LIBRARY IMPACT STATEMENT (New Course Proposal)
LIBRARIAN'S ASSESSMENT

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: AFS 399

Department, College: Fisheries, Animal and Veterinary Sciences. CELS

Faculty Members: Professor Marta Gomez-Chiarri

Date returned to Faculty: February 24, 2020

Librarian Completing Assessment: Michael Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

This 1-6 credit internship course is titled "Aquaculture and Fisheries Internship" and involves independent study and or working in an outside organization for class credit. There is little research required for this course.

We are able to add whatever appropriate monographic needs may arise for the instructors. Our monographic holdings in fisheries, veterinary science and natural resource sciences are good and any additional materials can be garnered though inter-library loan (ILL)

Access to journals in this field meets the needs of the course. Our online indexes and abstracts in veterinary sciences and fisheries specifically and the sciences generally should more than meet the demands of this graduate course. In particular, access to reference databases such as Science Direct, Web of Science, Biology Abstracts (BIOSIS), Environment Abstracts and the more general Academic Search Complete are available. There are many online journals which are also available online through the Library. Due to the low research requirement for this class, our current holdings in this field seem sufficient.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.

Michael Cerbo II,
Fisheries Animal and Veterinary Sciences Bibliographer
