Thanks for a really informative presentation. As someone who wrangles eBook collections and all our EBA packages it's so useful to get an insight into the nuts and bolts behind the automated feeds that we are implementing through WSCM. I can see a few repeat viewings in my future! 😊😊

Hi all and welcome to the session! Please feel free to ask any questions in the Q&A tab.

Susan Davis  
University at Buffalo

When will this Wiley Kbart autoholdings function be available in Alma?

Susan Davis  
University at Buffalo

Sorry—resubmitted to the Q&A thread.

Wiley

Thanks Susan, I've answered there!

Chris Koehler  
University of Minnesota Libraries

Thanks for answering my question regarding the inclusion of paid and free holdings in one file! It may be outside the realm of possibility, but it would be useful for us at the Univ of Minnesota to have separate paid and free holdings files for our KBART load.
