**LIBRARY IMPACT STATEMENT
LIBRARIAN'S ASSESSMENT**

Course: BUS 113 *Business Computing and Quantitative Analysis*

Department, College: College of Business

Faculty Member: Prof. Seung Shin

Date returned to Faculty: 13 December 2018

Librarian Completing Assessment: Prof. Andrée J. Rathemacher

The Library Impact Statement for BUS 113 *Business Computing and Quantitative Analysis* states that students will not be conducting library research in the course, and the proposed syllabus confirms this. Instead, they will be graded on attendance & participation; homework, quizzes, computer projects, and exams.

The syllabus lists a required textbook for the course: *Microsoft Excel 2016: Data Analysis & Business Modeling* by Wayne Winston. The URI Libraries offer the 5th edition (2016) of this book online through our O'Reilly Safari subscription.

In response to the question about what critical journals, monographs, and electronic resources the University Libraries must have to support the course, the response is "None."

Based on my review of the Library Impact Statement and the proposed syllabus for BUS 113 *Business Computing and Quantitative Analysis*, I conclude that the University Libraries can meet the needs of this course with no additional resources.

In my role as Subject Selector for the College of Business, I support the addition of this course.
