**LIBRARY IMPACT STATEMENT (New Course Proposal)**  
**LIBRARIAN'S ASSESSMENT**

Subject selectors will complete this form as requested, assessing library materials and collections as detailed below. Send one copy of the assessment to the faculty member who requested it. Send one copy of the assessment to the Collection Management Officer.

Program: AVS 327X

Department, College: Fisheries, Animal & Veterinary Science. CELS

Faculty Member: Professor Becky Sartini

Date returned to Faculty: December 20, 2017

Librarian Completing Assessment: Michael A. Cerbo II

Collection Management Officer: Professor Joanna Burkhardt

---

This new course is titled "Zoo Animal Management" and the Professor expects the students to do research in the course. This course is devoted to "Zoo animal husbandry, research on animals housed in zoos, conservation and education programs in zoos." Students will be creating an "animal care manual" and will be using current journals and monographs for research.

We are able to add whatever appropriate monographic needs might arise for the instructor. Our monographic holdings in the animal and veterinary sciences are good and any additional materials can be garnered through our Interlibrary Loan office.

Access to journals in this field meets the needs of the course. Our online indexes and abstracts in animal and veterinary sciences specifically and the sciences generally should more than meet the demands of this course. In particular, access to reference databases such as Academic Search Complete and others are available. The suggested journals for the course are available through the library and include Zoo Biology, the Journal of Wildlife Management and the Journal of Zoo and Wildlife Medicine.

Therefore, the librarian believes that the Library can support, bibliographically, the needs of the students to be able to acquire the most out of this course.
