LIBRARY IMPACT STATEMENT (New Course Proposal)
LIBRARIAN'S ASSESSMENT

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: NRS 326

Department, College: Natural Resources Science

Faculty Member: Professor Tolani Olagundoye

Date returned to Faculty: March 26, 2021

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

This 3-credit lecture based course is titled “Global Environmental and Health Crises Leadership” and the Professor expects the students to conduct some literature review of current resource in the subject area in order to complete their proposal and indicate their leadership style.

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in global health, and leadership are good, and any additional materials can be garnered through our Interlibrary Loan.

Access to journals in this field meets the needs of the course. Our holding in ecology, wildlife management, and conservation are sufficient. Journals such as *Global Health Journal*, *Global Challenges* and *The Lancet: Planetary Health* are available online through the Library. Our online indexes and abstracts in health and environmental sciences specifically and the sciences generally should more than meet the demands of this course. Access to reference databases such as Web of Science, and the more general Academic Search Complete are available.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
