**LIBRARY IMPACT STATEMENT (New Course Proposal)**  
**LIBRARIAN'S ASSESSMENT**

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: MLS 360

Department, College: Cell & Molecular Biology, CELS

Faculty Member: Professor Neil Greene

Date returned to Faculty: February 7, 2020

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

---

This new course is titled "Fundamentals of the Medical Laboratory" and the Professor expects some research and case studies to be completed using resources in the field. All of the journals that are listed as required are available through the library.

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in the health sciences are good and any additional materials can be garnered through our library consortium (HELIN).

Access to journals in this field meets the needs of the course. Our online indexes and abstracts in biology, chemistry, microbiology and immunology, and the sciences generally should more than meet the demands of this course. In particular, access to reference databases such as PubMed, EMBASE, Medline, and Web of Science, and the more general Academic Search Complete are available. Required journals such as: *Annals of Clinical Laboratory Science*, *Critical Reviews in Clinical Laboratory Sciences*, *American Journal of Clinical Pathology*, and others listed by the Professor are available through the Library.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
