAWS LARGE AUDIENCE

Players Do Commendable Work; Coaches Deserve Credit

Phi Delta was pleased with an unusually large and appreciative audience at the presentation of "Thank You, Doctor," a one-act play, April 3.

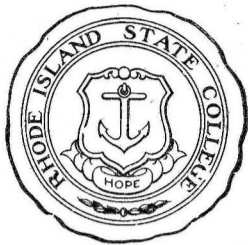

Approximately two hundred and fifty people for the most part students, crowded the Lippitt gymnasium. The play, though short, was one with modern pep, full of critical moments. Marion Stevens, '27, taking the part of Mrs. Lester, acted the bobbed-hair thief with excellent expression and action. Evangeline Diamond, '27, as Nurse Grey, made a pleasing appearance and carried her part very well. Acting as Denny Cort, a jewelry agent, Milton W. Collis, '28, interpreted the fast and responsive actions required in an experienced way, but in so doing he had the commendable co-operation of Paul F. McCabe, '28, who played the part of doctor. Appearing as a lunatic, but in the real role of a detective, was Dan Davies, '28, his frantic exits were real sources of amusement for the audience.

The success of the play was due in no small degree to the constant work of the coaches and directors, consisting of Walter Fenner, Jr., George L. Young and Vera Swan. So well liked was the presentation that arrangements are being made to have a reproduction for the Peace Dale Odd Fellows in the near future.

From 8:30 to 10:30 dancing was enjoyed to snappy numbers by Ban-Att's orchestra.

BOOST RHODY

In a few days our college worries, for some of us will be over because of the fact our Easter vacation is here. No doubt there is all sorts of amusements waiting for us which will be delightfully enjoyed in the five days of recreation that we have.

Those of us who are not so fortunate in getting home more often will make a special effort at this time to do so, which will break the long period from now until June. To some of us the period of recess is not long enough, as it does not enable those students living far distant to get home and see the folks. Then, of course, there is a group that say it isn't long enough simply because they can not "step around" to as many places of entertainments as they are desirous of doing, which goes to show everybody is bound to criticize in some manner of form.

To those who are knockers. A few "don'ts" may at this time be in order. Don't be a knocker, be a booster; don't drag down your campus activities, talk them up on the campus as well as when you are away; don't "rag" to "profs", be willing to accept what they have to give you in the way of knowledge; and for heaven's sake don't find

fault with your Alma Mater, if you do you are no supporter of R. I. and you will never see any good that is done here either by "Prexy," faculty, students or alumni.

Today we do hear a knock, however, and that is the knock of opportunity. Before us is the opportunity, shall we accept it?

We have heard of the plan as outlined by one of our active students in regards to the possibilities of a new athletic field. There is no doubt about it, we need such a field up near our college halls and a much better constructed one.

Several of us have been asked to work or contribute towards this project of construction. The majority of the students showed the "old spirit" when asked and others did not. If you who are kicking wish to see better developments take place you had better change your viewpoint because only thru your spirit and co-operation can our Alma Mater grow in the right way. Let's go and boost "Rhody."

Opportunity knocks, 'tis often said,
Once at each heart and door;
Today we believe he boosts instead,
His knocking days are o'er.

NEW ATHLETIC FIELD FEASIBLE

There is a movement on the part of many students in favor of having a new athletic field. We have an ideal spot for such a field on the land back of Science Hall. The college has recently cleared this plot of the small trees and shrubbery that made it impassable, and the time is ripe for such a project being started. It has been a complete waste to have this large tract of land unused as it could be turned into an excellent athletic field at a comparatively small expense for the field is nearly level. Almost every person coming down to the college has asked why the land has not been used, as it is near the center of the college grounds and could be used to advantage in the erection of new buildings, an athletic field or sites for fraternity houses. But what better use could we have for it than for an athletic field?

The present field is too far from the college proper to be practical. In fact, we have to use our quadrangle for baseball practice, military drill, and other uses, which should be carried on upon the athletic field and is not because of the inconvenience of time it takes to reach it. Whenever there is an athletic event carried on with other colleges, the visitors receive a poor impression of the college because of the bare, deserted athletic field. They get a disintegrated idea of our real college life, but, if the land back of Science Hall was our athletic field, they could see what the college is really like, as this field is centrally located.

