For this online course, the Libraries hold all of the required journals listed on the Library Questionnaire. The instructor states that other readings will be provided to students through Brightspace. According to the Library Questionnaire, no supplementary library resources will be required. Students will not be conducting research. The syllabus already includes the Libraries' contact information for email and virtual reference, which will be helpful for students.

Based on the Libraries' New Course Proposal form and a review of the syllabus, in my role as subject selector, I conclude that the Libraries can fully support this course through existing resources.
