For this face-to-face course, students will conduct research, producing numerous short papers and a final paper. All of the journals listed on the Library Questionnaire are either held by the Libraries or are open access. According to the Library Questionnaire, no supplementary library resources will be required.

I would recommend including the Libraries' contact information for research help, including email and virtual help. That information can be found here:

Based on the Libraries' New Course Proposal form and a review of the syllabus, in my role as subject selector, I conclude that the Libraries can fully support this course through existing resources.