There is plenty of room on the land in question for a separate gridiron, baseball diamond, cinder track and a number of tennis courts. The use of this land for an athletic field would preserve our quadrangle and give the students a better opportunity to indulge more in athletics.

Under the leadership of Adonis Patterson, '25, and Spencer Manser, '25, this movement is making rapid headway, and there are excellent possibilities of R. I. State having an athletic field within a short time, that will compare favorably with those of other colleges. All this movement needs is a little encouragement from the student body, as many of the

faculty members are strongly in favor of it, especially Coach Keaney and Captain Hammond, who have been doing a great deal of work on the project.

SOCIAL ETIQUETTE CAN BE IMPROVED AMONG STUDENTS

Actions of Some Students Said to Be Deplorable; Chaperons Desire Courtesy

To the Editor of the Beacon:

I had the pleasure of attending the Pan-Hellenic dance last Saturday in Lippitt, at which time I observed a deplorable bit of discourtesy or thoughtless neglect on the part of some students. At the conclusion of the evening, a number of couples stampeded madly out the door and down the stairs without observing the customary courtesy of bidding goodnight to the chaperones, in spite of the fact that the chaperones were very conveniently situated near the door, and in spite of the good example set by those couples who did speak to the chaperones as they departed.

Such action cannot be excused on the grounds of forgetfulness. There is never any excuse for discourtesy; and moreover, the delinquents need only to have looked around them a little to have observed and taken their cue from those who were doing the right thing. Bidding goodnight to the chaperones at a dance is not only a well-recognized custom, but a well-deserved mark of respect to those older men and women, who, often at the expense of a boresome evening to themselves, are present by invitation to lend dignity and authority to the dance.

During the two years that I have been an instructor at the University of New Hampshire, I have attended a number of student dances, but never in all my experience there have I observed dancers so indifferent to the dictates of good breeding as to depart at the end of the evening without paying their respects to the faculty chaperones. The contrasting situation at R. I. S. C., if Saturday's episode was at all characteristic of dances in Kingston, is unfortunate. It is deplorable that a few careless or indifferent individuals should conduct themselves so as to reflect discredit not only upon their own good manners, but upon that of the entire student body. As an alumnus of R. I. S. C., I naturally cherish high ideals for the conduct of her students, and it is for that reason only that I take the liberty of writing this letter. I believe that R. I. undergraduates will measure up to what is expected of them socially, when they realize the importance of so doing, both for courtesy's sake and for the effect of the impression made upon the observer from off the campus.

IRVING L. CHURCHILL, '22

It's an ill wind that blows up Hurricane Alley.

All persons desiring the use of a curious prehistoric specimen known to the chemists as "The Campus Steed" will apply to "Buck" Whalen.

Platonic Love—An arrangement in which a man and woman attempt a correct imitation of a pair of icicles—and never succeed.

INTERCOLLEGIATE

Smith College maintains a unique institution which is exceedingly popular with the girls. This is a "lost and found room."

It began twenty-five years ago in an out of the way corner of a cloak room and has since grown into such importance that part of the basement of Seelye Hall is given over to it.

The room is systematically arranged for the placing of all sorts of articles, shelves for books and papers, and drawers in the counter for wrist watches, fountain pens and small articles. Handkerchiefs are sent to the college laundry and if, when they return there are any identifying marks, they are put in boxes bearing the students' initials who presumably lost them.

One article having the least value seemingly in the eyes of the young ladies is the umbrella. Over a hundred were left and not claimed last year.

At the annual Christmas sale of the college all unclaimed articles are sold. About \$350 was realized on the sale of the unclaimed articles last year. All those not purchased are sent to a charity organization.

Massachusetts Agricultural College—Eight hundred high school teachers and students will be guests of the college on Saturday, May 2, at the 16th annual high school day.

Phi Beta Kappa—the first Greek letter fraternity in America was founded in 1776 in a small college in Virginia by five students. There are at the present time in every important college in America, chapters of Phi Beta Kappa. One present membership numbers 40,000.

In Bates College—the department of chemistry has, during the past three years, developed a scheme to enable all the members of that college who are majoring in chemistry to perform a good deal of research work along an organic line. The work is done during the second semester of the senior year. One idea underlying this policy is "to enable the students to think for themselves, to develop resource and initiative and give them confidence in their ability to handle problems in chemistry."

