**LIBRARY IMPACT STATEMENT (New Course Proposal)**  
**LIBRARIAN'S ASSESSMENT**

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: CMB 395

Department, College: Cell & Molecular Biology. CELS

Faculty Member: Professor Lenore Martin

Date returned to Faculty: February 27, 2020

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

---

This new 1 credit course is titled "Inquiry into Cell and Molecular Biology" and the Professor expects the students to be focusing on vision statements and resume skills and conducting no research in this course.

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in cell and molecular biology are good, and any other materials can be garnered through our Interlibrary Loan office.

Our online indexes and abstracts in cell, molecular and biological sciences specifically and the sciences generally should more than meet the demands of this course. In particular, access to reference databases such as BIOSIS, ScienceDirect, Web of Science, SciFinder Scholar, and the more general Academic Search Complete are available. There are many online journals that are also available online through the Library.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.

Michael A. Cerbo II,  
Biology Bibliographer
