LIBRARY IMPACT STATEMENT (New Course Proposal)
LIBRARIAN'S ASSESSMENT

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: NRS 455

Department, College: Natural Resources Science

Faculty Member: Professor Scott McWilliams

Date returned to Faculty: December 11, 2020

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

This 3-credit course is titled "Wildlife Conservation and Hunting" and the Professor expects the students to conduct some literature review of current resource in the subject area in order to complete their "personal reflective essay."

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in ecology, aquatic ecosystem and climatology are good and any additional materials can be garnered through our Interlibrary Loan Department.

Access to journals in this field meets the needs of the course. Our holding in ecology, wildlife management, and conservation are sufficient. The Journal of Wildlife Management is available online through the Library. Our online indexes and abstracts in ecology and wildlife management specifically and the sciences generally should more than meet the demands of this course. In particular, access to reference databases such as Web of Science, Environment Abstracts, and the more general Academic Search Complete are available.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
