**LIBRARY IMPACT STATEMENT (New Course Proposal)**  
**LIBRARIAN'S ASSESSMENT**

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: BTC 102

Department, College: Cell & Molecular Biology. CELS

Faculty Member: Professor Edward Bozzi

Date returned to Faculty: January 9, 2020

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

---

This one credit seminar course is titled "Biotechnology Seminar" and the Professor expects the students to conduct little research in the subject area. Grading will consist of attendance and a major paper reviewing outside speakers.

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in biotechnology are good and any additional materials can be garnered through inter-library loan.

Access to journals in this field meets the needs of the course. Our online indexes and abstracts in biotechnology specifically and the sciences generally should more than meet the demands of this course. Access to reference databases such as BIOSIS, ScienceDirect, Web of Science, and the more general Academic Search Complete are available. There are many online journals such as Biotechnology Advances, Critical Reviews in Biotechnology, and many others in the field that are also available online through the Library.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
