Thanks for filling out [NETSL 2020 Annual Conference Proposal Submission](#)

Here's what we got from you:

NETSL 2020 Annual Conference Proposal Submission

The NETSL Annual Spring Conference will be held Friday, April 17th, 2020 at the College of the Holy Cross, Worcester, MA.

We are seeking proposals for 60-minute breakout sessions and 7-minute lightning talks for our 2020 theme, Under Pressure: Coping with the Realities in Technical Services. Topics might include strategies for handling aggregated job responsibilities, techniques for articulating expectations and consequences, tools for keeping the library running with limited resources, aligning job descriptions with job actualities, methods for navigating through constant change, or advocacy ideas for moving technical services forward as a profession.

Please include ALL presenters on the proposal submission. We request one designated point presenter for conference communications. Point presenters will be notified of submission status by email in late February. Accepted presenters will have 5 business days to approve descriptive language and presenter information. Changes and complimentary registrations cannot be accommodated after that time.

Email address *

Session Title *

Session Format *

- 60-minute breakout session (suggested: 45-50 minute presentation + 10-15 minute Q&A)
- 7-minute lightning talk

Brief Summary: provide 1-2 sentences to be used in the printed program. *

KBART, a NISO Recommended Practice, enables the standardized transfer of data between content providers and knowledge bases, facilitating the efficient management of a library's electronic resources. This lightning talk will provide an overview of the changes planned for KBART Phase III, which will clarify current recommendations, revise the KBART endorsement process, add support for additional content types, improve the usefulness of KBART for non-English/European language content, and ensure that the KBART mission accurately reflects modern usage of KBART along with the needs of KBART Automation.

Learning Outcomes: Objective 1 *

Attendees will learn what KBART is and how it enables more efficient management of electronic resources by technical services librarians and improved discovery experiences by library end users.

Learning Outcomes: Objective 2 *

Attendees will learn about changes in the marketplace that have led to plans to update KBART to Phase III, such as an increase in multimedia and non-book/non-journal content, growth in global content, and the advent of KBART Automation for the automated transfer of institution-specific holdings data to knowledge bases.

Learning Outcomes: Objective 3 *

Attendees will be informed that the NISO KBART Standing Committee (of which I am Co-Chair) has recently begun work on KBART Phase III. Interested attendees will be invited to participate in this work by joining the KBART Standing Committee.

Audience/Type of Library (check all that apply)

- Academic/Research
- Public
- Archives/Historical/Special Collections
- Special
- Other:

Point Presenter Name and Affiliation (this presenter will function as the point of contact for all communications) *

Andrée Rathemacher, University of Rhode Island (and Co-Chair, NISO KBART Standing Committee)

Point Presenter Email *
