**LIBRARY IMPACT STATEMENT (New Course Proposal)**  
**LIBRARIAN'S ASSESSMENT**

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: NRS 432

Department, College: Natural Resources Science

Faculty Member: Professors Alissa Cox & Jose Amador

Date returned to Faculty: October 6, 2021

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

---

This new 3 credit course is titled "Principles of Onsite Wastewater Treatment" and the Professor expects the students to conduct research using library materials. There will be two assignments that will need access to research materials that are readily available, according to the Professor.

We are able to add any monographic needs which might arise for the instructor. Our monographic holdings in wastewater treatment and environmental systems are good and any additional materials can be garnered through interlibrary loan.

Access to journals, such as Water & Wastewater Treatment (now called Utility Week), meets the needs of the course. Our online indexes and abstracts in environmental sciences generally should more than meet the demands that are required here. Access to reference databases such as GeoRef, Scopus, and the more general Academic Search Complete are available. Our current holdings in this field seem sufficient.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
