LIBRARY IMPACT STATEMENT (New Course Proposal)
LIBRARIAN'S ASSESSMENT

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: EVS518

Department, College: Environmental Sciences. CELS

Faculty Member: Professor Art Gold

Date returned to Faculty: December 7, 2018

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

This online, two credit graduate course is titled "Sustainable Natural Resource Management" and the Professor expects the students to conduct some research for this course. While most material will be supplied by the instructor thorough Sakai, students will be creating a study guide using research materials in the field

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in microbiology, biochemistry and biofilms are good and any additional materials can be garnered though our interlibrary loan.

Access to journals in this field meets the needs of the course. Our online indexes and abstracts in ecology and the biological sciences specifically and the sciences generally should more than meet the demands of this course. In particular, access to reference databases such as the Agricultural & Environmental Science Database, ScienceDirect, Web of Science, PubMed, and the more general Academic Search Complete are available. We also have all of the required journals listed for the course, such as Conservation Biology, Biological Conservation, Ecological Applications, Journal of Applied Ecology, Wildlife Monographs and Forest Ecology and Management. Our current holdings in this field seem sufficient for this course.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
