The Library Impact Statement for DBA 620 *Advanced Quantitative Research Methods* states that students will not be conducting research in the course, and the proposed syllabus includes no information on assignments.

With regard to the question about what critical journals, monographs, and electronic resources the University Libraries must have to support the course, there is no response.

Based on my review of the Library Impact Statement and the proposed syllabus for DBA 620 *Advanced Quantitative Research Methods*, I conclude that the University Libraries can meet the needs of this course with no additional resources.

In my role as Subject Selector for the College of Business, I support the addition of this course.
