**LIBRARY IMPACT STATEMENT (New Course Proposal)**  
**LIBRARIAN'S ASSESSMENT**

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: ENT411

Department, College: Plant Science and Entomology. CELS

Faculty Member: Dr. Steven Alm

Date returned to Faculty: January 8, 2018

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

---

This three credit, interdisciplinary, general education course is titled "Pesticides and the Environment" and the Professor expects the students to conduct little research using online journals and resources that are essential to the field of study.

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in the environmental sciences, toxicology and agriculture are good and any additional materials can be garnered through inter library loan.

Per the Professor's comments, access to journals in this field meets the needs of the course. Journals such as Food Security, Journal of Toxicology, and the International Journal for Philosophy of Chemistry are available. Our online indexes and abstracts in natural resource science, environmental sciences and the sciences generally should more than meet the demands of this course. Access to reference databases such as ScienceDirect, Web of Science, Environment Abstracts, and the more general Academic Search Complete are available. We are unable to add any new journal titles at this time. However, our current holdings in this field seem sufficient.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
