The Library Impact Statement for BUS 415X *Project Management* states that students will not be conducting library research in the course, and the syllabus confirms this. Instead they will be graded on applying the expertise they develop in the course to a real-life construction project, and they will take a midterm and a final exam.

In response to the question about what critical journals, monographs, and electronic resources the University Libraries must have to support the course, the response lists two books, which are the required textbooks for the course. I have ordered a print copy of *A Guide to the Project Management Body of Knowledge* (ISBN: 9781628253825) and an e-book copy of *Agile Practice Guide* (ISBN: 9781628251999) for the Libraries' collection.

Based on my review of the Library Impact Statement and the sample syllabus for BUS 415X, I conclude that the University Libraries can meet the needs of this course with no additional resources.

In my role as Subject Selector for the College of Business, I support the addition of this course.
