LIBRARY IMPACT STATEMENT (New Course Proposal)
LIBRARIAN'S ASSESSMENT

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Course: NEU 210 Neuroethics and Diversity_____

Department, College: CMD/Health Sciences College_____

Faculty Member: Leslie Mahler_____

Date returned to Faculty: Aug 19, 2019_____

Librarian Completing Assessment: Joanna M. Burkhardt_____

Collection Management Officer: Joanna M. Burkhardt_____

Assessment of:

- Suitability of existing library resources;
- New library resources required to support the program;
- Information skills education required by the students; and
- Funds needed for library materials and services.

Please include:

1. What library holdings already exist in relevant subject categories. How much money is now allocated in the subject area?

The library subscribes to many relevant journal titles. The cost of these subscriptions is not broken out by department or college. Because of the interdisciplinary nature of the Neurosciences program, allocations for the purchase of monographs in relevant subject categories are not specific to Neurosciences. The allocations for related disciplines is sufficient to cover the purchase of any monographs needed to support this course.

2. Does URI have the essential journals as noted in the Faculty Questionnaire?

URI does not currently subscribe to the American Journal of College Health and Developmental Neuropsychology. We have subscriptions to many other relevant journal titles. The LIS request indicates that those titles are sufficient for the support of this course.

3. What new resources are required to support the course (including media, electronic, or other non-print materials)?

No new library resources are required to support this course.

4. What information mastery sessions will be required for the students?

No information mastery sessions are required for the students. Instructors should be aware that the library offers instruction sessions to teach students how to locate materials and to conduct academic research. Appointments can be made to bring classes to the library by contacting the Public Services Department.

5. What is the approximate cost to acquire the materials necessary? Which of these will be continuing costs?

There are no new costs to the library for the support of this course.
