**LIBRARY IMPACT STATEMENT
LIBRARIAN'S ASSESSMENT**

Course: MHM 504 *Economics for Healthcare Management*

Department, College: College of Business

Faculty Member: Prof. Michael DiNardi

Date returned to Faculty: 15 August 2019

Librarian Completing Assessment: Prof. Andrée J. Rathemacher

The Library Impact Statement for MHM 504 *Economics for Healthcare Management* states that students will be conducting library research in the course, and the proposed syllabus confirms this. The Impact Statement explains that “there will be 5 assignments based on a health policy or current issue in healthcare related to the major topics in the course.” Students “will be asked to analyze the potential effects of a particular policy or to design a policy to solve an issue in healthcare.” Students must support their arguments “with literature from health economics (most important), other social sciences, and medical fields.” They may cite work listed in the syllabus, but it is insufficient to use those as their only citations.

In response to the question about what critical journals, monographs, and electronic resources the University Libraries must have to support the course, the response is, “In reviewing the URI library website, the following journals that are needed for the course are listed as available online through the URI library portal.” Eighteen journals are listed, sixteen of which the URI Libraries have current access to. (*Frontiers of Health Services Management* is available online only through 2017, and *Harvard Business Review* is not available online.)

Despite limited access to two of the listed journals, based on my review of the Library Impact Statement and the proposed syllabus for MHM 504 *Economics for Healthcare Management*, I conclude that the University Libraries can meet the needs of this course with no additional resources.

In my role as Subject Selector for the College of Business (and the Department of Economics), I support the addition of this course.

Andrée J. Rathemacher