Michigan University—In the opinion of Joseph A. Bursly, dean of the college, the increase in the use of automobiles by the students will tend towards "waste in time."

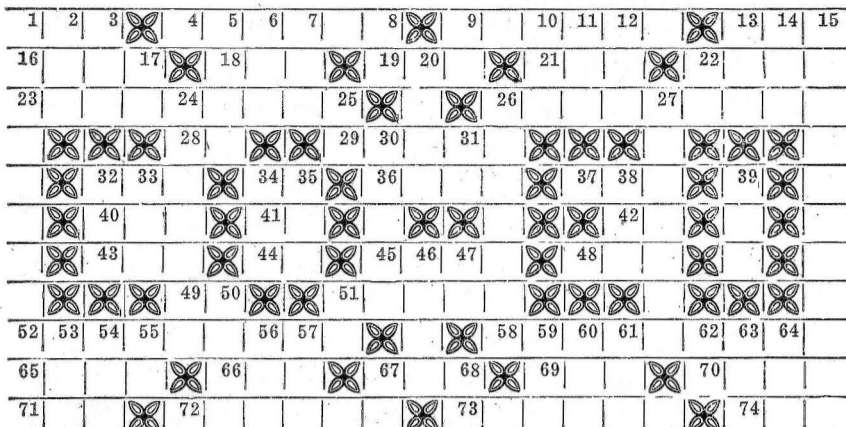

The following are the words of the dean on the subject: "The use of automobiles by the university student, except in rare cases not only cause the student to waste time but also gives growth to forms of extravagance and increase practices which besides distracting the students' attention from the real purpose for which he came to the university involves moral risks. Although the university authorities do not prohibit the use of automobiles by the students, they are firm in the opinion that the average student is not benefited by their use. Two years ago the late President Marion L. Burton sent out letters to the parents of all students, explaining to them the dangers and temptations that their sons and daughters were subjected to by the use of autos, and stating clearly the universities' stand on the subject.

Jake—How about a little bridge?
Ted—That's what Caesar said.

- 63 Ignited.
- 64 Suffix for full of.
- 67 State near Georgia (abbr.)
- 68 Who gives milady pin money?

FEATURE

"CUTS"

(G. H. A.)

Strange is the madness which thrills us tonight
 As we whirl o'er the smooth, polished floor,
 And as if in a dream we weave in between
 The dancers who glide past us only half-seen:
 While the stags stand like ghosts by the door.
 Thru my brain throbs the dull thud of tom-toms,
 And the wail of the muted cornet,
 While the mad, minor moan of the saxophone
 Mingles its tremulous, exotic tone
 With the whine of the clarinet.

The scent from your hair fills my nostrils
 Like an incense from altars divine,
 While too closely you cling as we whirl, dip and swing;
 And your whole soul with utter abandon you fling
 To the spirit of dance and of wine.
 The spirit of jazz and the spirit of wine!
 And too soon there comes the gray dawning.
 Passions primitive fly as we two say goodbye:—
 Then I wend my way room-ward with many a sigh,
 And I'll take many "cuts" in the morning.

A suggestion has been made to this department which will be interesting for the students to consider.

A great deal of labor will be required to clear and level the terrain of our new athletic field. It has been proposed that thru proper authority a day be set aside, classes be called off and the land be divided into plots and a plot to clear and level be given to each group on the campus. If we work from eight o'clock in the morning 'til sundown a great deal can be accomplished and much expense saved the college. A picnic lunch could be served at noon and a real feed with speeches in the evening. Alumni, of course, will be in on it. In the evening we could go over to Lippitt and dance.

This plan is an annual affair at some colleges and is very successful. Think it over! Let's have some expressions of opinion.

Ook: "When I marry I'm going to get a girl who can take a joke."
 Ook-ook: "Don't worry, that's the only kind you'll ever get." Ex.

Why the predominance of red ribbons in place of the blue and white caps?

An ideal professor:
 Never holds class over overtime.
 Is occasionally seven minutes late.
 Sometimes fails to make an assignment.

Grades high.
 Gives few and easy quizzes.
 Once in a while dismisses class very early.

Talk much and asks little. —Ex.

Jack: "Your lips are like red apples."
 Jane: "Stop! They are for exhibition purposes only." —Ex.

