LIBRARY IMPACT STATEMENT (New Course Proposal)
LIBRARIAN'S ASSESSMENT

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: AVS 327

Department, College: Fisheries, Animal & Veterinary Science. CELS

Faculty Member: Professor Justin Richard

Date returned to Faculty: October 29, 2019

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

This new 3 credit course is titled "Zoo Animal Management" and Professor Richard expects the students to create an "Animal Care Manual" using library resources in such fields as biology and veterinary sciences.

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in the biology, animal and veterinary sciences are good and any additional materials can be garnered through our library.

Access to journals in this field meets the needs of the course. Our online indexes and abstracts in biology, animal and veterinary sciences specifically and the sciences generally should more than meet the demands of this course. In particular, access to reference databases such as *Academic Search Complete* and others are available. All of the requested journal are available online through the Library, including *Zoo Biology*, *Journals of Wildlife Management*, *Journal of Zoo and Wildlife Medicine*, and *Applied Animal Behavior*.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
