2. Renumber and retitle, as follows:

   Management 112(12), Personnel Management and Interpersonal Behavior Semester II, 3 credits

III. From the College of Home Economics

A. Department of Textiles and Clothing

1. Approve the Non-Thesis Program in Textiles and Clothing for graduate studies leading to the Master of Science degree.

   Under the non-thesis plans, a minimum of 30 credits must be earned including T. C. 202, 203, and two 300 level textiles and clothing courses. A course in statistics is also recommended.

   A substantial paper would be written involving a thorough search of existing materials on a topic pertinent to the students' major area of interest. Work on this paper would be supervised by the major advisor and the finished paper would be subject to departmental approval. Two copies of the paper would be placed on file in the department. The paper would be written as an independent study project under existing special problems courses (T. C. 281, 282). Work may feasibly extend over more than one semester but no more than three credits may be earned on the paper.

   All candidates for the degree must satisfactorily complete a written comprehensive examination based on the content of course work. Questions will be submitted and evaluated by graduate faculty members in the department and/or related fields. A final oral examination in defense of the paper will be given in a departmental seminar comprised of faculty and degree candidates.
2. Add (new):

   T. & C. 301, **Seminar in Textiles and Clothing Research**  
   Semesters I or II, 3 credits  
   Critical study of research literature and research techniques.  
   Prerequisite: Permission of Department

   T. & C. 304, **Seminar and Practicum**  
   Semesters I or II, 3 credits  
   The professional role of the textiles and clothing specialist.  
   Prerequisite: Permission of Department.

3. Renumber, as follows:

   T. & C. 302, 303, Special Problems in Textiles and Clothing  
   Semesters I, II, 3-6 credits

   T. & C. 332, Research Methods in Textiles and Clothing  
   Semesters I or II, 3 credits

IV. From the **College of Pharmacy**

A. Department of Pharmacy

1. Approve Non-Thesis Option in Pharmacy for graduate studies (for students preparing for careers in hospital pharmacy) leading to the Master of Science degree.

   The non-thesis option would require the successful completion of an approved program of at least thirty credits of course work, of which two credits would be in Seminar, and at least six credits would be in the areas of manufacturing pharmacy and pharmaceutical formulations. The seminar courses would require full participation of the students in presenting and discussing outstanding research papers, review articles, and current developments in pharmaceutical sciences. Courses in both manufacturing pharmacy and pharmaceutical formulations require extensive use of the pharmaceutical, biological and chemical literature, preparatory to assigned laboratory problems as well as in the reporting of results. Also, each student taking courses in these areas would be required to engage in some original research and to demonstrate an ability to write scientific reports according to the standards acceptable in current pharmaceutical journals.

   Each candidate for the degree would be required to pass a written examination covering subject matter from all courses included in his plan of study. In addition, an oral examination would be given to insure that the candidate can communicate his knowledge and ideas satisfactorily.