A word to the boys: Keep that school-girl complexion off your coat collar, fellows. —Ex.

**R. W. JENNINGS,
 STATE TREASURER,
 SPEAKS THIS WEEK**

(Continued from Page 1)

early history of the college, of the opposition to its beginning and of the difference in emphasis which made its separation from Brown university imperative in order to secure the desired results, and pointed to its constant development as an indication of the place it fills in the state.

"I believe that a college of this kind is one that will turn out young men and women into doers, not dreamers," Mr. Jennings continued. "The present age is increasingly the day of the college man. This college can furnish you nourishment for mind, spirit and soul, it can bring your social independence and develop your adaptability, if you refuse your ideals and standards to be lowered in the changes of growth, and will make the use of your opportunities that the state has a right to expect."

Willis J. Snow, '25, spoke concerning our new athletic field. "You have just listened to Mr. Jennings' speech telling of the remarkable growth of our college. We have not ceased growing yet, and one good sign of our growth is the need of a new athletic field." The student body unanimously voted to cooperate in this plan and signified their willingness to each give a small amount of time and money.

**"FROSH" BASEBALL
 GOING STRONG**

(Continued from page 1)
 will be able to place a smooth-working baseball nine on the field for their first game which comes within a few weeks.

Because of the inexperience of the men, the coach has decided to cut the squad to about 15 men before the Easter vacation. By these means he will be able to give each man individual attention and will then be able to pick his first team to the best advantage. The squad will probably find it necessary to remain at school during the Easter vacation for practice.

The Freshman squad deserves commendation for the spirit they displayed in answering the call for baseball candidates.

**A WARNING
 (To Freshmen)**

That little cap of azure hue
 Beneath its white round button is
 And signifies the Freshman's rank
 Where e'er the Alma Mater's his.

The time is ripe for Sophomores now
 To sneak around and take your caps.
 Be on your guard and have great care
 Or else you'll mix in many scraps.

I've noticed many "Froshes" who
 Are wearing ribbon strips of red
 For I believe they've lost their caps
 Or else they shrink from what they dread.

But make your motto: Be alert,
 Keep opened ears and watchful eyes,
 Be cautious where you walk or eat,
 And with your words and hands, be wise.

S. H. B.

Psychology Note: Many of the femmes that the garças think to be lemons, although really apples, consider themselves prunes which are bobbed-haired peaches.

Mechanism Prof (explaining mechanism): "You will perceive that this machine is run by a crank."

RHODY SECURES HIGH HONORS AT BOSTON

E. Christopher Places Second in Horticultural Contest

March 27 found Rhode Island State's flower-judging team at the Massachusetts Horticultural Hall, Boston, in competition with Massachusetts Agricultural College, Connecticut Agricultural College and Cornell University.

Though Rhody's representatives only placed in third place according to team standing, they brought high honors in the individual scoring. Everett P. Christopher with 5½ points was a close second to Mr. Sniffen of Massachusetts, who led by a six point total. Mr. Miles of Connecticut was third, but even he was hard pressed by Miss Evangeline Diamond, who was credited with three points. Lawrence P. Remington received two points.

The purpose of this contest is to increase interest in flower shows and produce ability in the discrimination of horticultural products. The judging, however, was limited to carnations only. The students took full advantage of their opportunities by reviewing myriads, the richest and rarest of flowers, including orchids, azalias and roses.

The Rhode Island team, as was each of the others, consisted of three mem-

bers and an alternate, which position was filled by John Perry. Carrick E. Wildon, instructor of Horticulture acted as coach. This is the second year Rhode Island State has participated in such an event. In the first contest Rhody came through by tying an opponent for second place in the team standing.

**PHI KAPPA PHI
 HAS INITIATION**

(Continued from page 1)

Phi Kappa Phi chapter there was also presented. It is interesting to note that the applicant is the home of Phi Beta Kappa, the oldest honorary society in America. If the petition is granted the resulting chapter will number thirty-nine.

Due to the tendency toward small memberships, the former requirement that sororities have at least fifteen members in order to compete for the scholarship cup, was reduced to a minimum of ten. The fraternity requirement remains at fifteen.

It will be recalled that by virtue of Zeta Phi Alpha gaining permanent possession of the Burchard cup, there came the present substitute of the Adams cup, given by Professor George E. Adams. The girls are now competing for the Edwards cup, which was presented by Alice L. Edwards, Dean of women.

Later in the year the society will make further elections on a four-year basis of students eligible.

RIFLE TEAM BOWS TO OHIO STATE

Continuing their slump, the Rhode Island rifle team dropped a match against the Ohio State University of Columbus, Ohio, by the score of 3637 to 3347. The Rhode Island team was distinctly off form, as they were weak in every position. E. K. Johnson was high man with a total of 357 points, and was closely followed by N. B. Grant, who scored 348 points. J. J. Galeshaw, a recruit, made the best standing score of the match, getting 86 out of a possible 100.

The comparative scores follow:

Rhode Island State College Rifle Team Name	Prone	Sit	Kneel	Stand	Ttl.
Johnson	96	93	93	75	357
Grant	92	96	85	75	348
Sandberg	98	95	74	79	346
Gilnes	93	88	92	72	345
MacCliffe	94	86	81	82	343
Gay	95	95	85	59	334
Harrington	91	86	82	67	326
Leigh	96	95	66	67	324
Fine	92	90	79	52	313
Hill	94	81	76	60	311

Total 3347

BUSINESS MEETING HELD BY Y. W. C. A.

Annual Business Meeting for the Election of Officers

The Y. W. C. U. held its annual business meeting Thursday evening, April 2. The principle business was the election of officers for the year 1925-1926. The following were elected: Florence Straight, president; Evangeline Diamond, vice president; Hazel Kimber, secretary; Olive Allebaugh, treasurer; Lillian Blanding, chairman of social committee; Marion Stevens, chairman of publicity committee; Jean Robertson, chairman of world fellowship committee; Miss Tucker and Mildred Negus, finance committee; Miss Taylor, advisory board; and Betty Ramsbottom, pianist.

The reading of the reports of the year 1924-25 followed. The meeting adjourned at 7:30.

E. E. MEETING

At the weekly meeting of the A. I. E. E. held on Wednesday, April 1st, the Electrical Engineers were entertained by an illustrated lecture given by Mr. Lucker. He spoke for an hour, going into details of the 220-volt transmission lines in California. The lecture consisted of a description of the topography of the west coast and its adaptability for hydro-electric power. There followed a description of the Pit River and Hot Creek generating stations. The 220-volt transmission line between Pit River and San Francisco was described and the various transmission problems and transformers were explained. Mr. Lucker's talk was well illustrated with slides of maps, photos and diagrams.

RHODY'S EXTENSION STUDENTS GRADUATE

Course in Real Estate Much Enjoyed; Under Auspices of Pawtucket Chamber of Commerce

President Howard Edwards and the college orchestra took a trip to Pawtucket, March 27, the former to award certificates to some twenty extension course students, who had completed a course in Real Estate practise, the latter to furnish music for dancing during the social hour.

This course which is managed by the Pawtucket Chamber of Commerce is being taught according to the extension course requirements of R. I. State College. Prof. Charles L. Sweeting, head of the Business Administration course, has direct charge of the work and arranges for lectures, text books, assignments and examinations.

Under the direction of Instructor Cecil Brown, the college orchestra, consisting of Milton C. Epstein, E. Owen Lowe, S. Harry A. Brenner, Robert Asdikian, Russell Wirketis, rendered snappy dance numbers, which were exceptionally well received.

Hear ye! Hear ye! Great wax-chewing contest in Physiological Lab. yesterday. Details later.

Evolution—A clever trick performed by one Darwin, who made a monkey out of Adam.

Advertising in College Papers

—is like radio broadcasting which is delivered to an unseen audience, and the "broadcaster" knows nothing of the message registration unless responses are sent in.

In December the John Hancock ran in this paper an advertisement headed "Do College Students Read Advertisements?" Here are some of the responses:

"Your advertisement in the Dartmouth was an unusual one, and I want to express my approval."

"If there were more ads like

the one you ran in the Princetonian this morning it would be a pleasure to read a paper of nothing but ads."

"The students here in Hanover not only read the advertisements but also patronize the advertisers."

"The advertisement in the Illini is written from the college students' point of view. I believe in insurance because of the sound economic principles which underlie it. There remains then only the kind of policy and the company. What have you got?"

The John Hancock Mutual is particularly interested in insuring college men and women and obtaining ambitious college graduates for the personnel of its field staff.
